Gott will, dass ich eine Person mit Fähigkeit, statt eine gute aussehende Puppe zu werden. Wenn ich IT-Branche wähle, habe ich dem Gott meine Fähigkeiten bewiesen. Aber der Gott ist mit nichts zufrieden. Er hat mich gezwungen, nach oben zu gehen. Die Forescout FSCP Zertifizierungsprüfung ist eine große Herausforderung in meinem Leben. So habe ich sehr hart gelernt. Aber das macht doch nichts, weil ich EchteFrage die Fragenkataloge zur Forescout FSCP Zertifizierung gekauft habe. Mit ihr kann ich sicher die die Forescout FSCP Prüfung bestehen. Der Weg ist unter unseren Füßen, nur Sie können ihre Richtung entscheiden. Mit den Prüfungsmaterialien zur Forescout FSCP Prüfung von EchteFrage können Sie sicher eine bessere Zukunft haben.

Die Forescout FSCP Zertifizierungsprüfung ist eine sehr populäre Prüfung. Obwohl es sehr schwierig zu bestehen ist, können Sie diese Prüfung leichter bestehen, wenn Sie die richtige Methode finden. Und Wir EchteFrage sind Ihre beste Wahl. Mit der 100%-Hitrate Prüfungsunterlagen von EchteFrage können Sie alle Probleme in der Forescout FSCP Zertifizierungsprüfung auslösen. Wenn Sie die Prüfungsfragen und Testantworten ernst lernen, gibt es keine Probleme für Sie. Und nach dem Kauf können Sie einjährigen kostenlosen Aktualisierungsservice bekommen. (innerhalb einem Jahr) Sie können über die gewünschten Forescout FSCP Schulungsunterlagen beherrschen, wenn Sie auf jeden Fall die neueste Version bekommen. Probieren Sie sofort, bitte.

>> FSCP Deutsche Prüfungsfragen <<

Forescout FSCP Simulationsfragen, FSCP Fragenpool

Forescout FSCP Zertifizierungsprüfung sowie Cisco, IBM, HP Prüfungen sind jetzt sehr populär. Wenn Sie die Forescout FSCP Zertifizierung bekommen wollen, realisieren die Forescout FSCP Dumps von EchteFrage Ihren Wunsch. Nach dem Erfolg der Forescout FSCP Zertifizierung können Sie auch andere IT-Zertifizierungsprüfungen ablegen. Es gibt keine Probleme für alle Forescout Prüfungen, wenn Sie Prüfungsfragen und Antworten von besitzen.

Forescout Certified Professional Exam FSCP Prüfungsfragen mit Lösungen (Q69-Q74):

69. Frage

Place the DNS Enforce control actions into the correct workflow order for endpoints which have a pending control action.

Antwort:

Begründung:

First Choose...
 Choose...
 Endpoint tries to access www.website.com
 CounterACT responds with HTTP redirect
 Endpoint requests the page from CounterACT
 CounterACT serves the captive portal
 DHCP assigns CounterACT as the DNS Server

Second Choose...
 Choose...
 Endpoint tries to access www.website.com
 CounterACT responds with HTTP redirect
 Endpoint requests the page from CounterACT
 CounterACT serves the captive portal
 DHCP assigns CounterACT as the DNS Server

Third Choose...
 Choose...
 Endpoint tries to access www.website.com
 CounterACT responds with HTTP redirect
 Endpoint requests the page from CounterACT
 CounterACT serves the captive portal
 DHCP assigns CounterACT as the DNS Server

Fourth Choose...
 Choose...
 Endpoint tries to access www.website.com
 CounterACT responds with HTTP redirect
 Endpoint requests the page from CounterACT
 CounterACT serves the captive portal
 DHCP assigns CounterACT as the DNS Server

Fifth Choose...
 Choose...
 Endpoint tries to access www.website.com
 CounterACT responds with HTTP redirect
 Endpoint requests the page from CounterACT
 CounterACT serves the captive portal
 DHCP assigns CounterACT as the DNS Server

First DHCP assigns CounterACT as the DNS Server
 Second Endpoint tries to access www.website.com
 Third Endpoint requests the page from CounterACT
 Fourth CounterACT responds with HTTP redirect
 Fifth CounterACT serves the captive portal

70. Frage

When configuring policies, which of the following statements is true regarding the indicated property?

Select one:

- A. Negates the criteria outside the property
- B. Irresolvable hosts would match the condition
- **C. Negates the criteria inside the property**
- D. Negates the "evaluate irresolvable as" setting
- E. Modifies the irresolvable condition to TRUE

Antwort: C

Begründung:

Based on the policy condition image provided showing the NOT checkbox on "Windows Antivirus Update Data", the correct statement is that the NOT operator negates the criteria inside the property.

Understanding the NOT Operator:

When the NOT checkbox is selected on a policy condition property, it performs a logical negation (NOT operation) on the criteria evaluation. According to the Forescout Administration Guide:

The NOT operator creates an inverted evaluation:

* Without NOT: "Windows Antivirus Update Data = [value]"

* Result: Matches endpoints where the property equals the specified value

* With NOT (as shown in the image): "NOT (Windows Antivirus Update Data = [value])"

* Result: Matches endpoints where the property does NOT equal the specified value

How the NOT Operator Works:

The NOT operator negates the criteria inside the property:

* Criteria Evaluation - The property condition is evaluated normally first

* Negation Applied - The result is then inverted (TRUE becomes FALSE, FALSE becomes TRUE)

* Final Result - The endpoint matches only if the negated condition is true

Example from the Image:

The image shows:

* First criterion: "Windows Antivirus Running - 360 Sat" (AND)

* Second criterion: "NOT Windows Antivirus Update Data" (checked)

This means:

* The endpoint must have Windows Antivirus Running = True (360 Sat)

* AND the endpoint must NOT have the Windows Antivirus Update Data property value (whatever was specified)

* The NOT negates the criteria inside the property condition

NOT vs. "Evaluate Irresolvable As":

According to the documentation, these are independent settings:

Setting

Purpose

NOT Checkbox

Negates the criteria evaluation (inverts the match logic)

Evaluate Irresolvable As

Defines how to handle unresolvable properties (when data cannot be determined) The NOT operator works inside the property evaluation, while "Evaluate Irresolvable As" is a separate setting that determines behavior when a property cannot be resolved.

Why Other Options Are Incorrect:

* A. Irresolvable hosts would match the condition - The NOT operator doesn't specifically affect how irresolvable properties are handled

* C. Negates the criteria outside the property - The NOT operator is internal to the property; it negates the criteria inside, not outside

* D. Modifies the irresolvable condition to TRUE - The NOT operator doesn't modify the "Evaluate Irresolvable As" setting; these are independent

* E. Negates the "evaluate irresolvable as" setting - The NOT operator and "Evaluate Irresolvable As" are separate; NOT doesn't affect or negate that setting

Policy Condition Structure:

According to the Forescout Administration Guide:

A policy condition is structured as:

text

[NOT] [Property Name] [Operator] [Value]

Where:

- * [NOT] - Optional negation operator (what the checkbox controls)
- * [Property Name] - The property being evaluated
- * [Operator] - The comparison operator (equals, contains, greater than, etc.)
- * [Value] - The value to match against

When NOT is checked, it negates the entire criteria evaluation inside that property condition.

Referenced Documentation:

- * Forescout Administration Guide v8.3
- * Forescout Administration Guide v8.4
- * Define policy scope documentation
- * Forescout eyeSight policy sub-rule advanced options

71. Frage

When configuring policies, which of the following statements is true regarding this image?

- A. Has no effect on irresolvable hosts
- B. The NOT checkbox means the "Evaluate Irresolvable as" should be set to True
- C. Negates the criteria inside the property
- D. The external NOT does not change the meaning of "evaluate irresolvable as"
- E. The NOT checkbox means the "Evaluate Irresolvable as" should be set to False

Antwort: C

Begründung:

The NOT checkbox negates the criteria inside the property. According to the Forescout Administration Guide, when the NOT checkbox is selected on a policy condition criteria, it reverses the logic of that specific criterion evaluation.

Understanding the NOT Operator in Policy Conditions:

In Forescout policy configuration, the NOT operator is a Boolean logic operator that inverts the result of the property evaluation.

When you select the NOT checkbox:

- * Logical Inversion - The condition is evaluated normally, and then the result is inverted
- * Criteria Negation - If a criteria would normally match an endpoint, selecting NOT causes it NOT to match
- * Property-Level Operation - The NOT operator applies specifically to that individual property/criterion, not to the entire rule

Example of NOT Logic:

Without NOT:

- * Condition: "Windows Antivirus Running = True"
- * Result: Matches endpoints that HAVE antivirus running

With NOT:

- * Condition: "NOT (Windows Antivirus Running = True)"
- * Result: Matches endpoints that DO NOT have antivirus running

NOT vs. "Evaluate Irresolvable As":

According to the documentation, the NOT operator and "Evaluate Irresolvable As" are independent settings:

- * NOT operator - Negates/inverts the criteria evaluation itself
- * "Evaluate Irresolvable As" - Defines what happens when a property CANNOT be resolved (is irresolvable) These serve different purposes:

- * NOT determines what value to match
- * Evaluate Irresolvable As determines how to handle unresolvable properties Handling Irresolvable Criteria:

According to the administration guide documentation:

"If you do not select the Evaluate irresolvable criteria as option, the criteria is handled as irresolvable and the endpoint does not

undergo further analysis." The "Evaluate Irresolvable As" checkbox allows you to define whether an irresolvable property should be treated as True or False when the property value cannot be determined. This is independent of the NOT checkbox.

Why Other Options Are Incorrect:

- * A. The NOT checkbox means the "Evaluate Irresolvable as" should be set to True - Incorrect; NOT and Evaluate Irresolvable As are independent settings
- * B. The external NOT does not change the meaning of "evaluate irresolvable as" - While technically true that NOT doesn't change the Evaluate Irresolvable setting, the answer doesn't explain what NOT actually does
- * C. Has no effect on irresolvable hosts - Incorrect; NOT negates the criterion logic regardless of whether it's resolvable
- * E. The NOT checkbox means the "Evaluate Irresolvable as" should be set to False - Incorrect; NOT and Evaluate Irresolvable As are independent Policy Condition Structure:

According to the documentation, a policy condition consists of:

- * Property criteria combined with Boolean logic operators
- * Individual criterion settings including NOT operator
- * Irresolvable handling options that are separate from the NOT operator Referenced Documentation:
- * Forescout Administration Guide - Define policy scope
- * Forescout eyeSight policy sub-rule advanced options
- * Handling Irresolvable Criteria section
- * Working with Policy Conditions

72. Frage

What information must be known prior to generating a Certificate Signing Request (CSR)?

- A. CA, Domain Name, Administrators Name
- B. Certificate extension, format requirements, Encryption Type
- C. Revocation Authority, Certificate Extension, CA
- **D. Hostname, IP Address, and FQDN**
- E. IP address, CA, Host Name

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout RADIUS Plugin Configuration Guide and CSR Generation documentation, the information that must be known prior to generating a Certificate Signing Request (CSR) is Hostname, IP Address, and FQDN.

Information Required for CSR Generation:

According to the RADIUS Plugin Configuration Guide:

"When you generate the certificate signing request (CSR), you must know the following information about the system requesting the certificate:

- * The hostname of the system
- * The IP address of the system
- * The FQDN (Fully Qualified Domain Name) of the system"

Standard CSR Requirements:

According to the official documentation:

When generating a CSR, the following information is typically requested:

- * Common Name (CN) - The FQDN or hostname of the system
- * IP Address - The IP address of the appliance or device
- * Organization Name - The organization/company name
- * Organization Unit (OU) - Department or division
- * Locality (L) - City or town
- * State (ST) - State or province
- * Country (C) - Country code
- * Key Type - Typically RSA (2048-bit minimum)

Core Required Elements:

The most critical information that MUST be known before generating the CSR:

- * Hostname - The computer/appliance name (e.g., "counteract-em-01")
- * IP Address - The management IP address of the appliance (e.g., "192.168.1.50")
- * FQDN - The fully qualified domain name (e.g., "counteract-em-01.example.com") These three pieces of information are essential because:
- * The certificate's validity is tied to these identifiers
- * The CSR encodes these values

- * The CA uses this information to validate the certificate request
 - * Endpoints and systems verify certificates against these values
- Why Other Options Are Incorrect:
- * A. Certificate extension, format requirements, Encryption Type - These are configuration options, not prerequisite knowledge; extension type (e.g., .pfx, .pem) is determined after CSR signing
 - * C. IP address, CA, Host Name - Missing FQDN; while CA information is needed eventually, it's not required to GENERATE the CSR
 - * D. Revocation Authority, Certificate Extension, CA - Revocation authority and certificate extension are post-generation concerns; not needed to generate CSR
 - * E. CA, Domain Name, Administrators Name - Administrator name is not necessary for CSR generation; CA information is needed for obtaining signed certificate, not generating CSR
- CSR Generation Process:
- According to the documentation:
- * Gather Required Information - Collect hostname, IP address, and FQDN
 - * Generate CSR - Use tools like ftool cert gen to create the CSR file
 - * Answer Prompts - Provide the hostname, IP, and FQDN when prompted
 - * Submit to CA - Send the CSR file to a Certificate Authority for signing
 - * Receive Signed Certificate - CA returns the signed certificate
- CSR File Output:
- According to the documentation:
- The CSR generation process creates a file (typically ca_request.csr) containing:
- * The encoded hostname, IP address, and FQDN
 - * The public key
 - * The signature algorithm
 - * Other system identification information
- This file is then submitted to a Certificate Authority for signing.
- Referenced Documentation:
- * Forescout RADIUS Plugin Configuration Guide v4.3 - Certificate Readiness section
 - * Create a Certificate Sign Request documentation
 - * How to Create a CSR (Certificate Signing Request) - DigiCert Reference
 - * RADIUS Plugin Configuration - System Certificate section

73. Frage

When an admission event is seen, how are main rules and sub-rules processed?

- A. Main rules process sequentially, sub-rules process in parallel.
- **B. Main rules process concurrently, sub-rules process sequentially.**
- C. Main rules process concurrently, sub-rules process in parallel.
- D. Main rules process in parallel, sub-rules process concurrently.
- E. Main rules process sequentially, sub-rules process concurrently.

Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide - Policy Processing, when an admission event occurs, "Main rules process concurrently, sub-rules process sequentially".

Policy Processing Flow:

According to the Main Rule Advanced Options documentation:

When an admission event triggers policy evaluation:

- * Main Rules - Process concurrently/in parallel
- * All main rules are evaluated simultaneously
- * No ordering or sequencing
- * Each main rule evaluates independently
- * Sub-Rules - Process sequentially/in order
- * Sub-rules within each main rule execute one after another
- * First match wins - stops evaluating subsequent sub-rules
- * Order matters for sub-rule execution

Main Rule Concurrent Processing:

According to the documentation:

"Main rules are evaluated independently and concurrently. Multiple main rules can be processed simultaneously for the same

endpoint." Sub-Rule Sequential Processing:

According to the Defining Policy Sub-Rules documentation:

"Sub-rules are evaluated sequentially in the order defined. When an endpoint matches a sub-rule, that sub-rule's actions are taken and subsequent sub-rules are not evaluated." Example Processing:

When admission event triggers:

text

CONCURRENT (Main Rules):

Main Rule 1 evaluation # Sub-rule processing (sequential)

Main Rule 2 evaluation # Sub-rule processing (sequential)

Main Rule 3 evaluation # Sub-rule processing (sequential)

(All main rules evaluate at the same time)

Why Other Options Are Incorrect:

* B. Parallel/Concurrently - "Concurrent" and "parallel" mean the same thing; sub-rules don't process concurrently

* C. Concurrent/Parallel - Sub-rules don't process in parallel; they're sequential

* D. Sequential/Concurrently - Main rules don't process sequentially; they're concurrent

* E. Sequential/Parallel - Main rules don't process sequentially; they're concurrent Referenced Documentation:

* Main Rule Advanced Options

* Defining Policy Sub-Rules

74. Frage

.....

EchteFrage ist eine Website, die den IT-Kandidaten, die an der Forescout FSCP Zertifizierungsprüfung teilnehmen, Lernhilfe bieten, so dass sie das Forescout FSCP Zertifikat erhalten. Die Lernmaterialien von EchteFrage werden von den erfahrungsreichen Fachleuten nach ihren Erfahrungen und Kenntnissen bearbeitet. Die alle sind von guter Qualität und auch ganz schnell aktualisiert. Unsere Prüfungsfragen und Antworten sind den realen Prüfungsfragen und Antworten sehr ähnlich. Wenn Sie EchteFrage wählen, können Sie doch die schwierige Forescout FSCP Zertifizierungsprüfung, die für Ihre Karriere von großer Wichtigkeit ist, bestehen.

FSCP Simulationsfragen: <https://www.echtefrage.top/FSCP-deutsch-pruefungen.html>

Wir müssen darüber entscheiden, welche Anbieter Ihnen die neuesten Übungen von guter Qualität zur Forescout FSCP Zertifizierungsprüfung bieten und aktualisieren zu können. Der Kunstgriff ist, dass Sie haben die Prüfungsunterlagen der Forescout FSCP von unsere EchteFrage benutzt, Außerdem empfangen Sie FSCP Trainingsmaterialien per E-Mail sogleich nach dem Kauf ohne Verzögerung. Wir arbeiten bei der Bereitstellung der hohen Erfolgsquote FSCP: Forescout Certified Professional ExamGuide und ausgezeichneten zufriedenstellenden Kundenservice.

Der Dudelsack gab einen letzten zitterigen Ton von sich und Harry hörte FSCP es mit Erleichterung. Weiß, dass was Gutes aus den Leuten werden kann, auch wenn ihre Familien wie sagt man nicht so respektierlich war'n.

Reliable FSCP training materials bring you the best FSCP guide exam: Forescout Certified Professional Exam
