TOP FCP_FMGI-AD-7.4 Pdf Pass Leader 100% Pass | High-quality New FCP - FortiManager 7.4 Administrator Test Braindumps Pass for sure

It has a lot of advantages. Giving yourself more time to prepare for the Fortinet FCP_FMGI-AD-7.4 exam questions using it will allow you to obtain your FCP_FMGI-AD-7.4 certification. It is one of the major reasons many people prefer buying FCP - FortiManager 7.4 Administrator FCP_FMGI-AD-7.4 Exam Dumps preparation material. It was designed by the best Fortinet Exam Questions who took the time to prepare it.

Fortinet FCP_FMGI-AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 2	<ul style="list-style-type: none">• Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
Topic 3	<ul style="list-style-type: none">• Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
Topic 4	<ul style="list-style-type: none">• Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.

Topic 5

- Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which statement about the upgrade of ADOMs on FortiManager is true?

- A. To ensure database consistency, you must upgrade an ADOM before you upgrade the devices in it.
- B. Upgrading the FortiManager version upgrades all existing ADOMs automatically.
- C. ADOMs using global objects can be upgraded before or after upgrading the global database ADOM.
- D. You cannot import policies from a device until its FortiOS version matches the ADOM version.

Answer: D

NEW QUESTION # 11

Refer to the exhibit.

The screenshot shows the FortiManager interface. At the top, there are buttons for 'Add Device', 'Device Group', and 'Install Wizard'. Below the header, a search bar and a 'Managed FortiGate (4)' button are visible. The main area displays a summary card with a green circle containing the number '2' and the text 'Devices'. To the left of the summary card is a list of managed devices:

- Managed FortiGate (4):
 - ISFW (3):
 - root
 - Student
 - Trainer
 - Local-FortiGate
- Managed FortiAnalyzer (1):
 - FAZVM64-KVM

Below the list are buttons for 'Edit', 'Delete', and 'Import Configuration'. To the right of the summary card is a table with columns for 'Device Name' and 'Status'. The table lists:

- ISFW (Status: Training)
- root [NAT] (Management)
- Student [NAT]
- Trainer [NAT]
- Local-FortiGate

FortiManager policy package

The screenshot shows the FortiManager interface with a 'Policy Package' tab selected. Other tabs include 'Install Wizard' and 'ADOM Revisions'. Below the tabs is a search bar and a table with 'Edit' and 'Delete' buttons. The table lists policy packages, but the details are partially obscured by a large watermark.

FortiManager policy package

#	Name	Install On	From	To
1	Ping_Access	ISFW (root) ISFW (Student)	<input type="checkbox"/> port3	<input type="checkbox"/> port1
2	Web	Local-FortiGate (root) ISFW (Student)	<input type="checkbox"/> port3	<input type="checkbox"/> port1
3	Source_Device	<input checked="" type="radio"/> Installation Targets	<input type="checkbox"/> port3	<input type="checkbox"/> port1
4	Implicit (4/4 Total:1)	<input checked="" type="radio"/> Installation Targets	any	any

Given the configuration shown in the exhibit, which two conclusions can you draw from the installation targets in the Install On column? (Choose two.)

- A. Policy seq.# 3 will be skipped because no installation targets are specified.
- B. Policy seq.# 2 will not be installed on the Local-FortiGate root VDOM because there is no root VDOM in the Installation Target
- C. Policy seq.# 1 will be installed on the ISFW device root[NAT] and Student[NAT] VDOMs only.
- D. Policy seq.3 will be installed on all managed devices and VDOMs that are listed under Installation Targets

Answer: C,D

NEW QUESTION # 12

An administrator wants to create a policy on an ADOM that is in backup mode and install it on a FortiGate device in the same ADOM. How can the administrator perform this task?

- A. The administrator must use a FortiManager script.
- B. The administrator must change the ADOM mode to Advanced to bring the FortiManager online.
- C. The administrator must use the Policy & Objects section to create a policy first.
- D. The administrator must disable the FortiManager offline mode first.

Answer: A

Explanation:

To create and install a policy on a FortiGate device in an ADOM (Administrative Domain) that is in backup mode, the administrator must use a FortiManager script. This is because backup mode restricts direct configuration changes, and scripts can be used to push specific configuration changes without altering the ADOM mode.

Options A, C, and D are incorrect because:

- * A requires the ADOM to be in normal or advanced mode to create policies directly in the Policy & Objects section.
- * C suggests disabling offline mode, which is irrelevant to the backup mode configuration.
- * D implies changing the ADOM mode, which is unnecessary if using a script to perform the task.

FortiManager References:

* Refer to FortiManager 7.4 Administrator Guide: Working with ADOMs and Using Scripts for managing policies in backup mode.

NEW QUESTION # 13

An administrator, Trainer, who is assigned the Super_User profile, is trying to approve a workflow session that was submitted by another administrator, Student. However, Trainer is unable to approve the workflow session.

What can prevent an admin account that has Super_User rights over the device from approving a workflow session?

- A. Trainer must close Student's workflow session before approving the request.
- B. Trainer must first create their own workflow session to approve student session.
- **C. Trainer is not a part of workflow approval group.**
- D. Trainer does not have full rights over this ADOM.

Answer: C

Explanation:

An administrator must be part of an approval group, and have rights over the ADOM in which the session was created.

NEW QUESTION # 14

Refer to the exhibit.

Which two results occur if the script is run using the Device Database option? (Choose two.)

- **A. You must install these changes on a managed device using the Install Wizard.**
- **B. The device Config Status is tagged as Modified.**
- C. The successful execution of a script on the Device Database creates a new revision history.
- D. The script history shows successful installation of the script on the remote FortiGate device.

Answer: A,B

Explanation:

If the script is run using the "Device Database" option on FortiManager, the following occurs:

- * A. You must install these changes on a managed device using the Install Wizard.
- * Running the script on the Device Database updates only the configuration in the FortiManager's database, not on the actual FortiGate device. To apply the changes, you need to use the Install Wizard to push these configurations to the managed device.
- * D. The device Config Status is tagged as Modified.
- * After running the script on the Device Database, FortiManager tags the device's configuration status as "Modified," indicating that there are pending changes that have not yet been installed on the device.

Options B and C are incorrect because:

- * Bsuggests a new revision history is created, but this only happens when changes are actually installed on the managed device.
- * Cimplies the script is directly executed on the FortiGate, which is not the case when using the Device Database option.

FortiManager References:

- * Refer to FortiManager 7.4 Administrator Guide: Scripting and Configuration Management.

NEW QUESTION # 15

.....

iPassleader is a trusted and reliable platform that has been helping FCP - FortiManager 7.4 Administrator (FCP_FMIG_AD-7.4) exam candidates for many years. Over this long time period countless Fortinet FCP_FMIG_AD-7.4 exam questions candidates have passed their dream FCP_FMIG_AD-7.4 Certification Exam. They all got help from iPassleader Fortinet Exam Questions and easily passed their challenging FCP_FMIG_AD-7.4 pdf exam
