

Get Help from Real TrainingQuiz Supermicro SMI300XS PDF Questions

P.S. Free & New SMI300XS dumps are available on Google Drive shared by TrainingQuiz: <https://drive.google.com/open?id=1Z1gJhAsAaXgFdEQhejZr0gVSINEX5FSY>

Candidates who want to be satisfied with the Supermicro MI300X GPU Service Specialist (SMI300XS) Exam (SMI300XS) preparation material before buying can try a free demo. Customers who choose this platform to prepare for the Supermicro MI300X GPU Service Specialist (SMI300XS) Exam (SMI300XS) exam require a high level of satisfaction. For this reason, TrainingQuiz has a support team that works around the clock to help SMI300XS applicants find answers to their concerns.

The exercises and answers of our SMI300XS exam questions are designed by our experts to perfectly answer the puzzles you may encounter in preparing for the exam and save you valuable time. Take a look at SMI300XS preparation exam, and maybe you'll find that's exactly what you've always wanted. You can free download the demos which present a small part of the SMI300XS Learning Engine, and have a look at the good quality of it.

SMI300XS Exam Study Guide - SMI300XS Test Practice

TrainingQuiz is intent on keeping up with the latest technologies and applying them to the exam questions and answers not only on the content but also on the displays. That is why our pass rate is high as 98% to 100%. The data are unique-particular in this career. With our SMI300XS study torrent, you can enjoy the leisure study experience as well as pass the SMI300XS Exam with success ensured. For the content of our SMI300XS preparation materials is simplified by our professional experts and the displays are designed effectually. Just try and enjoy it!

Supermicro MI300X GPU Service Specialist (SMI300XS) Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

Exhibit:

When installing the midplane bracket back into the chassis, what design feature in the chassis helps you properly align the midplane bracket?

- A. Velcro in the chassis
- B. Guide stickers in the chassis
- C. Grooves in the chassis
- D. Arrows in the chassis

Answer: C

Explanation:

Why Do Supermicro Systems Use Grooves for Alignment?

In Supermicro MI300X systems, the midplane bracket is aligned using built-in grooves in the chassis.

- * Ensures Perfect Alignment
- * The midplane must line up perfectly with power, PCIe, and data connections.
- * Grooves act as physical guides, ensuring precise placement without guesswork.
- * Prevents Installation Errors
- * Without grooves, technicians might install the midplane slightly misaligned, leading to connection failures.
- * Ensures PCIe and MCIO lanes align correctly, preventing signal loss.
- * Supports a Tool-Free Installation
- * Grooves allow drop-in installation, reducing manual adjustments.
- * Minimizes risk of flexing or damaging the midplane PCB.

Why Other Options Are Incorrect?

- * A (Guide stickers in the chassis) # Stickers may be present for labeling but do not physically align the midplane.
- * C (Arrows in the chassis) # Arrows are visual indicators only, not physical alignment tools.
- * D (Velcro in the chassis) # Velcro is not used in midplane installation.

Official Documentation Reference:

- * Supermicro AS-8125GS-TNMR2 Hardware Guide explicitly states that grooves in the chassis help with midplane bracket alignment.

NEW QUESTION # 18

When lowering the midplane bracket back into the chassis, what should you make sure to do with all the cables?

- A. Move only the I2C cable out of the way as you lower the bracket.
- B. Move only the power cable out of the way as you lower the bracket.
- C. Move all the cables out of the way as you lower the bracket.
- D. Move only the ribbon cable out of the way as you lower the bracket.

Answer: C

Explanation:

Why Must All Cables Be Moved Out of the Way?

The midplane bracket in Supermicro MI300X GPU systems houses multiple power and data connections.

If cables are not moved out of the way before lowering the bracket, the following issues can occur:

- * Cable Pinching or Crushing
- * If cables are trapped beneath the midplane, their insulation can get damaged, leading to potential short circuits or power failures.
- * Improper Connector Alignment
- * Misplaced cables may obstruct connector seating, preventing MCIO, PCIe, or NVMe connections from fully engaging.
- * Potential Performance Issues
- * If data cables are twisted or bent sharply, signal integrity issues may arise, causing intermittent connectivity failures.

Step-by-Step Safe Midplane Installation:

#Step 1: Identify all power and data cables before lowering the midplane bracket. #Step 2: Move all cables out of the way and neatly route them along their designated pathways. #Step 3: Slowly lower the midplane bracket into position, ensuring cables remain free from obstruction. #Step 4: Check that all connectors are accessible and that no cables are trapped under the bracket.

Why Other Options Are Incorrect?

- * A (Only move the ribbon cable) # Other cables may still be in the way, risking damage.
- * B (Only move the power cable) # Power cables are important, but data cables must also be repositioned.
- * C (Only move the I2C cable) # The I2C cable alone is not enough; all cables need clearance.

Official Documentation Reference:

* Supermicro AS-8125GS-TNMR2 Service Manual specifies that all cables must be moved before lowering the midplane bracket to avoid obstruction and damage.

NEW QUESTION # 19

The SKU for the NVMe backplane is BPN-NVME5-HS219N-S24. True or False?

- A. False
- B. True

Answer: A

Explanation:

- * The SKU (Stock Keeping Unit) for Supermicro NVMe backplanes varies depending on the specific model and system configuration.
- * The correct SKU for the NVMe backplane used in the Supermicro MI300X system differs from the given part number.
- * Referencing official Supermicro product sheets and service manuals, the BPN-NVME5-HS219N-S24 does not match the correct SKU for this system.

Official Documentation Reference:

* Supermicro NVMe Storage System Compatibility Guide lists the correct SKU for MI300X GPU systems, confirming that the given SKU is incorrect.

NEW QUESTION # 20

Exhibit:

There is a flap door over the ribbon cable connection. To open it, use your finger to press down on the top of the flap door and pop it open. True or False?

- A. False
- B. True

Answer: B

Explanation:

The flap door mechanism is a protective feature in Supermicro MI300X systems designed to secure ribbon cable connections. How to open it correctly?

- * Press down on the top of the flap door# This disengages the locking mechanism.
- * The flap door will "pop open" safely without damaging the ribbon cable.
- * Forcing the flap without pressing down properly may break the connector.

Official Documentation Reference:

- * Supermicro AS-8125GS-TNMR2 Maintenance Manual provides specific instructions on pressing down the flap door before opening it.

NEW QUESTION # 21

What equipment is required in order to remove the heatsink from the motherboard tray?

- A. T30 Torx bit
- B. T40 Torx bit
- C. T20 Torx bit
- D. PH2 Phillips screwdriver

Answer: A

Explanation:

To remove the heatsink from the motherboard tray, a T30 Torx bit is required. This tool ensures proper torque application and prevents damage to both the heatsink and the motherboard.

Why a T30 Torx bit is necessary?

- * Supermicro MI300X GPU systems use precision heatsink retention mechanisms.
- * The heatsink screws are secured with factory torque settings and require a T30 Torx bit for safe removal.
- * Using an incorrect tool (Phillips screwdriver, T20, or T40) can strip the screw heads, making it difficult to remove the heatsink.

without causing damage.

Incorrect Answers Explained:

* A (PH2 Phillips screwdriver) # Not strong enough for heatsink screws, which require high torque for proper seating.

* C (T20 Torx bit) # Too small, risks stripping the screws.

* D (T40 Torx bit) # Too large, does not fit the heatsink screws.

Official Documentation Reference:

* Supermicro MI300X Service Manual specifies that a T30 Torx bit must be used to remove the heatsink without damaging the motherboard.

NEW QUESTION # 22

.....

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess, who engage themselves in the research and development of our SMI300XS learning guide for many years. We here promise you that our SMI300XS certification material is the best in the market, which can definitely exert positive effect on your study. Our Supermicro MI300X GPU Service Specialist (SMI300XS) Exam learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. That's the reason why you should choose us.
