- B. Agent Metrics Report

NEW QUESTION # 129

While Alex is monitoring queue reports, Sam deletes an inactive agent from the queue. Will this affect the metrics that Alex is monitoring?

- A. Yes
- B. No

Answer: B

Explanation:

No, deleting an inactive agent from the queue will not affect the metrics that Alex is monitoring in queue reports in Genesys Cloud CX Performance menu. A queue report is a report that shows various metrics and details related to queue performance and activities in Genesys Cloud CX. A queue report can help you measure and improve various aspects of your queue, such as:

Service level

Abandon rate

Average speed of answer

Average handle time

Interaction volume

Deleting an inactive agent from the queue will not affect the metrics that Alex is monitoring in queue reports because:

A queue report only counts interactions that spent time in the queue, but an agent-based report counts any interactions an agent worked with. This means that the totals in a queue report and an agent-based report may not match exactly, even if they include the same agents or queues. This is because a queue is a stand-alone entity from the perspective of Genesys Cloud CX reports, and queue metrics and agent metrics can differ for various reasons, such as:

An interaction spends time in multiple queues

An interaction abandons before an agent handles it

An agent is a member of more than one queue

An inactive agent is an agent who has not logged in to Genesys Cloud CX or has logged out. An inactive agent does not affect the metrics in queue reports because they do not contribute to various metrics and details related to queue performance and activities, such as:

Offered count

Answered count

Abandoned count

Transfer count
