APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which action is a required response to an identified residual risk?

- A. The organization shall change practices to avoid the risk occurring
- **B. It shall be reviewed by the risk owner to consider acceptance**
- C. By default, it shall be controlled by information security awareness and training
- D. Top management shall delegate its treatment to risk owners

Answer: B

Explanation:

Clause 6.1.3 (e) specifies:

"The organization shall obtain risk owners' approval of the information security risk treatment plan and acceptance of the residual information security risks." This confirms that residual risks - those remaining after risk treatment - must be reviewed and formally accepted by the designated risk owner. Option A is incorrect; awareness training is not a default control for all residual risks. Option B misrepresents leadership responsibility; top management ensures processes exist, but risk owners formally approve residual risk. Option D (avoiding risk) is a treatment option, not the mandated requirement for residual risks.

Thus, the required response is C: Review and acceptance by the risk owner.

NEW QUESTION # 15

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- **A. evaluate the effectiveness of**
- B. communicate
- C. improve the effectiveness of
- D. apply competent resources to

Answer: A

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

NEW QUESTION # 16

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- **A. ISO/IEC 27013**
- B. None of the above
- C. ISO/IEC 27003
- D. ISO 9001

Answer: A

Explanation:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

NEW QUESTION # 17

Which item is required to be included in an information security policy?

- A. A framework enabling concerns with the information security policy to be addressed
- **B. A commitment to satisfy applicable requirements related to information security**
- C. A Statement of Applicability which defines the necessary controls to be implemented
- D. A plan for the continual improvement of the information security management system

Answer: B

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- * "includes information security objectives (or provides a framework for setting them)"
- * "includes a commitment to satisfy applicable requirements related to information security"
- * "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer is A.

NEW QUESTION # 18

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO/IEC 27001?

- **A. To evaluate information security performance**
- B. To track the use of outsourced processes
- C. To ensure that employees and contractors are competent
- D. To monitor the use of information assets

Answer: A

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.
