

# Fresh WGU Ethics-In-Technology Dumps - Valid Ethics-In-Technology Test Labs

**WGU D333 Pre- Assessment V1 (New 2023/2024 Update) Ethics in Technology Exam| Questions and Verified Answers| 100% Correct| Graded A**

**QUESTION**  
A major online pet medical record supplier's information system is attacked, and data are stolen about recent pet deaths. The FBI determines that a mall pet store chain has taken the data and used it to send "buy a puppy" solicitations to the owners of the deceased pets.  
What is the source of the data threat in the scenario?

**Answer**  
Industrial spy

**QUESTION**  
A major online pet medical record supplier's information system is attacked, and data are stolen about recent pet deaths. The FBI determines that a mall pet store chain has taken the data and used it to send "buy a puppy" solicitations to the owners of the deceased pets.  
What is a description of the threat to the data?

**Answer**  
Unintended release of sensitive data or the access of sensitive data by unauthorized individuals

**QUESTION**  
Jack works in the IT department of a major U.S. bank. The bank has created a mobile application for use by its customers. One of the permissions needed by the application is the location of the bank customer. Jack has decided to share the customer location information with his friend who works for a major hotel chain. The hotel chain will then reach out to the bank customers to offer them a discounted room in the customer's travel area.  
What is a description of the threat to the customer data?

## WGU Ethics In Technology QCO1 Sample Questions (Q17-Q22):

### NEW QUESTION # 17

A group of hackers manipulated data to disable the national energy infrastructure for its political goals. Which type of attack did the group employ?

- A. Cyberespionage
- B. Trojan horse
- C. Advanced persistent threat
- D. Cyberterrorism

**Answer: D**

### NEW QUESTION # 18

A company is bidding on a website project for a prospective client. The company knows that the client is going to weigh the time to deliver the project as one of its primary decision factors. The client has advised all bidders that completion time should be no more than three months with a budget of \$50,000.

The company knows that with its current resourcing, it cannot complete the project in less than four months.

However, it is confident that it will be able to deliver within four months to a high-quality standard and 20% under the set budget.

The company advises the client that it would need four months but would be able to complete the project under budget.

What is this behavior considered?

- A. Unethical and illegal
- B. Unethical and legal
- C. Ethical and legal
- D. Ethical and illegal

**Answer: D**

### NEW QUESTION # 19

A data scientist selects publicly available demographic data from a limited group of familiar zip codes when training an algorithm. What are two ethical concerns with this approach? Choose 2 answers.

- A. Privacy violation
- B. Small sample size
- C. Proxy discrimination
- D. Predictive coding

**Answer: B,C**

Explanation:

The data scientist's approach raises two key ethical concerns:

\* Proxy Discrimination (C) - Using demographic data from limited zip codes may create biased AI models that discriminate against certain racial, economic, or social groups. Zip codes often reflect historical segregation, leading to unfair predictions.

\* Small Sample Size (D) - Training an AI model on a limited set of familiar zip codes introduces selection bias, reducing the model's ability to generalize across diverse populations. This affects fairness and accuracy.

\* Algorithmic Fairness & Bias (FAT/ML Guidelines) - AI models must avoid using biased proxies and ensure diverse training data.

\* Privacy & Ethical AI (GDPR, CCPA) - AI decisions must not indirectly discriminate based on location, race, or socioeconomic status.

\* Utilitarian Ethics (Maximizing Fairness & Inclusivity) - AI should benefit all groups equally, not just selected demographics.

\* IEEE & ACM AI Ethics Standards - Encourage transparent, unbiased data selection to prevent discrimination.

Relevant Ethical References in Technology: Thus, the correct answers are C. Proxy discrimination and D.

Small sample size, as both contribute to bias in AI models.

## NEW QUESTION # 20

What are two outcomes of adherence to a professional code of ethics for individuals, their profession, and society as a whole?  
Choose 2 answers.

- A. Standardized business practices
- B. Faster career advancement
- C. Consistent decision-making
- D. Assured employer integrity

**Answer: A,C**

Explanation:

Adherence to a professional code of ethics ensures that individuals, their profession, and society benefit from ethical consistency and industry best practices.

1. Standardized Business Practices:

- \* Ethical codes establish clear guidelines for professional conduct.
- \* They promote fairness, transparency, and accountability in business.

2. Consistent Decision-Making:

- \* A well-defined ethical framework helps professionals make fair and ethical choices in various situations.
- \* Ensures uniform application of ethical principles across different cases.
- \* C. Assured Employer Integrity: Ethics applies to individual conduct rather than guaranteeing an employer's behavior.
- \* D. Faster Career Advancement: Ethical behavior may help long-term career growth, but it is not a guaranteed outcome.

Why Not the Other Options? Thus, the correct answers are A. Standardized business practices and B.

Consistent decision-making.

- \* ACM Code of Ethics and Professional Conduct.
- \* IEEE Code of Ethics (2020).

References in Ethics in Technology:

## NEW QUESTION # 21

Which principle, according to the Organisation for Economic Co-operation and Development's (OECD) privacy guidelines, states that people have the right to review their data, challenge its correctness, and have incorrect data changed?

- A. Use limitation
- B. Purpose specification
- C. Individual participation
- D. Security safeguard

**Answer: C**

## NEW QUESTION # 22

.....

There are three versions of WGU Ethics In Technology QCO1 test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install Ethics-In-Technology test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. Through a large number of simulation tests, you can rationally arrange your own Ethics-In-Technology exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that Ethics-In-Technology Test Answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our Ethics-In-Technology guide torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.
