

Get Updated AZ-700 Trustworthy Exam Content - All in CertkingdomPDF

What's more, part of that CertkingdomPDF AZ-700 dumps now are free: <https://drive.google.com/open?id=1iZTQYF7iyHtOGonY2NfxS01QaN5rbG1x>

Up to now our AZ-700 practice materials consist of three versions, all those three basic types are favorites for supporters according to their preference and inclinations. On your way moving towards success, our AZ-700 preparation materials will always serve great support. As long as you have any questions on our AZ-700 Exam Questions, you can just contact our services, they can give you according suggestion on the first time and ensure that you can pass the AZ-700 exam for the best way.

Exam Details for You to Know

Knowing more about the AZ-700 exam, its content falls into 5 parts. Each part is dedicated to a specific topic and checks definite skills. The first topic refers to the design, implementation, and managing hybrid networking. This implies that you possess skills to design, apply and operate a site-to-site VPN connection and a point-to-site VPN connection. Thus, you should be proficient in dealing with such concepts as a site-to-site VPN connection, VNet gateway, policy-based VPN, IPsec policy, local and virtual network gateways. In addition, your knowledge of how to plan RADIUS authentication, Open VPN authentication, Azure AD authentication will be checked. To add more, your skills in dealing with Azure ExpressRoute will be measured. So, be ready to demonstrate your ability to work with ExpressRoute SKU, ExpressRoute Global Reach, ExpressRoute FastPath, private and Microsoft peering.

The second topic focuses on the design and implementing core networking infrastructure. Here, you are expected to deal with private IP addressing for VNets, implementing name resolution, applying cross-VNet connectivity, and an Azure Virtual WAN architecture. In this domain, you should be capable of creating a VNet, configuring subnetting for services and Azure Route Server, creating subnet delegation, public and private DNS zones, and applying VNet peering. You also must be able to design an Azure Virtual WAN architecture, create a network virtual appliance, a hub in Virtual WAN, and a connection unit.

The third topic aims to check your skills in routing design and implementation. In this part, you will be tested on your ability to create, apply, and operate VNet routing, design and deal with an Azure Load Balancer, design and utilize Azure Application Gateway. In addition, you also should have the skills necessary to apply Azure Front Door and an Azure Traffic Manager profile, and create and apply an Azure Virtual Network NAT.

The fourth topic is centered on securing and monitoring networks. In this part, you should have skills to design, implement, operate an Azure Firewall deployment, implement and operate network security groups, WAF deployment. The potential candidates have to know how to monitor networks, including configuring network health alerts, using Traffic Analytics, configuring NSG flow logs and Azure Network Watcher.

The fifth topic aims to check your skills to design and implement private access to Azure Services. Here, your skills in using Azure Private Link service, Azure Private Endpoint, and service endpoints will be checked. You will need to demonstrate your ability to plan and create private endpoints, create a Private Link service, along with access to private endpoints. The following subtopic revolves around your expertise in configuring VNet integration for the given platform as a PaaS service. So, you should be experienced in how to configure App Service for regional VNet integration, create AKS, and access App Service Environment by configuring clients.

Microsoft AZ-700 Exam is a certification test that focuses on the design and implementation of Microsoft Azure Networking

Solutions. AZ-700 exam is intended for professionals who have experience in designing and implementing solutions using Azure services, and who are looking to validate their skills in networking.

Latest Microsoft AZ-700 Test Sample - Authentic AZ-700 Exam Questions

The Microsoft AZ-700 certification from Microsoft is a sought-after recognition of CertkingdomPDF skills and knowledge. With this Designing and Implementing Microsoft Azure Networking Solutions certification, professionals can enhance their careers, boost earnings, and showcase their expertise in a competitive job market. The benefits of passing the AZ-700 Exam are numerous, but preparing for the exam is not a simple feat.

Microsoft AZ-700 Certification Exam is an essential credential for IT professionals who want to demonstrate their expertise in designing and implementing Azure networking solutions. Achieving this certification will demonstrate that an individual has the skills and knowledge required to manage complex networking solutions in the Azure environment. With the growing demand for Azure networking professionals, the Microsoft AZ-700 Certification can help individuals advance their careers and open up new job opportunities.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q339-Q344):

NEW QUESTION # 339

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure application gateway that has Azure Web Application Firewall (WAF) enabled.

You configure the application gateway to direct traffic to the URL of the application gateway.

You attempt to access the URL and receive an HTTP 403 error. You view the diagnostics log and discover the following error.

```
{
  "timeStamp": "2021-04-03T18:13:45+00:00",
  "resourceID": "/SUBSCRIPTIONS/489f2981-ae7y-907v-g571-463bv3775517/PROVIDERS/MICROSOFT.NETWORK/APPLICATIONGATEWAYS/AGW1",
  "operationName": "ApplicationGatewayFirewallLog",
  "category": "ApplicationGatewayFirewallLog",
  "properties": {
    "instanceID": "appgw_0",
    "clientIP": "137.135.10.24",
    "clientPort": "",
    "requestUri": "/login",
    "ruleSetType": "OWASP_CRS",
    "ruleSetVersion": "3.0.0",
    "ruleID": "2020300",
    "message": "Request Missing an Accept Header",
    "action": "Matched",
    "site": "Global",
    "details": {
      "message": "Warning. Match of \\\\*pm ApplicationGateway\\\\* against \\\\*REQUEST_HEADER:User-Agent\\\\* required. ",
      "data": "",
      "file": "rules/REQUEST-920-PROTOCOL-ENFORCEMENT.conf",
      "line": "1247"
    }
  },
  "hostname": "app1.contoso.com",
  "transactionID": "f17546159y1hjk7wall145681f5131t468n",
  "policyID": "default",
  "policyScope": "Global",
  "policyScopeName": "Global"
}
```

You need to ensure that the URL is accessible through the application gateway.

Solution: You create a WAF policy exclusion for request headers that contain 137.135.10.24.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

The parameter here should be RemoteAddr not Request header.

<https://docs.microsoft.com/en-us/azure/web-application-firewall/ag/custom-waf-rules-overview#match-variable->

NEW QUESTION # 340

In which NSGs can you use ASG1 and to which virtual machine network interfaces can you associate ASG1?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

NSGs:

NGS1 only
NSG1 and NSG2 only
NSG1, NSG2, and NSG5 only
NSG1, NSG2, NSG4, and NSG5 only
NSG1, NSG2, NSG3, NSG4, and NSG5

Virtual machines:

VM2 only
VM2 and VM5 only
VM2, VM4, and VM5 only
VM2, VM3, VM4, and VM5

Answer:

Explanation:

Answer Area

NSGs:

NGS1 only
NSG1 and NSG2 only
NSG1, NSG2, and NSG5 only
NSG1, NSG2, NSG4, and NSG5 only
NSG1, NSG2, NSG3, NSG4, and NSG5

Virtual machines:

VM2 only
VM2 and VM5 only
VM2, VM4, and VM5 only
VM2, VM3, VM4, and VM5

Explanation

NGS1 only

VM2, VM3, VM4 and VM5

NEW QUESTION # 341

You have Azure App Service apps in the West US Azure region as shown in the following table.

Name	App Service plan	Number of instances
App1	ASP1	3
App2	ASP1	3
App3	ASP2	2
App4	ASP1	1

You need to ensure that all the apps can access the resources in a virtual network named Vnet1 without forwarding traffic through the internet. How many integration subnets should you create?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: C

Explanation:

Explanation

One integration subnet is required per App Service Plan regardless of how many apps are running in the App Service Plan.

Reference:

<https://docs.microsoft.com/en-us/azure/app-service/overview-vnet-integration>

NEW QUESTION # 342

You are planning an Azure solution that will contain the following types of resources in a single Azure region:

Virtual machine

Azure App Service

Virtual Network gateway

Azure SQL Managed Instance

App Service and SQL Managed Instance will be delegated to create resources in virtual networks.

You need to identify how many virtual networks and subnets are required for the solution. The solution must minimize costs to transfer data between virtual networks.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Virtual Networks:

1
2
3
4

Subnets:

1
2
3
4

Answer:

Explanation:

Virtual Networks:

1
2
3
4

Subnets:

1
2
3
4

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-for-azure-services#services-that-can-be-deployed-into-a-virtual-network>

NEW QUESTION # 343

You have an Azure subscription.

You have the on-premises sites shown the following table.

Name	Number of users	Connection type to Azure
Site1	500	ExpressRoute
Site2	100	Site-to-Site VPN
Site3	1	Point-to-Site (P2S) VPN

You plan to deploy Azure Virtual WAN.

You are evaluating Virtual WAN Basic and Virtual WAN Standard.

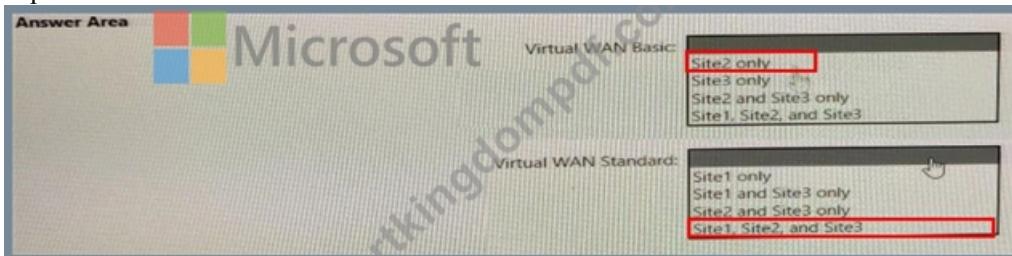

Which type of Virtual WAN can you use for each site? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-wan/virtual-wan-about>
