One-year free updating of PSA-Sysadmin Test Answers will be allowed after payment and one or two days' preparation before test will be recommended.

## Certinia PSA System Administrator 2023 Sample Questions (Q10-Q15):

### NEW QUESTION # 10

The time periods in your org run through 2024. Your Finance team wants to start building forecast models through 2030. What is the best way to help the Finance team accomplish their task?

- A. Contact FinancialForce Onboarding and have them assist you in uploading a "csvfile with the correct time periods for the years 2025-2030 into your org
- B. Contact FinancialForce Support or your Partner to open a ticket, requesting that Onboarding help load the required time periods to ensure Actuals remain intact in your org
- C. Use datauploader.io or Data Import Wizard to upload a "csvfile with the correct time periods for the years 2025-2030 into your org

**Answer: B**

### NEW QUESTION # 11

Your company has asked you as the Sysadmin to edit a few Timecards that have already been approved. There are no Billing Events associated with the Timecards. What specific system permission allows you to perform this action?

- A. The System Administrator Profile
- B. The Timecard Ops Edit Permission Control
- C. None - PSA does not allow any updates to approved Timecards

**Answer: B**

### NEW QUESTION # 12

Your company has both full time and part time resources. From a Human Resources perspective, part time resources can work any number of hours per week. From a Resource Planning perspective, management has agreed that part time workers can be estimated at 20 hours per week.

Based on this information, how many work calendars should be created?

- A. One full time work calendar, one part time work calendar, and one generic flexible work calendar
- B. One full time work calendar, and one work calendar for each unique part time contract
- C. One full time work calendar, and one part time work calendar

**Answer: C**

Explanation:

Step-by-Step Comprehensive Detailed Explanation

\* Understanding Work Calendars in Certinia PSA

\* Work calendars define the default number of hours per day and week that a resource is expected to work.

\* They are crucial for resource scheduling, utilization calculations, and capacity planning.

\* Every active PSA Resource must have an associated work calendar to allow project assignments.

\* Scenario Analysis

\* Your company has both full-time and part-time resources.

\* Full-time resources have a standard workweek (e.g., 40 hours per week).

\* Part-time resources have variable work hours but are estimated at 20 hours per week for planning purposes.

\* This means you need at least one calendar for full-time and one for part-time workers.

\* Why Option B is Correct

\* Creating a single full-time work calendar (e.g., 40 hours per week) covers all full-time employees.

\* Creating one part-time work calendar (e.g., 20 hours per week) provides a consistent framework for part-time resource planning.

\* This approach ensures standardized reporting, scheduling, and forecasting without unnecessary complexity.

\* Why the Other Options Are Incorrect

\* A. One full-time work calendar, and one work calendar for each unique part-time contract

- \* This would require multiple work calendars for different part-time contracts, making resource scheduling overly complex.
- \* Since management has agreed on an estimated 20 hours per week for all part-time workers, a single part-time work calendar suffices.
- \* C. One full-time work calendar, one part-time work calendar, and one generic flexible work calendar
- \* A flexible work calendar is not necessary if all part-time workers are estimated at 20 hours per week.
- \* Work calendars should align with clear scheduling rules, not individual flexibility.
- \* Implementation in PSA
- \* Navigate to PSA - Admin App # Click Work Calendar tab.
- \* Create the following calendars:
  - \* Full-Time Work Calendar: Set working hours to 40 per week.
  - \* Part-Time Work Calendar: Set working hours to 20 per week.
- \* Assign the correct work calendar to each resource during onboarding.

### NEW QUESTION # 13

You are in the process of migrating historical Skills and Certification information from your company's legacy system into FinancialForce PSA. Since the historical data volume is relatively low, you have decided to migrate the data manually and not use the Data Loader tool.

Using the Manager Skills and Certification lightning component, you first select the internal resource's name for whom you want to capture the "Skills and Certification" ratings. However, you notice you do not have the option to "Add" new skills and Certification for that resource on the screen. You are one of the Salesforce/PSA System Administrators for your company and have the System Administrator profile.

Of the following, which one could explain why you are unable to migrate skills data for that resource?

- A. You do not have the "Skills and Certification Entry" Permission Control set to TRUE
- B. You do not have the "Allow Skills and Certification Entry" set to TRUE in the Custom Settings > Permission Control Settings
- C. You do not have the required Skills and Certification Entry Permission Set assigned to the resource

### Answer: B

### NEW QUESTION # 14

Your company is rolling out Skills and Certifications to encourage employees to track their skills and also decide which skills they would like to acquire. After rolling this feature out, end-users have noted they can't add their assignments to build their "Experience". What could be causing this problem?

- A. The "Enable Experience" checkbox in the Skills Management custom setting is not selected
- B. The "Enable Experience" field on the PSA contact record is not selected
- C. The "Enable Experience" checkbox in the enable-skills-experience configuration option is not selected

### Answer: C

Explanation:

To allow end-users to add their assignments to build their "Experience", the following configuration setting must be enabled:

- \* Navigate to Configuration Options.
- \* Locate the setting "enable-skills-experience".
- \* Ensure that the "Enable Experience" checkbox is selected.
- \* Save and apply changes.
- \* Option B (Skills Management custom setting) is incorrect because experience tracking is not controlled at the custom settings level.
- \* Option C (Enable Experience on PSA Contact record) is incorrect because this setting does not exist on the contact record.

Thus, the correct answer is A.
