Valid 1z0-591 Dumps & Valid 1z0-591 Test Guide

Our key priority is to provide such authentic Oracle 1z0-591 Exam Material which helps the candidate qualify for Oracle Business Intelligence Foundation Suite 11g Essentials 1z0-591 exam on the very first attempt. This means that you can download the product right after purchasing and start your journey toward your big career.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q117-Q122):

NEW QUESTION # 117

Which of the following characteristics pertain to a "ragged" hierarchy?

- A. It can only be stored in an XML structure.
- B. It creates multiple levels of hierarchy in the database table.
- C. A branch of the hierarchy may have a different number of levels than other branches.
- D. All values can have a maximum of six levels.

Answer: C

Explanation:

Explanation/Reference:

Ragged Hierarchies are hierarchies where some routes down the hierarchy are longer than others; for example, you may have an organizational hierarchy for salespeople where the overall boss has two assistant managers, one of them works on their own and another has three sales managers under them; some of those sales manager may have sales staff under them, and some sales staff may have trainees under them.

NEW QUESTION # 118

How do you get the BI plug-in for MS Office?

- A. By downloading it from Microsoft Server
- B. By contacting the administrator
- C. By downloading it from the Database Server
- D. By downloading it from the BI Server

Answer: D

Explanation:

Download and installation of the client

The client install executable is available for download from the More Products menu in Oracle BI Interactive Dashboards and Oracle BI Answers.

See picture below.

NEW QUESTION # 119

If you have a database with four aggregate tables, how should the repository be configured to take advantage of the aggregates?

- A. By creating four new logical table sources and using the "where" section of the Content tab to specify the aggregation levels
- B. By creating four new logical table sources and choosing each dimension's level of aggregation in the Content tab
- C. By creating four new logical table sources and using the Fragmentation content to specify the aggregation levels
- D. By creating four new logical tables sources

Answer: B

Explanation:

Content Tab

Aggregation Content

You can define the aggregation (ie the group by) of:

by hierarchy level by logical column It helps you to define an aggregate navigation

http://gerardnico.com/wiki/media/dat/obiec/bi_server/design/fact_table/obiec_fragmentation_content_one_column.jpg?w=432

Note: logical table source

Logical table sources define the mappings from a single logical table to one or more physical tables. A logical table contains one or more logical table source. The mapping between physical columns and logical columns are done in this element.

The definition of the logical table source is used:

The Content tab of the Logical Table Source is used to define :

NEW QUESTION # 120

When creating Aggregate tables in the OBI repository by using the Aggregate Persistence Wizard, which two statements are true?

- A. The Extraction Transformation and Loading process creates the aggregate tables.
- B. The analyst must first write DML (Data Manipulation Language) scripts to create the aggregate table.
- C. The Aggregate Persistence Wizard enables you to automate the creation of physical aggregate tables and their corresponding objects in the repository.
- D. Job Manager can be used to run the Aggregate Persistence script.

Answer: C,D

Explanation:

Explanation

B: The Aggregate Persistence Wizard automates the creation and initial population of aggregates, persists them in a back-end database and configures the BI Server metadata layer so that they're used when appropriate.

C: The wizard then shows me a preview of the script it's going to generate, and asks me if I want to create any more summaries. Here's how the preview script looks - note that it's not SQL, it's a script language that the BI Server understands and uses as the specification for an aggregation job, which it then turns into separate CREATE TABLE, INSERT ... SELECT and so on SQL statements, "optimized" for the particular back-end database platform.

Script example:

```
"ag_Items"
```

```
for "Seminar - Complete"."Items"("Quantity")
```

```
at levels ("Seminar - Complete"."Customerdim"."State", "Seminar - Complete"."Productdim"."Category",
```

```
"Seminar - Complete"."Timedim"."Year")
```

```
using connection pool "custdw"."CUSTDW_Pool"
```

```
in "custdw".. "CUSTDW";
```

NEW QUESTION # 121

Content that is saved in personal and shared folders can be browsed by using which view?

- A. Catalog

- B. Favorites
- C. Home
- D. Dashboard
- E. New -> Analysis

Answer: A

Explanation:

Explanation/Reference:

The Catalog Manager workspace enables you to view and work with catalog objects. It displays the following folders for an open catalog:

The shared folder- Contains content that is shared among catalog users. This includes the preconfigured dashboards and analyses that are distributed with prebuilt applications, and other objects such as shared filters.

The system folder - Contains administrative elements of Presentation Services. Some of these elements are distributed with the product, and others are configured by you as the administrator, such as privileges. Avoid modifying any files in this folder.

Presentation Services uses these files internally and modifying them might cause unexpected results.

The users folder - Contains content that catalog users with the appropriate permissions have saved to their personal folders, such as individual analyses.
