New CompTIA Linux+ Certification Exam XK0-005 study guide and latest learning materials and practice materials have been provide for customers. Itcertkey is a good platform that has been providing reliable, true, updated, and free CompTIA Linux+ Certification Exam XK0-005 Exam Questions. The CompTIA Linux+ Certification Exam XK0-005 exam fee is affordable, in order

to success in your career, you need to pass CompTIA Linux+ Certification Exam exam.

CompTIA Linux+ Certification Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23
A cloud engineer is installing packages during VM provisioning.
Which of the following should the engineer use to accomplish this task?

- A. Sidecar
- B. Bash
- C. Docker
- D. Cloud-init

Answer: D

Explanation:
The cloud engineer should use cloud-init to install packages during VM provisioning. Cloud-init is a tool that allows the customization of cloud instances at boot time. Cloud-init can perform various tasks, such as setting the hostname, creating users, installing packages, configuring network, and running scripts. Cloud-init can work with different cloud platforms and Linux distributions. This is the correct tool to accomplish the task.

NEW QUESTION # 24
Which of the following command sequences is used to install Linux software directly from source code?

- A. ./configure # make # make install
- B. ./config # ./compile # ./copy
- C. ./unpack # make exec # make copy
- D. unzip # gcc # install

Answer: A

Explanation:
* This is the standard method for compiling software from source:
* ./configure: Prepares the build environment.
* make: Compiles the source code.
* make install: Installs the compiled program.

man make

NEW QUESTION # 25
A Linux administrator needs to switch from text mode to GUI. Which of the following runlevels will start the GUI by default?

- A. Runlevel 4
- B. Runlevel 6
- C. Runlevel 5
- D. Runlevel 3

Answer: C

Explanation:
http://www.linfo.org/runlevel_def.html

NEW QUESTION # 26
A systems administrator created a new Docker image called test. After building the image, the administrator forgot to version the release. Which of the following will allow the administrator to assign the v1 version to the image?

- A. docker image save test test:v1

- B. docker image tag test test:vl
- C. docker image build test:vl
- D. docker image version test:vl

Answer: B

Explanation:
Explanation
The docker image tag test test:vl command can be used to assign the vl version to the image called test. This command creates a new tag for the existing image, without changing the original image. The docker image save test test:vl command would save the image to a file, not assign a version. The docker image build test:vl command is invalid, as vl is not a valid version number. The docker image version test:vl command does not exist. References: [CompTIA Linux+ (XK0-005) Certification Study Guide], Chapter 16: Virtualization and Cloud Technologies, page 500.

NEW QUESTION # 27
A Linux administrator is installing a web server and needs to check whether web traffic has already been allowed through the firewall. Which of the following commands should the administrator use to accomplish this task?

- A. firewalld query-service-http
- B. firewalld --check-service http
- C. firewall-cmd --check-service http
- D. firewall-cmd --query-service http

Answer: D

NEW QUESTION # 28
......

Practice what you preach is the beginning of success. Since you have chosen to participate in the demanding IT certification exam. Then you have to pay your actions, and achieve excellent results. Itcertkey's CompTIA XK0-005 exam training materials are the best training materials for this exam. With it you will have a key to success.
