## Network-and-Security-Foundation Reliable Test Objectives | Network-and-Security-Foundation Reliable Exam Vce

The company is preparing for the test candidates to prepare the Network-and-Security-Foundation study materials professional brand, designed to be the most effective and easiest way to help users through their want to get the test Network-and-Security-Foundation certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market. Our Network-and-Security-Foundation Study Materials have been well received by the users, mainly reflected in the following advantages.

## WGU Network-and-Security-Foundation Sample Questions (Q14-Q19):

**NEW QUESTION # 14**
An attacker sends emails claiming that an online account has been locked. The email provides a fake link with the goal of tricking users into providing login credentials.
Which malicious attack strategy is represented in the scenario?

- A. Session hijacking
- B. Man-in-the-middle attack

- C. IP address spoofing
- D. Phishing

**Answer: D**

Explanation:
Phishingis a cyberattack where attackers impersonate legitimate entities (e.g., banks, companies) and send fraudulent emails or messages designed to trick recipients into revealing sensitive information, such as usernames, passwords, or financial details. The fake link in the email directs victims to a malicious site that captures their credentials.
* IP address spoofingdisguises a system's identity but does not involve email deception.
* Session hijackingtakes over an active session but does not involve email scams.
* Man-in-the-middle attackintercepts communication rather than tricking users via emails.

# NEW QUESTION # 15
A company is designing an information system and is maintaining a focus on the user experience and resulting productivity rather than on the technology itself.
What is the security principle implemented in this scenario?

- A. Least common mechanism
- B. Human-centeredness
- C. Fail-safe
- D. Zero-trust model

**Answer: B**

Explanation:
Human-centerednessin security design prioritizesuser experience and productivitywhile implementing security measures. It ensures that security policies are intuitive and do not excessively burden users, reducing resistance to security compliance.
* Least common mechanismminimizes shared resources to enhance security.
* Fail-safeensures secure defaults in case of system failure.
* Zero-trust modelassumes no inherent trust in users or devices.

# NEW QUESTION # 16
An organization is updating its information security policies in order to comply with thePersonal Information Protection and Electronic Documents Act (PIPEDA).
What should this organization expect to be required under this legislation?

- A. Disclose the software used to protect personal data
- B. Compensate individuals for revenue from the sale of their information
- C. Securely dispose of personally identifiable information
- D. Notify individuals each time their personal information is viewed

**Answer: C**

Explanation:
PIPEDArequires businesses in Canada to protectpersonal informationthrough security measures andproper disposal practices. This includessecure deletion of personal data when no longer neededto prevent unauthorized access.
* Compensating individuals for data salesis not a legal requirement.
* Notifying individuals of each data accessis unnecessary unless required by a breach.
* Disclosing security softwareis not mandated by PIPEDA.

# NEW QUESTION # 17
An attacker uses login data from a data breach to attempt to access another web service.
Which malicious attack strategy is represented in the scenario?

- A. Session hijacking
- B. Credential stuffing
- C. Social engineering

- D. Brute-force attack

**Answer: B**

Explanation:
Credential stuffing is a cyberattack where attackers use stolen username-password combinations from one breach to try logging into other services, exploiting users who reuse passwords. Automated tools test multiple credentials against multiple sites, leading to unauthorized access.
* Brute-force attack systematically tries all possible passwords but does not use breached data.
* Session hijacking intercepts active user sessions but does not use stolen credentials.
* Social engineering manipulates users into revealing credentials, rather than using breached data.

**NEW QUESTION # 18**
Which statement describes the Integrity tenet of IT security?

- A. It requires the encryption of sensitive data transmission.
- B. It requires that network applications be accessible to users.
- C. It involves keeping systems accessible for network users.
- D. It involves transmitting network data without any errors.

**Answer: D**

Explanation:
Integrity in IT security ensures that data remains accurate, unaltered, and trustworthy throughout its lifecycle.
This means that data transmission should occur without errors and should not be modified by unauthorized parties. Mechanisms like checksums, hashing, and digital signatures help maintain integrity.
* Encryption (B) enhances confidentiality, not integrity.
* Accessibility (C and D) relates to availability, not integrity.

**NEW QUESTION # 19**
......

Where can you purchase the best quality and cheapest Network-and-Security-Foundation exam dumps? Actual4test will meet all examinees'needs with cheaper price and high quality Network-and-Security-Foundation exam dumps and answers. The sales of Network-and-Security-Foundation certification training materials on Actual4test site is in front of the same work areas. The passing rate of our Network-and-Security-Foundation VCE Dumps is 100%. In a word, choosing Actual4test for you to pass Network-and-Security-Foundation test is equal to choose success.
