GAQM Certified Business Continuity Professional (CBCP) Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which type of risk is related to human error or achievement?

- A. Technical
- **B. Operational**
- C. Strategic
- D. Commercial

Answer: B

Explanation:

Operational risk is the type of risk that is related to human error or achievement. Operational risk is the uncertainty or variability of the execution or outcome of an organization's functions or processes. Operational risk can result from factors such as inadequate policies, procedures, systems, controls, skills, training, supervision, or compliance. Operational risk can affect an organization's operational efficiency, quality, safety, security, reputation, or profitability. Verified References:

NEW QUESTION # 19

Which type of continuity planning will enhance the functioning relationship with the organization's key suppliers, creating stronger assurances of continuous supply of information, material product and services?

- A. Unilateral
- B. Multilateral
- **C. Bilateral**

Answer: C

Explanation:

Explanation

Bilateral continuity planning is the type of continuity planning that will enhance the functioning relationship with the organization's key suppliers, creating stronger assurances of continuous supply of information, material product and services. Bilateral continuity planning is the process of developing and maintaining mutual agreements and arrangements between an organization and its key suppliers to ensure the continuity of their respective functions and processes in the event of a disruption. Bilateral continuity planning can help to reduce risks, costs, and dependencies, as well as to improve communication, coordination, and collaboration.

NEW QUESTION # 20

BIA stands for

- **A. Business Impact Analysis**
- B. Business Improvement Activities

- C. Business Information Availability
- D. Business Importance and Availability

Answer: A

Explanation:

Business impact analysis (BIA) is the process of identifying and prioritizing the organization's functions and processes based on their importance to the organization's objectives, and assessing the potential impacts of a disruption to those functions and processes over time. The BIA helps to determine the recovery time objectives (RTOs), recovery point objectives (RPOs), and resource requirements for each function and process, as well as the interdependencies and dependencies among them. The BIA provides the basis for developing recovery strategies and plans. Verified References: <https://www.ready.gov/business-impact-analysis>

NEW QUESTION # 21

In the event of a disaster that destroys the physical office site operations will be relocated to a temporary site.

- **A. True**
- B. False

Answer: A

Explanation:

Explanation

In the event of a disaster that destroys the physical office site operations will be relocated to a temporary site.

This is true because one of the recovery strategies for a disaster is to have an alternate site where the critical functions and processes can be resumed until the primary site is restored or replaced. The alternate site can be a pre-arranged location, such as a rented office space, a hotel, or another branch of the same organization, or a mobile facility, such as a trailer or a container. The alternate site should have the necessary equipment, systems, data, and resources to support the continuity of the business. Verified

NEW QUESTION # 22

Damage assessment includes all but which of the following steps?

- A. Estimate the time it will take to restore critical business functions.
- B. Identifying the affected business functions.
- **C. Having the insurance company declare the total extent of the damages.**
- D. Evaluating the time to restore operations and if greater than the MTD, a disaster should be declared and BCP enacted

Answer: C

Explanation:

Explanation

Damage assessment is the process of evaluating the extent and severity of the damage caused by a disruption to an organization's facilities, equipment, systems, data, records, or personnel. It includes identifying the affected business functions and processes, estimating the time it will take to restore them to normal or acceptable levels of operation, and evaluating whether the recovery time exceeds the maximum tolerable downtime (MTD) for each function or process. If so, a disaster should be declared and the business continuity plan should be activated. Having the insurance company declare the total extent of the damages is not part of the damage assessment process, as it may take longer than the MTD and may not reflect the operational impact of the damage. Verified
