You need to prepare the environment, configure and start change capture to GoldenGate trail files, perform Initial Load to synchronize databases, and configure and start change delivery. You can perform the tasks for Initial Load before or after starting change capture. When do you not need to do an Initial Load at all?

- A. You created the target database with Initial Load enabled.
- B. You need only to replicate to the new table on the target database with changes from the source table starting at a specific time.
- C. You don't need to address Initial Load as it is just optional.
- D. You already have the tables and data on the target needed for replicating data changes.

How is Integrated Capture different from Classic Capture?

- A. Integrated Capture is different because it connects directly to the inbound server to apply transactions.
- B. Integrated Capture is different because it automatically configures the Capture process of GoldenGate.
