Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

FortiGate is operating in NAT mode and has two physical interfaces connected to the LAN and DMZ networks respectively. Which two statements about the requirements of connected physical interfaces on FortiGate are true? (Choose two.)

- A. Both interfaces must have IP addresses assigned.
- B. Both interfaces must have directly connected routes on the routing table.
- C. Both interfaces must have DHCP enabled and interfaces set to LAN and DMZ roles assigned.
- D. Both interfaces must have the interface role assigned.

Answer: A,B

Explanation:

Interfaces must have directly connected routes in the routing table to forward traffic correctly.

Interfaces must have IP addresses assigned to communicate within their respective networks.

NEW QUESTION # 41

Refer to the exhibits.

Network diagram

NAT IP pool configuration

Name	External IP Range	Type	ARP Reply
SNAT-Pool	100.65.0.49 - 100.65.0.49	Overload	Enabled
SNAT-Remote	100.65.0.149 - 100.65.0.149	Overload	Enabled
SNAT-Remote1	100.65.0.99 - 100.65.0.99	Overload	Enabled

Firewall policies

Policy	Source	Destination	Schedule	Service	Action	IP Pool	NAT
LAN (port4) → WAN (port2) 3							
TCP traffic (2)	all	BR1-FGT	always	ALL_TCP	ACCEPT	SNAT-Pool	NAT
PING traffic (3)	all	all	always	PING	ACCEPT	SNAT-Remote1	NAT
IGMP traffic (4)	all	all	always	IGMP	ACCEPT	SNAT-Remote	NAT

The exhibits show a diagram of a FortiGate device connected to the network, as well as the IP pool configuration and firewall policy objects.

The WAN (port2) interface has the IP address 100.65.0.101/24.

The LAN (port4) interface has the IP address 10.0.11.254/24.

Which IP address will be used to source NAT (SNAT) the traffic, if the user on HQ-PC-1 (10.0.11.50) pings the IP address of BR-FGT (100.65.1.111)

- A. 100.65.0.149
- B. 100.65.0.99
- C. 100.65.0.101
- D. 100.65.0.49

Answer: B

Explanation:

The ping traffic policy uses the IP pool named SNAT-Remote1, which has the external IP range 100.65.0.99. Therefore, traffic matching this policy (ping from HQ-PC-1 to BR1-FGT) will use 100.65.0.99 for source NAT.

NEW QUESTION # 42

When configuring a FortiGate in a multi-WAN setup, why would an administrator enable session preservation on an interface?

- A. To make sure all sessions without source NAT enabled always use the primary WAN link
- B. To allow the FortiGate to dynamically change interfaces for all active sessions when a WAN link fails
- C. To improve security by forcing users to authenticate again when the WAN link changes
- D. To ensure that existing SSL VPN connections remain on the same interface even if route changes occur

Answer: D

Explanation:

Session preservation keeps active sessions, such as SSL VPNs, tied to the original interface to prevent disruption when WAN routes change.

NEW QUESTION # 43

A FortiGate firewall policy is configured with active authentication, however, the user cannot authenticate when accessing a website. Which protocol must FortiGate allow even though the user cannot authenticate?

- A. DNS
- B. TACASC+
- C. Kerberos
- D. LDAP

Answer: A

Explanation:

DNS traffic must be allowed so the user can resolve domain names and reach the authentication server or web resources, even if authentication initially fails.

NEW QUESTION # 44

Refer to the exhibit.

```
config system global
    set av-failopen one-shot
end
config ips global
    set fail-open enable
end
```

Based on this partial configuration, what are the two possible outcomes when FortiGate enters conserve mode? (Choose two.)

- A. Administrators cannot change the configuration.
- B. Administrators must restart FortiGate to allow new session.
- C. FortiGate drops new sessions requiring inspection.
- D. FortiGate skips quarantine actions.

Answer: C,D

Explanation:

In fail-open mode, FortiGate skips quarantine actions to maintain traffic flow despite IPS or antivirus failures.

FortiGate drops new sessions that require inspection when in conserve mode and fail-open is enabled, to protect the network from potentially harmful traffic.
