Get Help From Top Notch TestKingFree 1z0-1093-25 Exam Practice Questions

NACE CIP 1 CBT EXAM PRACTICE QUESTIONS AND ANSWERS 2023

Dew point is the temperature at which - Correct answer-condensation occurs.

You are the NACE Inspector on a tank lining project where a 50% solids epoxy tank lining is being applied. After application of the 19 coat you notice small blisters in some areas of the applied lining. Your FIRST preferred course of action is to: - Correct answer-Document the problem and advise the Contractor and Owner's representative.

If a contractor is using a poorly maintained compressor to supply air for abrasive blast cleaning and conventional airspray, the coating inspector should perform a - Correct answer-blotter test for the presence of oil and water.

Upon arrival of coating materials, the inspector should - Correct answer-observe and document the amount of material and batch numbers.

Relative humidity is - Correct answer-a measure of the amount of moisture in the air compared to saturation level.

Galvanic corrosion occurs on which of the following substrates? - Correct answer-Metal

When applying Thermal Spray Coatings the specification is most likely to reference: - Correct answer-SSPC-CS 23.00/AWS C2.23/NACE No. 12

What is the minimum recommended distance away from an edge that an inspector should take a measurement with a dial type magnetic pull off Dry Film Thickness(DFT) gauge? - Correct answer-2.5 cm (1 inch)

Polymerization is the process of? - Correct answer-Monomers joining together.

An exposed area of the substrate or previous coat of a conductive material, often caused by poor application technique is called: - Correct answer-Holiday

Checking is: - Correct answer-a fine crack in the surface of a coating that rarely reaches the substrate.

Inspection documentation is important because: - Correct answer-Owners use the documentation for a variety of purposes.

An Inspectors personal log book should contain: - Correct answer-No comments regarding the application team.

P.S. Free 2025 Oracle 1z0-1093-25 dumps are available on Google Drive shared by TestKingFree: https://drive.google.com/open?id=1tlpgPaZuCCwp2MjV1BXJVifL13RjQrfP

Our Oracle Cloud Database Services 2025 Professional (1z0-1093-25) exam questions are being offered in three easy-to-use and compatible formats. This 1z0-1093-25 exam dumps formats offer a user-friendly interface and are compatible with all devices, operating systems, and browsers. The TestKingFree Oracle Cloud Database Services 2025 Professional (1z0-1093-25) PDF questions file contains real and valid Oracle 1z0-1093-25 exam questions that assist you in 1z0-1093-25 exam dumps preparation and boost the candidate's confidence to pass the challenging Oracle Cloud Database Services 2025 Professional (1z0-1093-25) exam easily.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

Topic 2	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 3	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 4	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 5	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.

1z0-1093-25 Certification Practice | Latest Test 1z0-1093-25 Discount

If you want to prepare for your exam in a paper version, our 1z0-1093-25 test materials can do that for you. 1z0-1093-25 PDF version is printable and you can print them into hard one, and take some notes on them. In addition, we offer you free demo to have a try, so that you can have a better understanding of what you are going to buy. We are pass guarantee and money back guarantee for 1z0-1093-25 Exam Dumps, if you fail to pass the exam, we will give you full refund. Online and offline chat service are available, if you have any questions about 1z0-1093-25 exam materials, you can have a conversation with us, and we will give you reply soon as possible.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q95-Q100):

NEW QUESTION # 95
Which statement accurately describes the primary function of a NoSQL Database Cloud Service SDK?

- A. To manage the underlying infrastructure hosting the NoSQL database.
- B. To define the physical storage layout of the database.
- C. To provide a programming interface for interacting with the database, abstracting away low-level API details.
- D. To configure network security policies for accessing the database.

Answer: C

Explanation:
SDK Function:
An SDK simplifies database interaction by providing libraries and tools that abstract away the complexities of the underlying API.
This allows developers to use familiar programming languages and constructs to interact with the database.
Why the other options are incorrect:
* A:Physical storage layout is managed by the database service, not the SDK.
* C:Infrastructure management is handled by cloud providers, not the SDK.
* D:Network security policies are managed via OCI console or infrastructure tools, not the SDK.

NEW QUESTION # 96

Which of the following is the recommended approach for migrating a large, mission-critical database from an on-premises Exadata system to Exadata Database Service with minimal downtime?

- A. Traditional export/import using Data Pump over a public network.
- B. Creating a physical standby database using Data Guard and switching over to the standby in OCI.
- C. Performing a full backup and restore to a new Exadata Database Service instance.
- D. Using SQL Developer to copy the data over a VPN connection.

Answer: B

Explanation:
B: Using Data Guard for physical standby and switchover:
* This method enables minimal downtime migration.
* Steps:
* Configure Data Guard to synchronize the standby database with the primary on-premises database.
* Once synchronized, perform a switchover to make the standby the new primary.
* Downtime is limited to the switchover duration.
* This approach leverages real-time replication to minimize disruption.
Why the other options are incorrect:
* A. Export/Import with Data Pump: Too time-consuming for large databases.
* C. Full backup and restore: High downtime due to the time required for data transfer and restoration.
* D. Copying via SQL Developer: Not feasible for mission-critical and large databases due to slow transfer speeds.

NEW QUESTION # 97

When deploying Exadata Database Service, what is the PRIMARY benefit of using the "Cloud Tooling" deployment option versus manually configuring an on-premises Exadata system?

- A. "Cloud Tooling" allows using older versions of Oracle Database that are no longer supported on- premises.
- B. "Cloud Tooling" completely eliminates the need for any database administrator intervention.
- C. "Cloud Tooling" offers significantly more granular control over the underlying hardware configuration.
- D. "Cloud Tooling" automates the provisioning, patching, and lifecycle management of the Exadata infrastructure.

Answer: D

Explanation:
B: Automation of provisioning and management:
* Cloud Tooling automates key tasks such as provisioning, patching, scaling, and maintenance.
* Reduces manual configuration errors and saves time.
* Ensures consistency in setup and updates, minimizing downtime.
* Greatly simplifies lifecycle management, making cloud deployments more efficient than on-premises.
Why the other options are incorrect:
* A. More granular hardware control: Cloud tooling abstracts low-level hardware management.
* C. No DBA intervention: While reduced, DBAs still handle application-specific configurations and performance tuning.
* D. Using older database versions: Exadata Cloud Service supports only supported versions, not deprecated ones.

NEW QUESTION # 98

When using the OCI Console, which two options are configurable during the initial provisioning of a MySQL HeatWave DB system?

- A. The character set for the database.
- B. The MySQL version.
- C. The number of HeatWave nodes.
- D. The storage size for the database.
- E. The name of the initial database user.

Answer: B,C

Explanation:
A: Number of HeatWave nodes:
* During provisioning, users specify the number of nodes to allocate for the HeatWave analytical workload.
* More nodes enable higher performance for large datasets.
B: MySQL version:
* The selected version affects compatibility and available features.
* Users can choose from supported versions likeMySQL 8.0.
Why the other options are incorrect:
* C. Character set:Typically configured after database creation.
* D. Storage size:While storage can be specified, it is not part of HeatWave-specific configuration.
* E. Initial database user:Managed post-provisioning, not as part of the initial setup.

NEW QUESTION # 99
Which of the following DOES NOT directly contribute to the calculation of provisioned read capacity units (RCUs) required for a NoSQL Database Cloud Service table?

- A. Average record size being read.
- B. Complexity of the security roles defined on the table.
- C. Data consistency requirements.
- D. Number of reads expected per second.

Answer: B

Explanation:
RCU Calculation:
Read Capacity Units (RCUs) are determined based ondata size (average record size), read frequency (number of reads per second), and consistency level (eventual vs. strong consistency). Complex security roles do not impact the calculation because they do not directly influence the amount of data read or the frequency of access.
Why the other options are correct:
* A:Larger record sizes increase RCU requirements.
* B:Higher read frequency demands more RCUs.
* D:Strong consistency requires more read operations compared to eventual consistency.

NEW QUESTION # 100
......

The Oracle 1z0-1093-25 real exam simulation by the software helps you counter 1z0-1093-25 exam anxiety. You need to install the desktop software on Windows to take the practice test. Our web-based 1z0-1093-25 Practice Test has all spects of the desktop software. The only difference is that this Oracle 1z0-1093-25 practice test works online using any operating system and browsers.
