Our FCP_FAZ_AD-7.4 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our FCP_FAZ_AD-7.4 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our online version of FCP_FAZ_AD-7.4 learning guide does not restrict the use of the device. You can use the computer or you can use the mobile phone. You can choose the device you feel convenient at any time.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.
Topic 2	Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
Topic 3	Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 4	Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.

Fortinet FCP_FAZ_AD-7.4 Latest Test Simulator - FCP_FAZ_AD-7.4 Valid Cram Materials

The pass rate is 98.65% for FCP_FAZ_AD-7.4 learning materials, and we have gained popularity in the international market due to the high pass rate. We also pass guarantee and money back guarantee if you buy FCP_FAZ_AD-7.4 exam dumps. We will give the refund to your payment account. What's more, we use international recognition third party for the payment of FCP_FAZ_AD-7.4 Learning Materials, therefore your money and account safety can be guaranteed, and you can just buying the FCP_FAZ_AD-7.4 exam dumps with ease.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q73-Q78):

NEW QUESTION # 73

You need to upgrade your FortiAnalyzer firmware.

What happens to the logs being sent to FortiAnalyzer from FortiGate during the time FortiAnalyzer is temporarily unavailable?

- A. The logfiled process stores logs in offline mode
- B. Logs are dropped
- C. FortiGate uses the miglogd process to cache the logs
- D. FortiAnalyzer uses log fetching to retrieve the logs when back online

Answer: C

Explanation:

If FortiAnalyzer becomes unavailable to FortiGate for any reason, FortiGate uses its miglogd process to cache the logs. There is a maximum value to the cache size, and the miglogd process will drop cached logs. When the connection between the two devices is restored, the miglogd process begins to send the cached logs to FortiAnalyzer. Therefore, the FortiGate buffer will keep logs long enough to sustain a reboot of your FortiAnalyzer (if you are upgrading the firmware, for example). But it is not intended for a lengthy FortiAnalyzer outage.

NEW QUESTION # 74

Which two statements are true regarding the outbreak detection service? (Choose two.)

- A. An additional license is required.
- B. It automatically downloads new event handlers and reports.
- C. Outbreak alerts are available on the root ADOM only.
- D. New alerts are received by email.

Answer: A,B

NEW QUESTION # 75

Which two methods can you use to restrict administrative access on FortiAnalyzer? (Choose two.)

- A. Use administrator profiles.
- B. Fabric connectors to external LDAP servers.
- C. Configure trusted hosts.
- D. Limit access to specific virtual domains.

Answer: A,C

Explanation:

Configure trusted hosts.

Trusted hosts restrict administrative access to FortiAnalyzer by limiting the IP addresses or subnets from which administrators can log in.

Use administrator profiles.

Administrator profiles define roles and permissions, restricting what specific administrators can access and manage on FortiAnalyzer.

The other options are not applicable because:

Limiting access to specific virtual domains is not applicable to FortiAnalyzer, as virtual domains (VDOMs) are a concept used in FortiGate, not FortiAnalyzer.
Fabric connectors to external LDAP servers are used for authentication purposes but do not directly restrict administrative access based on roles or IP addresses.

NEW QUESTION # 76

Which statement is true about sending notifications with incident updates?

- A. If you use multiple fabric connectors, all connectors must have the same notification settings
- B. Notifications can be sent only when an incident is updated or deleted.
- C. Notifications can be sent only by email.
- **D. You can send notifications to multiple external platforms**

Answer: D

Explanation:

You can add more than one fabric connector, each with the same or different notification settings. The receiving side of the connector must be configured for the notifications to be sent successfully.

FortiAnalyzer_7.0_Study_Guide-Online.pdf page 34: Fabric connectors also enable FortiAnalyzer to send notifications to ITSM platforms when a new incident is created or for any subsequent updates.

NEW QUESTION # 77

An administrator has moved FortiGate A from the root ADOM to ADOM1.

Which two statements are true regarding logs? (Choose two.)

- A. Analytics logs will be moved to ADOM1 from the root ADOM automatically.
- B. Logs will be presented in both ADOMs immediately after the move.
- **C. Archived logs will be moved to ADOM1 from the root ADOM automatically.**
- **D. Analytics logs will be moved to ADOM1 from the root ADOM after you rebuild the ADOM1 SQL database.**

Answer: C,D
