BraindumpsIT Offers Actual and Updated Fortinet FCP_FMG_AD-7.6 Practice Questions

If you want to pass the FCP_FMG_AD-7.6 exam then you have to put in some extra effort, time, and investment then you will be confident to pass the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam. With the complete and comprehensive Fortinet FCP_FMG_AD-7.6 Exam Dumps preparation you can pass the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam with good scores. The Fortinet FCP_FMG_AD-7.6 Questions can be helpful in this regard. You must try this.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting
Topic 2	• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 4	• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 5	• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

Refer to the exhibit. What can you conclude from the downloaded import report?

```
Start to import config from device(Remote-FortiGate) vdom(root) to  
adom(root), package(Remote-FortiGate_root)  
  
"firewall address",SKIPPED,"(name=all, oid=2309, DUPLICATE)"  
  
"firewall address",FAIL,"(name=REMOTE_SUBNET, oid=2311,  
reason=interface((firewall address:REMOTE_SUBNET) any<-port6) binding  
fail)"  
  
"firewall policy",FAIL,"(name=1, oid=3070, reason=interface(interface binding  
contradiction. detail: (firewall address:REMOTE_SUBNET) any<-port6) binding  
fail)"
```

- A. FortiManager will change the configuration of REMOTE_SUBNET to match the interface mapping coming in from Remote-FortiGate.
- B. FortiManager does not support per-device mapping for firewall addresses.
- C. As a result of this policy import process, FortiManager will create a new firewall address called REMOTE_SUBNET in the ADOM database.
- **D. The administrator will see a new policy package named Remote-FortiGate_root in the FortiManager ADOM database.**

Answer: D

Explanation:

The import report shows that a new policy package named Remote-FortiGate_root will be created in the FortiManager ADOM database, but some firewall addresses and policies failed to import due to interface binding conflicts.

NEW QUESTION # 42

Which is recommended when you are managing a high volume of logs in your network?

- A. Forward logs from FortiAnalyzer to FortiManager daily.
- **B. Add and manage FortiAnalyzer from FortiManager.**
- C. Enable advanced ADOM mode on FortiManager.
- D. Store logs on FortiManager and use FortiView.

Answer: B

Explanation:

Adding and managing FortiAnalyzer from FortiManager is recommended for handling a high volume of logs, as FortiAnalyzer is designed specifically for centralized log management, analysis, and reporting, which offloads this workload from FortiManager.

NEW QUESTION # 43

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

- A. The administrator will be able to select the option to assign the global policy package to the new policy package.
- B. The administrator will have to assign the global policy package from the global ADOM.
- C. FortiManager will automatically install policies on the policy package in ADOM1.
- D. FortiManager will automatically assign the global policy package to the new policy package.

Answer: A

Explanation:

When a global policy package is assigned to an ADOM, administrators creating new policy packages within that ADOM have the option to select and assign the global policy package to the new policy package if desired.

NEW QUESTION # 44

While attempting to push a NetFlow configuration script through the FortiManager policy package: an administrator encounters an error stating that an object is unrecognized in line 4.

```
Starting log (Run on database)
config vdom
edit AGEUSR
[line 4] > config sys interface [parameter(s) invalid. detail: object unrecognized]
Failed to commit to DB, reason([line 4] > config sys interface [parameter(s) invalid. detail: object unrecognized]
Running script(NetFlow_Configuration) on DB failed
```

What must the administrator do to successfully apply the NetFlow configuration script and avoid the object unrecognized error?

- A. Use metadata variables if they use VDOMs in the script.
- B. Make sure the user running the script has full access to the VDOM-AGEUSR.
- C. Run the script on the device database.
- D. Create a normalized interface on the policy layer before running the script.

Answer: A

Explanation:

When using scripts that reference VDOM-specific objects, such as interfaces, in FortiManager, metadata variables must be used to correctly map those objects per VDOM. This prevents "object unrecognized" errors during script execution.

NEW QUESTION # 45

Refer to the exhibit.

FortiManager address object

Edit Address - LAN

Category

Address

Name

LAN

Search...

☐	Mapped Device	Details
☐	BR1-FGT-1 [root]	IP/Netmask: 10.10.10.5/255.255.255.255
☐	HQ-NGFW-1 [root]	IP/Netmask: 172.16.5.20/255.255.255.255
☐	Remote-Firewall [root]	IP/Netmask: 21.21.2.5/255.255.255.255

FORTINET

An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask will be installed on Remote-Firewall [VDOM1] for the LAN firewall address object?

- A. 10.10.10.5/255.255.255.255
- B. 172.16.5.0/255.255.255.0
- C. 21.21.2.5/255.255.255.255
- D. 172.16.5.20/255.255.255.255

Answer: C

Explanation:

The per-device mapping overrides the global IP/netmask setting for the firewall address object. For the device "Remote-Firewall," the mapped IP/netmask is 21.21.2.5/255.255.255.255, so this value will be installed on Remote-Firewall [VDM1].

NEW QUESTION # 46

.....

Sometimes, you may worry about too much on the FCP_FMG_AD-7.6 exam and doubt a lot on the FCP_FMG_AD-7.6 exam questions. But if your friends or other familiar people passed the exam, you may be more confident in his evaluation. In any case, our common goal is to let you pass the exam in the shortest possible time! And we can proudly claim that if you study with our FCP_FMG_AD-7.6 Training Materials for 20 to 30 hours, then you can pass the exam with ease. And it is the data provided and tested by our worthy customers!
