Oracle evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for Oracle 1Z0-947 Exam Questions for three months after the purchase to ensure you are studying the most recent Oracle solutions.

Oracle GoldenGate 19c Implementation Professional Sample Questions (Q80-Q85):

NEW QUESTION # 80

What is a trusted point in a GoldenGate deployment?

- A. Security keys to provide secure online authentication
- B. An access point that you can trust to be a safe connection
- C. A high level of security and protection system that is designed against various types of threats, including malware, hacking, and attacks
- D. The one root certificate authority (rootCA) that is used for signing all certificates across all deployments

Answer: D

Explanation:

In Oracle GoldenGate (especially in Microservices Architecture), the trusted point refers to the root certificate authority (rootCA) used to digitally sign all the certificates for secure communication. This ensures trust between all components within a deployment.

NEW QUESTION # 81

Which is an invalid combination for EVENTACTIONS with options?

- A. EVENTACTIONS (CHECKPOINT BEFORE, ABORT)
- B. EVENTACTIONS (CHECKPOINT BOTH, IGNORE)
- C. EVENTACTIONS (CHECKPOINT AFTER, ABORT)
- D. EVENTACTIONS (CHECKPOINT BOTH, STOP)

Answer: B

Explanation:

According to Oracle GoldenGate documentation, IGNORE cannot be combined with any CHECKPOINT option. CHECKPOINT implies data consistency, while IGNORE skips the transaction entirely-creating a logical conflict.

NEW QUESTION # 82

A Distribution Path sends the transaction of data from Extract to Replicat. How can you create a Distribution Path?

- A. In GGSCI with GoldenGate commands
- B. From the Service Manager home page
- C. From Cloud Shell with REST APIs
- D. At OS prompt with run preceding the GoldenGate commands

Answer: B

Explanation:

In Oracle GoldenGate Microservices Architecture, the Service Manager UI is the recommended and primary interface to create a Distribution Path using the Distribution Server. This method is officially documented and intended for simplified management.

NEW QUESTION # 83

What is the role of the Replicat process?

- A. Routes data through Distribution Server
- B. Backs up trail files
- C. Applies captured changes to the target database
- D. Captures changes from the source DB logs

Answer: C

Explanation:

Replicat reads change data from Oracle GoldenGate trails and applies it to a target database using SQL commands.

NEW QUESTION # 84

Prerequisite steps should be followed to ensure a successful Initial Load was performed. One of the steps is to "prepare target tables." What does it mean to prepare target tables?

- A. The target table must exist in the target database before Initial Load process at target site.
- B. The target table must exist in the target database before Initial Load process at source site.
- C. The target database must exist, and all tables for replication must exist with data already loaded into tables.
- D. The target database must exist, and an obey file must be used to create all tables for replication before Initial Load process at target site.

Answer: A

Explanation:

Before performing an Initial Load in Oracle GoldenGate: The structure (tables) must already be created on the target database. GoldenGate does not create target tables during Initial Load - it only copies the data. So, you must manually prepare the tables beforehand.

NEW QUESTION # 85

.....

The best news is that during the whole year after purchasing our 1Z0-947 study materials , you will get the latest version of our 1Z0-947 exam prep for free, since as soon as we have compiled a new versions of the 1Z0-947 learning quiz, our company will send the latest one of our 1Z0-947 training engine to your email immediately. It will be quite fast and convenient to process and our system will auto inform you to free download as long as we update our exam dumps.
