

Get the Most Recent Oracle 1z0-1042-24 Exam Questions for Guaranteed Success

DOWNLOAD the newest Braindumpsqa 1z0-1042-24 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1tOE0cOPPhDC67cY828bIL7DOsBE8vCRV>

Our 1z0-1042-24 exam guide is suitable for everyone whether you are a business man or a student, because you just need 20-30 hours to practice on our 1z0-1042-24 exam questions, then you can attend to your 1z0-1042-24 exam. There is no doubt that you can get a great grade. If you follow our 1z0-1042-24 learning pace, you will get unexpected surprises. What are you waiting for? Just choose Oracle Cloud guide question to improve your knowledge to pass 1z0-1042-24 exam, which is your testimony of competence. You will get what you are dreaming for.

Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.
Topic 2	• Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.
Topic 3	• Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Topic 4	• Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.
Topic 5	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.

Trustable 1z0-1042-24 100% Accuracy | Easy To Study and Pass Exam at first attempt & The Best 1z0-1042-24: Oracle Cloud Infrastructure 2024 Application Integration Professional

Our 1z0-1042-24 practice dumps compiled by the most professional experts can offer you with high quality and accuracy practice materials for your success. Up to now, we have more than tens of thousands of customers around the world supporting our 1z0-1042-24 Exam Questions. If you are unfamiliar with our 1z0-1042-24 study materials, please download the free demos for your reference, and to some unlearned exam candidates, you can master necessities by our 1z0-1042-24 training guide quickly.

Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q97-Q102):

NEW QUESTION # 97

CSV-formatted data has been extracted from Oracle ERP Cloud by invoking a web service using the SOAP Adapter, and the data extract has been returned as an MTOM attachment. You now need to send this CSV file to an external REST API that supports accepting this content as a Base64 encoded string. Which is a valid solution offering the best performance?

- **A. Map the received MTOM attachment directly to the REST adapter invoke map action using the `encodeReferenceToBase64` function.**
- B. Create and register a JavaScript function to convert the contents, invoke it using the JavaScript call action, then map the result to the REST adapter invoke map action.
- C. Create an NXSD in Oracle JDeveloper to define the schema of the CSV and use it to map the transformed data to the REST adapter invoke map action.
- D. Use the REST adapter configuration wizard to define the structure of the CSV when configuring the invoke connection, then map the MTOM attachment directly.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

MTOM to Base64:

* B: True-direct mapping with `encodeReferenceToBase64` is fastest.

NEW QUESTION # 98

Which operation is NOT supported by an Oracle Integration Cloud (OIC) connection resource configured with FTP Adapter in the Invoke role?

- **A. Read File in Segments**
- B. Download File
- C. Write File
- D. Read File
- E. Delete File

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

The OIC FTP Adapter in the Invoke role facilitates interactions with an FTP server from an integration flow.

Let's break down each operation with exhaustive detail:

* Option A: Write File

* Supported: The FTP Adapter allows writing files to an FTP server. For example, you could use a Stage File action to prepare a CSV file and then invoke the FTP Adapter to write it to a remote directory like /inbound. This is a core capability for outbound file transfers.

* Option B: Read File

* Supported: Reading an entire file from an FTP server is possible in Invoke mode. You specify a file path (e.g., /outbound/data.csv), and the adapter retrieves its contents, useful for processing complete files in one go, like a daily report.

* Option C: Read File in Segments

* Not Supported (Answer): This operation, which processes large files incrementally (e.g., 100 records at a time), is exclusive to the Trigger role or Stage File actions, not the Invoke role of the FTP Adapter. In Invoke mode, the adapter doesn't support

segmented reading because it's designed for direct, one-shot operations rather than iterative processing. For segmented reads, you'd use a File Adapter in Trigger mode or Stage File with a Connectivity Agent.

* Option D: Delete File

* Supported:Deleting a file on the FTP server (e.g., /archive/oldfile.txt) is a standard Invoke operation, often used for cleanup after processing.

* Option E: Download File

* Supported:Downloading retrieves a file to OIC for further processing, similar to Read File but typically implies storing it locally in the integration flow (e.g., staging it).

Why C is the answer:The Invoke role focuses on discrete actions (write, read, delete, download), not iterative tasks like segmented reading, which requires a polling mechanism better suited to Trigger roles or Stage File actions.

Edge Case:If you need segmented reading from an FTP server, you'd download the file first using Invoke, then use a Stage File action to process it in segments- a workaround, not a direct capability.

Use Case Example:An integration writing a sales report to FTP (A), downloading a log file (E), and deleting an old backup (D) works fine, but attempting to read a 10GB file in segments (C) fails in Invoke mode.

NEW QUESTION # 99

Which is NOT an available option while configuring an ERP Cloud Adapter to use in an Oracle Integration Cloud (OIC) integration?

- A. Enable Callback.
- B. Invoke CRUD operation on ERP Cloud REST API
- C. Extract Bulk Data from ERP Cloud
- D. Upload files to UCM

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

ERP Adapter:

* D:False-not a standard option.

NEW QUESTION # 100

You can recover unsaved changes in an Oracle Integration Cloud (OIC) integration that crashes during design time because of a browser crash, loss of network connectivity, or a server going down.

Which statement is NOT true about the unsaved changes feature in OIC?

- A. Changes made while working inside Data Mapper cannot be recovered.
- B. A user with the ServiceAdministrator role can unlock an integration that has unsaved changes.
- C. A user with the ServiceAdministrator role can recover the unsaved changes.
- D. Changes made while editing a Connections page cannot be recovered.
- E. A backup copy is created after each completed task, therefore there is no time limit to logging back in and recovering your changes.

Answer: C

Explanation:

Only the integration developer who was making the changes can recover the unsaved data.

ServiceAdministrators cannot recover unsaved changes; they can only unlock the integration, which discards unsaved changes.

NEW QUESTION # 101

Oracle Integration (OIC) is available in two editions, Standard and Enterprise. Which two OIC Enterprise Edition capabilities are also available in OIC Standard Edition?

- A. Enterprise Application adapters (such as EBS, JDE, SAP, and Siebel)
- B. Visual Builder
- C. Process Automation
- D. B2B Trading Partner Agreements
- E. File Server

Answer: B,E

Explanation:

Comprehensive and Detailed Explanation:

Editions:

* C, D: True-File Server, Visual Builder in both.

NEW QUESTION # 102

• • • • •

The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our 1z0-1042-24 exam torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our 1z0-1042-24 study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.
