## Exam SPLK-1002 Score, Latest SPLK-1002 Exam Questions

The Splunk SPLK-1002 Certification Exam is one of the valuable credentials that are designed to prove an Splunk aspirant's technical expertise. With the Splunk Core Certified Power User Exam (SPLK-1002) certificate they can be competitive and updated in the highly competitive market. The Splunk Certification Questions offers a great opportunity for beginners and experienced professionals to not only validate their skills but also advance their careers.

# Splunk Core Certified Power User Exam Sample Questions (Q203-Q208):

**NEW QUESTION # 203**
Which of the following statements describe calculated fields? (select all that apply)

- A. Calculated fields can be used in the search bar.
- B. Calculated fields can be based on an extracted field.
- C. Calculated fields are shortcuts for performing calculations using the eval command.
- D. Calculated fields can only be applied to host and sourcetype.

**Answer: B,C**

**NEW QUESTION # 204**
When you mouse over and click to add a search term this (thesE. Boolean operator(s) is(arE. not implied. (Select all that apply).

- A. NOT
- B. AND
- C. ( )
- D. OR

**Answer: A,C,D**

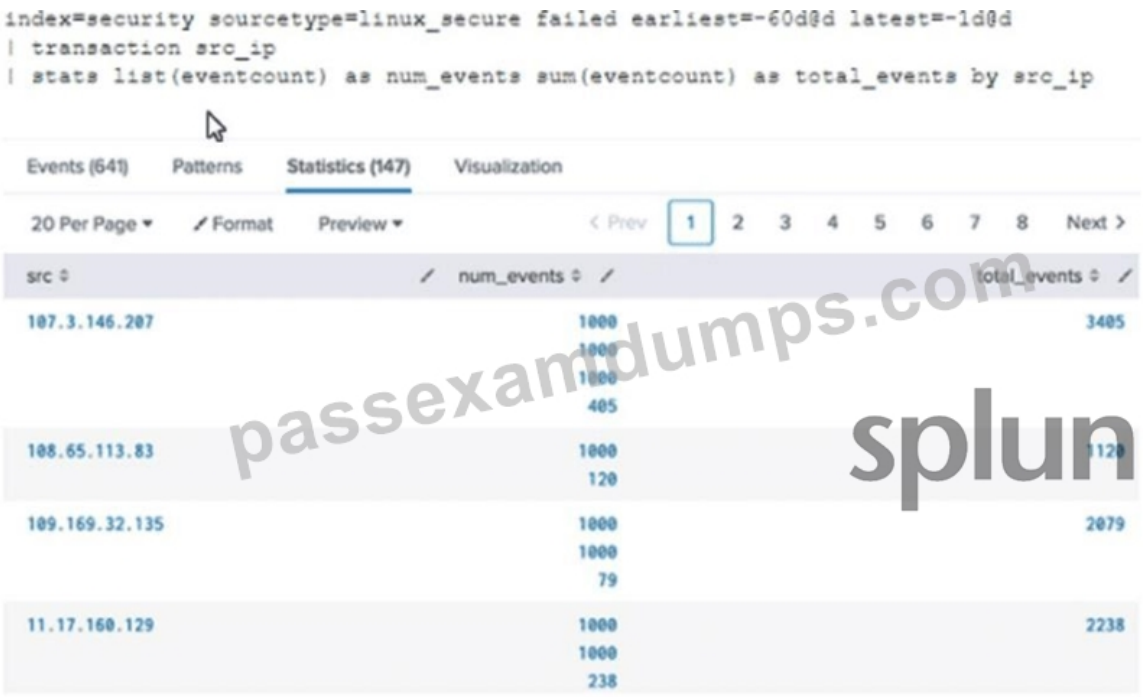
Explanation:
When you mouse over and click to add a search term from the Fields sidebar or from an event in your search results, Splunk automatically adds the term to your search string with an implied AND operator2. However, this does not apply to some Boolean operators such as OR, NOT and parentheses (). These operators are not implied when you add a search term and you have to type them manually if you want to use them in your search string2. Therefore, options A, B and D are correct, while option C is incorrect because AND is implied when you add a search term.

**NEW QUESTION # 205**
Splunk Components:
Which of the following are responsible for parsing incoming data and storing data on disc?

- A. forwarders
- B. indexers
- C. search heads

**Answer: B**

**NEW QUESTION # 206**
Why would the following search produce multiple transactions instead of one?



- A. The maxspan option is not included.
- B. The stats list () function is used.
- C. The transaction and commands cannot be used together.
- D. The transaction command has a limit of 1000 events per transaction.

**Answer: A**

Explanation:
In Splunk, the transaction command is used to group events that share common characteristics into a single transaction1. By default, the transaction command groups all matching events into a single transaction1.
However, you can use the maxspan option to limit the time span of the transactions1. If the time span between the first and last event in a transaction exceeds the maxspan value, the transaction command will start a new transaction1.
Therefore, if the maxspan option is not included in the search, the transaction command might produce multiple transactions instead of one if the time span between the first and last event in a transaction exceeds the default maxspan value1.
Here is an example of how you can use the maxspan option in a search:
index=main sourcetype=access_combined | transaction someuniqefield maxspan=1h In this search, the transaction command groups events that share the same someuniqefield value into a single transaction, but only if the time span between the first and last event in the transaction does not exceed 1 hour1. If the time span exceeds 1 hour, the transaction command will start a new transaction1.

**NEW QUESTION # 207**
What are the two parts of a root event dataset?

- A. Constraints and lookups.
- B. Constraints and fields.
- C. Fields and variables.
- D. Fields and attributes.

**Answer: B**

Explanation:
Reference: https://docs.splunk.com/Documentation/SplunkLight/7.3.5/GettingStarted/Designdatamodelobjects A root event dataset is the base dataset for a data model that defines the source or sources of the data and the constraints and fields that apply to the data1. A root event dataset has two parts: constraints and fields1. Constraints are filters that limit the data to a specific index, source, sourcetype, host or search string1. Fields are the attributes that describe the data and can be extracted, calculated or looked up1. Therefore, option C is correct, while options A, B and D are incorrect.

**NEW QUESTION # 208**
.....

Therefore, you have the option to use Splunk SPLK-1002 PDF questions anywhere and anytime. PassExamDumps Splunk Core Certified Power User Exam (SPLK-1002) dumps are designed according to the Splunk SPLK-1002 certification exam standard and have hundreds of questions similar to the actual Splunk Core Certified Power User Exam (SPLK-1002) exam. Splunk Core Certified Power User Exam (SPLK-1002) web-based practice exam software also works without installation.
