

Get Help From Top Notch UpdateDumps E_S4CPE_2405 Exam Practice Questions

P.S. Free & New E_S4CPE_2405 dumps are available on Google Drive shared by UpdateDumps: https://drive.google.com/open?id=1inZw70BftUz_uuGZa-JDs7Djg6D-tzAm

According to the needs of all people, the experts and professors in our company designed three different versions of the E_S4CPE_2405 certification training dumps for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the E_S4CPE_2405 Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the E_S4CPE_2405 latest questions to preparing for your coming exam.

SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.
Topic 2	Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Topic 3	Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.

Topic 4	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of cloud solution architects and focuses on the fundamentals of cloud computing, along with the different deployment models available for SAP Cloud ERP. It addresses the benefits, challenges, and selection criteria for choosing the most suitable deployment option in alignment with business goals.
Topic 5	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.

Efficient Reliable E_S4CPE_2405 Braindumps Ebook - Easy and Guaranteed E_S4CPE_2405 Exam Success

We offer free demos and updates if there are any for your reference beside real E_S4CPE_2405 real materials. By downloading the free demos you will catch on the basic essences of our E_S4CPE_2405 guide question and just look briefly at our practice materials you can feel the thoughtful and trendy of us. About difficult or equivocal points, our experts left notes to account for them. To fill the void, we simplify the procedures of getting way, just place your order and no need to wait for arrival of our E_S4CPE_2405 Exam Dumps or make reservation in case people get them all, our practice materials can be obtained with five minutes.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q25-Q30):

NEW QUESTION # 25

A customer needs to move their system from the current version of SAP S/4HANA (on-premise) to the same release version of SAP S/4HANA Cloud Private Edition.

What type of transition do you recommend?

- A. System Conversion
- B. Lift & Shift
- C. Selective Data Transition
- D. System Upgrade

Answer: A

NEW QUESTION # 26

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud Private Edition?

- A. Custom Code Migration app
- B. Software Update Manager
- C. SAP S/4HANA migration cockpit
- D. SAP Data Services

Answer: C

NEW QUESTION # 27

Which type of testing should be done after a release upgrade has been implemented?

- A. Regression tests
- B. User acceptance tests
- C. String tests
- D. Integration tests

Answer: A

NEW QUESTION # 28

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- **A. Business role requirements**
- B. Target customer go-live date
- **C. Known integration requirements**
- D. SAP Fiori application extensions

Answer: A,C

Explanation:

The Digital Discovery Assessment (DDA) is a pivotal tool in the SAP S/4HANA Cloud implementation process, designed to align a customer's business requirements with the appropriate SAP solutions. It captures various critical aspects to ensure a successful deployment.

Option A: Business role requirements

This option is correct. The DDA involves identifying the specific business roles within an organization to tailor the SAP solution accordingly. Understanding these roles ensures that the system supports the necessary functions and responsibilities of each user group.

Option B: Known integration requirements

This option is correct. The assessment captures existing integration points with other systems, which is crucial for seamless data flow and process efficiency. Documenting these requirements helps in planning and executing necessary integrations during implementation.

Option C: Target customer go-live date

This option is incorrect. While the go-live date is essential for project planning, it is typically determined during the project management phase rather than being a primary focus of the DDA.

Option D: SAP Fiori application extensions

This option is incorrect. The DDA primarily focuses on assessing current business processes and integration needs. Specifics like SAP Fiori application extensions are usually addressed later in the implementation process, during the design and customization phases.

In summary, the Digital Discovery Assessment captures business role requirements and known integration requirements to ensure that the SAP S/4HANA Cloud Private Edition solution aligns with the organization's operational needs.

NEW QUESTION # 29

How do you move extensions between SAP S/4HANA Cloud Private Edition systems? Note: There are 2 correct answers to this question.

- **A. Assign items to a software collection**
- **B. Import the collection**
- C. Mark items relevant for transport
- D. Assign items to a software package

Answer: A,B

Explanation:

To move extensions between SAP S/4HANA Cloud Private Edition systems, the following steps are involved:

Option A: Import the collection

This option is correct. After exporting the software collection from the source system, it can be imported into the target system to transfer the extensions.

Option B: Mark items relevant for transport

This option is incorrect. While marking items for transport is part of the process, it is not sufficient on its own to move extensions between systems.

Option C: Assign items to a software collection

This option is correct. Extensions must be assigned to a software collection, which serves as a container for transporting them between systems.
