C-CPI-2506 Test Simulator Fee and SAP Test C-CPI-2506 Engine Version: SAP Certified Associate - Integration Developer Pass for Sure

No study materials can boost so high efficiency and passing rate like our C-CPI-2506 exam reference when preparing the test C-CPI-2506 certification. Our C-CPI-2506 exam practice questions provide the most reliable exam information resources and the most authorized expert verification. Our test bank includes all the possible questions and answers which may appear in the Real C-CPI-2506 Exam and the quintessence and summary of the exam papers in the past. You can pass the C-CPI-2506 exam with our C-CPI-2506 exam questions.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

Topic 3	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 4	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

SAP Certified Associate - Integration Developer Sample Questions (Q16-Q21):

NEW QUESTION # 16

Using the Test Connectivity function, you want to test a connection to a backend system. The connection is provided by a Cloud Connector. Which parameter is required for the connection test?

- A. Connector ID
- B. Host
- C. Subaccount ID
- D. Location ID

Answer: D

Explanation:

To test a connection to a backend system that is provided by a Cloud Connector, you must specify the location ID as a parameter for the connection test. The location ID is a unique identifier that represents a Cloud Connector instance in a specific network location. It is used to route requests from SAP Integration Suite to the correct Cloud Connector instance and then to the backend system. You can find the location ID in the Cloud Connector administration UI under Configuration Location ID. Reference: Cloud Connector Connectivity Tests | SAP Help Portal, Cloud Connector Configuration | SAP Help Portal

NEW QUESTION # 17

What is Representational State Transfer (REST)?

- A. A message protocol
- B. An application protocol
- C. A description language for APIs
- D. An architectural style

Answer: D

Explanation:

REST (Representational State Transfer) is:

An architectural style for designing networked applications.

Based on principles such as statelessness, resource orientation, uniform interface (HTTP methods: GET, POST, PUT, DELETE).

Used widely in SAP (OData is REST-based).

Other options:

Not a protocol (like HTTP), not a description language (like OpenAPI), and not limited to messaging.

Correct definition # Architectural style.

NEW QUESTION # 18

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Debug
- B. Error
- C. Info

- **D. Trace**

Answer: D

Explanation:

In SAP Cloud Integration, the log levels are:

Info # Default, logs basic execution details.

Debug # Logs processing steps, but not message payload.

Error # Logs only failures.

Trace # Captures message payloads at specific processing steps, used for deep troubleshooting.

Thus, to examine payload at runtime, the log level must be set to Trace.

NEW QUESTION # 19

What are some advantages of creating an OData interface through an API provider? Note: There are 2 correct answers to this question.

- **A. Automatic creation of a Swagger UI**
- B. Automatic creation of a WSDL specification
- **C. Automatic creation of an openAPI specification**
- D. Automatic creation of a RAML specification

Answer: A,C

Explanation:

Some advantages of creating an OData interface through an API provider are automatic creation of a Swagger UI and an openAPI specification. A Swagger UI is a web-based tool that allows you to interact with the OData service and test its functionality. An openAPI specification is a standard format for describing the OData service and its metadata, which can be used by other tools and applications. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 20

You download the Performance-Traceability policy from the SAP Business Accelerator Hub and implement it in an API proxy. What can you use to view the data covered by the policy?

- A. A third party monitoring tool
- **B. The API monitor under Monitor # Integration APIs**
- C. SAP Analytics Cloud
- D. SAP Cloud ALM

Answer: B

Explanation:

When you implement the Performance-Traceability policy in API Management:

It enables detailed monitoring of API calls, including latency, performance metrics, and message traces.

This data is available in the API Monitor (Monitor # Integration APIs) within the SAP Integration Suite cockpit.

Other options:

SAP Cloud ALM # General monitoring, not API trace-specific.

Third-party monitoring # Possible but not where SAP policy data is viewed.

SAP Analytics Cloud # For analytics, not direct monitoring of API proxy performance.

Thus, the correct monitoring location is API monitor under Monitor # Integration APIs.

NEW QUESTION # 21

.....

If applicants fail to find reliable material, they fail the C-CPI-2506 examination. Failure leads to loss of money and time. You just need to rely on ExamPrepAway to avoid these losses. ExamPrepAway has launched three formats of real C-CPI-2506 Exam Dumps. This product is enough to get ready for the SAP C-CPI-2506 test on the first attempt. Three formats are easy to use and meet the needs of every SAP Certified Associate - Integration Developer (C-CPI-2506) test applicant. The SAP C-CPI-2506 practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.
