We provide our customers with the most reliable learning materials about HPE0-S59 certification exam and the guarantee of pass. We assist you to prepare the key knowledge points of HPE0-S59 actual test and obtain the up-to-dated exam answers. All HPE0-S59 Test Questions offered by us are tested and selected by our senior experts in IT filed, which only need little time to focus on the practice and the preparation.

## Briefly explain the benefits of HP HPE0-S59 certified professional?

HPE0-S59 is a certification from HP and it is considered to be among the most significant certifications in the IT industry. This certification provides an opportunity for professionals to prove their knowledge on HPE Data Protection Solutions and get ahead of others.

It is important to mention that this certification does not have any prerequisites and therefore, anyone who has an interest in taking it can do so. **HP HPE0-S59 exam dumps** will help you to boost your experience. However, it is recommended that you possess some experience in system administration or security management.

The benefits of getting an HPE0-S59 Certified professional are many, but some of them include:

- It opens up doors to new career opportunities by allowing you to move up in ranks or switch industries
- It helps you improve your professional career and opens up new opportunities for advancement
- It demonstrates your expertise and knowledge in the field of data protection solutions
- It gives you an edge over other candidates during job interviews

## Exam HP HPE0-S59 Overview, HPE0-S59 New Braindumps Free

The product is made in three different formats to help customers with different preparation styles meet their needs. One of these formats is HP HPE0-S59 Dumps PDF file which is printable and portable. Users can take HPE Compute Solutions (HPE0-S59) PDF questions anywhere and use them anytime.

HP HPE0-S59 (HPE Compute Solutions) Exam is an essential certification for IT professionals who are looking to advance their careers in the field of HPE Compute Solutions. It is a comprehensive exam that requires a deep understanding of HPE products and technologies. Candidates who pass the exam will be certified as HPE ATP - Server Solutions V4, which is a globally recognized certification that demonstrates their expertise in HPE Compute Solutions.

## HPE Compute Solutions Sample Questions (Q32-Q37):

### NEW QUESTION # 32

Your customer plans to expand an existing nPar based on a single HPE Superdome Flex chassis. Which statement about workload availability during expansion is true?

- A. Online expansion is available only if RMC is used for management.
- B. HPE Superdome Flex does not support expansion of powered on nPars
- C. Powered nPar can be expanded only if HPE Superdome Flex 280 is used
- D. Powered nPar can be expanded if it does not use HPE Persistent Memory

**Answer: D**

Explanation:

HPE Superdome Flex allows for the expansion of powered-on nPars (nPartitions), but this capability is subject to certain conditions. One of these conditions is that the nPar does not use HPE Persistent Memory. Expanding an nPar with Persistent Memory typically requires a shutdown to reconfigure the memory settings safely.

### NEW QUESTION # 33

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components. Put the steps on the left into the coned order on the right to perform this task.

The interface shows a list of steps on the left and a numbered list on the right for ordering. The steps on the left are: Enter show health command, Confirm health status, Open SSH client, and Open session to RMC. The numbered list on the right is empty, with numbers 1 through 4.

**Answer:**

Explanation:

The interface shows the correct order of steps for verifying health status. The steps on the left are: Enter show health command, Confirm health status, Open SSH client, and Open session to RMC. The numbered list on the right shows the correct order: 1. Open SSH client, 2. Open session to RMC, 3. Enter show health command, and 4. Confirm health status.

\* Open SSH client: Begin by opening an SSH client on your computer. This client will be used to establish a secure connection to the Rack Management Controller (RMC).

\* Open session to RMC: Use the SSH client to open a session to the RMC. The RMC is the central management component for the HPE Superdome Flex system.

\* Enter show health command: Once connected to the RMC, enter the show health command. This command will provide detailed information about the health status of various components within the Superdome Flex system.

\* Confirm health status: Review the output of the show health command to confirm the health status of the Superdome Flex components. This step ensures that all components are functioning correctly and identifies any potential issues.

### NEW QUESTION # 34

Put the steps of the HPE infosight flow in the correct order.

**Answer:**

Explanation:

Explanation:

(observing, learning, predicting, recommending, acting)

\* **Observing:**The first step involves collecting and monitoring data from the infrastructure. HPE InfoSight continuously gathers telemetry data from various components, including storage, compute, and networking devices.

\* **Learning:**In this step, the collected data is analyzed to identify patterns and trends. Machine learning algorithms process the data to understand the normal behavior of the system and detect anomalies.

\* **Predicting:**Based on the learned patterns, HPE InfoSight can predict potential issues before they occur. This predictive analysis helps in identifying areas that might cause problems in the future.

\* **Recommending:**After predicting potential issues, HPE InfoSight provides actionable recommendations to prevent or resolve these issues. These recommendations are based on best practices and the vast amount of data analyzed by InfoSight.

\* **Acting:**Finally, the recommendations are implemented to optimize the performance and reliability of the infrastructure. This step may involve configuring settings, applying updates, or other actions to maintain the health of the system.

### NEW QUESTION # 35

Which compute node parameters are captured within server hardware type?

- A. Number of the CPUs
- **B. installed operating system**
- C. Size of the memory Installed
- D. Mezzanine card configuration

**Answer: B**

Explanation:

The server hardware type in HPE OneView captures parameters such as the mezzanine card configuration. This information is crucial for defining the connectivity and expansion capabilities of the compute node, ensuring that the appropriate resources are available for specific workloads.

### NEW QUESTION # 36

Your customer wants to update the firmware for 36 HPE Synergy 480 Gen 10 compute modules with a server profile assigned from a server profile template.

Put the steps required to achieve this goal on the left into their correct order on the right.

**Steps**

Select Firmware baseline within server profile template.

Select installation method (online or offline).

Update all server profiles from the template.

Upload SPP to HPE OneView repository.

**Answer Area****Answer:****Explanation:****Steps**

Select Firmware baseline within server profile template.

Select installation method (online or offline).

Update all server profiles from the template.

Upload SPP to HPE OneView repository.

**Answer Area**

Upload SPP to HPE OneView repository.

Select Firmware baseline within server profile template.

Select installation method (online or offline).

Update all server profiles from the template.

**Explanation:**

To update the firmware for the HPE Synergy 480 Gen 10 compute modules with a server profile assigned from a server profile template, the steps should be performed in the following order:

- \* Upload SPP to HPE OneView repository.(First, the Service Pack for ProLiant (SPP) containing the firmware updates must be uploaded to the HPE OneView repository.)
- \* Select Firmware baseline within server profile template.(Next, you need to select the desired firmware baseline in the server profile template.)
- \* Select installation method (online or offline).(Choose whether the firmware updates will be installed online or offline.)
- \* Update all server profiles from the template.(Finally, update all server profiles from the modified template to apply the firmware updates to the compute modules.)
