

Get free updates with Confluent CCAAK PDF Dumps

P.S. Free & New CCAAK dumps are available on Google Drive shared by Free4Torrent: <https://drive.google.com/open?id=17-sRy7HctL9Rc9f4iIaoYding9oon75r>

Maybe you are still having trouble with the Confluent CCAAK exam; maybe you still don't know how to choose the CCAAK exam materials; maybe you are still hesitant. But now, your search is ended as you have got to the right place where you can catch the finest CCAAK exam materials. Here you can answer your doubts; you can easily pass the exam on your first attempt. All applicants who are working on the CCAAK exam are expected to achieve their goals, but there are many ways to prepare for exam. Everyone may have their own way to discover. Some candidates may like to accept the help of their friends or mentors, and some candidates may only rely on some CCAAK books. But none of these ways are more effective than our CCAAK exam material. In summary, choose our exam materials will be the best method to defeat the exam.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.
Topic 2	• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.
Topic 3	• Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.

Composite Test Confluent CCAAK Price | Latest CCAAK Practice Questions

The Free4Torrent Confluent Certified Administrator for Apache Kafka (CCAAK) exam dumps are being offered in three different formats. The names of these formats are CCAAK PDF questions file, desktop practice test software, and web-based practice test software. All these three Confluent Certified Administrator for Apache Kafka in CCAAK Exam Dumps formats contain the real Confluent CCAAK exam questions that will help you to streamline the CCAAK exam preparation process.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q51-Q56):

NEW QUESTION # 51

An employee in the reporting department needs assistance because their data feed is slowing down. You start by quickly checking the consumer lag for the clients on the data stream.

Which command will allow you to quickly check for lag on the consumers?

- A. bin/kafka-reassign-partitions.sh
- **B. bin/kafka-consumer-groups.sh**
- C. bin/kafka-consumer-group-throughput.sh
- D. bin/kafka-consumer-lag.sh

Answer: B

Explanation:

The kafka-consumer-groups.sh script is used to inspect consumer group details, including consumer lag, which indicates how far behind a consumer is from the latest data in the partition.

The typical usage is bin/kafka-consumer-groups.sh --bootstrap-server <broker> --describe --group <group_id>

NEW QUESTION # 52

You have an existing topic t1 that you want to delete because there are no more producers writing to it or consumers reading from it. What is the recommended way to delete the topic?

- A. Delete the offsets for that topic from the consumer offsets topic.
- B. Delete the log files and their corresponding index files from the leader broker.
- C. The consumer should send a message with a 'null' key.
- **D. If topic deletion is enabled on the brokers, delete the topic using Kafka command line tools.**

Answer: D

Explanation:

The recommended and safe method to delete a topic is to use the Kafka CLI tool kafka-topics.sh --delete command, provided that delete.topic.enable=true is set on the brokers.

NEW QUESTION # 53

Which use cases would benefit most from continuous event stream processing? (Choose three.)

- **A. Fraud detection**
- B. End-of-day financial settlement processing
- **C. Context-aware product recommendations for e-commerce**
- **D. Log monitoring/application fault detection**
- E. Historical dashboards

Answer: A,C,D

Explanation:

Real-time analysis of transactions helps detect suspicious activity instantly.

Context-aware product recommendations for e-commerce requires real-time user behavior tracking to serve personalized recommendations.

Log monitoring/application fault detection needs immediate processing to alert on system issues or failures.

NEW QUESTION # 54

A developer is working for a company with internal best practices that dictate that there is no single point of failure for all data stored.

What is the best approach to make sure the developer is complying with this best practice when creating Kafka topics?

- A. Use the parameter --partitions=3 when creating the topic.
- B. Make sure the topics are created with linger.ms=0 so data is written immediately and not held in batch.
- **C. Set the topic replication factor to 3.**
- D. Set 'min.insync.replicas' to 1.

Answer: C

Explanation:

Replication factor determines how many copies of each partition exist across different brokers. A replication factor of 3 ensures that even if one or two brokers fail, the data is still available, thus eliminating a single point of failure.

NEW QUESTION # 55

Kafka broker supports which Simple Authentication and Security Layer (SASL) mechanisms for authentication? (Choose three.)

- A. SASL/SAML20
- B. SASL/OAUTHBEARER
- C. SASL/PLAIN
- D. SASL/GSSAPI (Kerberos)
- E. SASL/OTP

Answer: B,C,D

Explanation:

SASL/PLAIN - A simple username/password mechanism supported by Kafka.

SASL/GSSAPI (Kerberos) - Kafka supports Kerberos authentication through the GSSAPI mechanism.

SASL/OAUTHBEARER - Kafka supports OAUTHBEARER for token-based authentication.

NEW QUESTION # 56
