

Get 100% Pass-Rate Cisco 300-710 Pass4sure Exam Prep and Pass-Sure Pass Guarantee

What's more, part of that FreeDumps 300-710 dumps now are free: https://drive.google.com/open?id=1BAFavUBqDvW5s_KxYrqzkMXdF-OUxK-G

Provided you get the certificate this time with our 300-710 training guide, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so 300-710 Learning Materials may bring underlying influences with positive effects. The promotion or acceptance of our 300-710 exam questions will be easy. So it is quite rewarding investment.

As is known to us, there are three different versions about our 300-710 guide torrent, including the PDF version, the online version and the software version. The experts from our company designed the three different versions of 300-710 test torrent with different functions. According to the different function of the three versions, you have the chance to choose the most suitable version of our 300-710 study torrent. For instance, if you want to print the 300-710 study materials, you can download the PDF version which supports printing. By the PDF version, you can print the 300-710 guide torrent which is useful for you.

Pass 300-710 Guarantee | Latest Braindumps 300-710 Ebook

Rather than pretentious help for customers, our after-sales services on our 300-710 exam questions are authentic and faithful. Many clients cannot stop praising us in this aspect and become regular customer for good on our 300-710 Study Guide. We have strict criterion to help you with the standard of our 300-710 training materials. Our company has also being Customer First. So we consider the facts of your interest firstly.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q140-Q145):

NEW QUESTION # 140

An administrator is working on a migration from Cisco ASA to the Cisco FTD appliance and needs to test the rules without disrupting the traffic. Which policy type should be used to configure the ASA rules during this phase of the migration?

- A. Intrusion
- B. Access Control
- C. identity
- D. Prefilter

Answer: B

Explanation:

Reference:

<https://www.cisco.com/c/en/us/td/docs/security/firepower/migration-tool/migration-guide/ASA2FTD-with-FP-M>

NEW QUESTION # 141

An administrator configures a Cisco Secure Firewall Threat Defense device in transparent mode. To configure the BVI (Bridge Virtual Interface), the administrator must:

Add a bridge-group interface

Configure a bridge-group ID

Configure the bridge-group interface description

Add bridge-group member interfaces

How must the engineer perform these actions?

- A. Configure a name for the bridge-group interface
- B. Set the bridge-group interface mode to transparent
- C. Set a security zone for the bridge-group interface
- **D. Configure an IP address for the bridge-group interface**

Answer: D

NEW QUESTION # 142

When deploying a Cisco ASA Firepower module, an organization wants to evaluate the contents of the traffic without affecting the network. It is currently configured to have more than one instance of the same device on the physical appliance. Which deployment mode meets the needs of the organization?

- A. passive tap monitor-only mode
- B. passive monitor-only mode
- C. inline mode
- **D. inline tap monitor-only mode**

Answer: D

Explanation:

<https://www.cisco.com/c/en/us/td/docs/security/asa/asa910/configuration/firewall/asa-910-firewall-config/access-sfr.html>

Inline tap monitor-only mode (ASA inline)-In an inline tap monitor-only deployment, a copy of the traffic is sent to the ASA FirePOWER module, but it is not returned to the ASA. Inline tap mode lets you see what the ASA FirePOWER module would have done to traffic, and lets you evaluate the content of the traffic, without impacting the network. However, in this mode, the ASA does apply its policies to the traffic, so traffic can be dropped due to access rules, TCP normalization, and so forth.

NEW QUESTION # 143

Which command should be used on the Cisco FTD CLI to capture all the packets that hit an interface?

- A. capture
- **B. capture-traffic**
- C. capture WORD
- D. configure coredump packet-engine enable

Answer: B

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/command_ref/b_Command_Reference_for_Firepower_Threat_Defense/ac_1.html

NEW QUESTION # 144

An administrator is configuring their transparent Cisco FTD device to receive ERSPAN traffic from multiple switches on a passive port, but the Cisco FTD is not processing the traffic. What is the problem?

- A. The Cisco FTD must be configured with an ERSPAN port not a passive port.
- **B. The Cisco FTD must be in routed mode to process ERSPAN traffic.**
- C. The switches do not have Layer 3 connectivity to the FTD device for GRE traffic transmission.
- D. The switches were not set up with a monitor session ID that matches the flow ID defined on the Cisco FTD.

Answer: B
