Our Digital Forensics in Cybersecurity (D431/C840) Course Exam exam question can make you stand out in the competition. Why is that? The answer is that you get the Digital-Forensics-in-Cybersecurity certificate. What certificate? Certificates are certifying that you have passed various qualifying examinations. Watch carefully you will find that more and more people are willing to invest time and energy on the Digital-Forensics-in-Cybersecurity Exam, because the exam is not achieved overnight, so many people are trying to find a suitable way. Fortunately, you have found our Digital-Forensics-in-Cybersecurity real exam materials, which is best for you.

With the simulation test, all of our customers will get accustomed to the Digital-Forensics-in-Cybersecurity exam easily, and get rid of bad habits, which may influence your performance in the real Digital-Forensics-in-Cybersecurity exam. In addition, the mode of Digital-Forensics-in-Cybersecurity learning guide questions and answers is the most effective for you to remember the key points. During your practice process, the Digital-Forensics-in-Cybersecurity test questions would be absorbed, which is time-saving and high-efficient. Concentrated all our energies on the study Digital-Forensics-in-Cybersecurity learning guide we never change the goal of helping candidates pass the exam. Our Digital-Forensics-in-Cybersecurity test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our Digital-Forensics-in-Cybersecurity exam materials, and you won't be regret.

On the one hand, our company hired the top experts in each qualification examination field to write the Digital-Forensics-in-Cybersecurity prepare dump, so as to ensure that our products have a very high quality, so that users can rest assured that the use of our research materials. On the other hand, under the guidance of high quality research materials, the rate of adoption of the Digital-Forensics-in-Cybersecurity Exam Guide is up to 98% to 100%. Of course, it is necessary to qualify for a qualifying exam, but more importantly, you will have more opportunities to get promoted in the workplace.

WGU Digital Forensics in Cybersecurity (D431/C840) Course Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which U.S. law criminalizes the act of knowingly using a misleading domain name with the intent to deceive a minor into viewing harmful material?

- A. Communications Assistance to Law Enforcement Act (CALEA)
- B. The Privacy Protection Act (PPA)
- C. Electronic Communications Privacy Act (ECPA)
- **D. 18 U.S.C. 2252B**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Title 18 U.S.C. § 2252B addresses the criminal offense of using misleading domain names with the intent to deceive minors into accessing harmful material. This law specifically targets online behavior designed to exploit or expose minors to inappropriate content.

* It is part of broader child protection statutes.

* Enforcement requires digital evidence linking domain misuse to the intent.

Reference: Federal statutes and legal frameworks on cybercrime emphasize the applicability of 18 U.S.C. 2252B in prosecuting online deception aimed at minors.

NEW QUESTION # 40

A company has identified that a hacker has modified files on one of the company's computers. The IT department has collected the storage media from the hacked computer.

Which evidence should be obtained from the storage media to identify which files were modified?

- A. Private IP addresses
- B. Public IP addresses
- **C. File timestamps**
- D. Operating system version

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

File timestamps, including creation time, last modified time, and last accessed time, are fundamental metadata attributes stored with each file on a file system. When files are modified, these timestamps usually update, providing direct evidence about when changes occurred. Examining file timestamps helps forensic investigators identify which files were altered and estimate the time of unauthorized activity.

* IP addresses (private or public) are network-related evidence, not stored on the storage media's files directly.

* Operating system version is system information but does not help identify specific file modifications.

* Analysis of file timestamps is a standard forensic technique endorsed by NIST SP 800-86 (Guide to Integrating Forensic Techniques into Incident Response) for determining file activity and changes on digital media.

NEW QUESTION # 41

Which law includes a provision permitting the wiretapping of VoIP calls?

- **A. Communications Assistance to Law Enforcement Act (CALEA)**
- B. Health Insurance Portability and Accountability Act (HIPAA)
- C. Electronic Communications Privacy Act (ECPA)
- D. Stored Communications Act

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Communications Assistance to Law Enforcement Act (CALEA) mandates telecommunications carriers to assist law enforcement in executing authorized wiretaps, including on Voice over IP (VoIP) calls, ensuring lawful interception capabilities.

* CALEA requires built-in surveillance capabilities in communications systems.

* It balances privacy rights with law enforcement needs.

Reference:CALEA is cited in digital forensics and cybersecurity standards relating to lawful interception capabilities.

NEW QUESTION # 42

Which type of storage format should be transported in a special bag to reduce electrostatic interference?

- A. Flash drives
- B. Optical discs
- C. Solid-state drives
- **D. Magnetic media**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Magnetic media such as hard drives and magnetic tapes are sensitive to electrostatic discharge (ESD), which can damage data. They must be transported in anti-static bags or containers to reduce the risk of electrostatic interference.

* SSDs and flash drives are less vulnerable to ESD but still benefit from proper packaging.

* Proper handling protocols prevent unintentional data loss or corruption.

Reference:NIST SP 800-101 and forensic evidence handling standards specify anti-static packaging for magnetic storage media.

NEW QUESTION # 43

What is a reason to use steganography?

- **A. To save secret data**
- B. To delete secret data
- C. To highlight secret data
- D. To erase secret data

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Steganography is used to save or embed secret data within another file or medium, allowing covert communication without alerting observers to the presence of the data.

* The goal is to conceal, not highlight or delete data.

* It does not erase or delete secret data; instead, it hides it.

This aligns with standard definitions in cybersecurity and forensic literature including NIST's cybersecurity frameworks.
