

GH-100 Latest Study Questions & GH-100 Reliable Exam Book

2025 Latest PrepPDF GH-100 PDF Dumps and GH-100 Exam Engine Free Share: <https://drive.google.com/open?id=1uFntiDFvPh8aLn2Z4GaJtjYFoEqKaF8D>

Are you planning to attempt the GitHub Administration (GH-100) exam of the GH-100 certification? The first hurdle you face while preparing for the GitHub Administration (GH-100) exam is not finding the trusted brand of accurate and updated GH-100 exam questions. If you don't want to face this issue then you are at the trusted PrepPDF is offering actual and latest GitHub Administration (GH-100) Exam Questions that ensure your success in the GitHub Administration (GH-100) certification exam on your maiden attempt.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 2	• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI • CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.
Topic 3	• Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.
Topic 4	• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.

Topic 5	Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

To achieve this objective PrepPDF has got the services of experienced and qualified GH-100 Exam trainers. They work together and put all their efforts and ensure the top standard of PrepPDF Microsoft GH-100 exam dumps all the time.

Microsoft GitHub Administration Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which THREE of the following accurately describe how the SCIM protocol enhances user management in GitHub Enterprise Cloud? (Choose three.)

- A. SCIM automatically deletes organization repositories when administrators are removed.
- B. SCIM generates authentication tokens for accessing GitHub's REST API.
- **C. SCIM synchronizes changes to user attributes from the identity provider to GitHub.**
- D. SCIM automates user provisioning when new users are added to the identity provider.
- E. SCIM configures repository permissions based on user roles within the organization.
- **F. SCIM deactivates GitHub accounts when users are deleted from the identity provider.**

Answer: C,F

Explanation:

SCIM automatically updates a user's account on GitHub whenever their profile attributes change in the identity provider.

When a user is removed or deactivated in the IdP, SCIM deactivates (soft-deprovisions) their GitHub account and disables access. SCIM provisions new GitHub Enterprise Cloud accounts automatically when users are added in the identity provider.

NEW QUESTION # 46

What additional capability does secret scanning offer for private repositories on GitHub Enterprise Cloud?

- **A. Allows custom pattern definitions for internal secret formats.**
- B. Rewrites history to remove secrets.
- C. Disables any code that contains a secret.
- D. Revokes GitHub access tokens automatically.

Answer: A

Explanation:

Secret scanning in private repositories on GitHub Enterprise Cloud lets you define and use custom regular-expression patterns - so you can detect internal or proprietary secret formats beyond the default partner-provided types.

NEW QUESTION # 47

How does GitHub support compliance requirements for enterprises?

- A. GitHub only allows those with repository owner (admin) permissions to write changes to repositories.
- B. GitHub automatically encrypts user passwords in plaintext for quick access.
- C. GitHub disables all external collaboration features.
- **D. GitHub provides configurable controls such as an audit log, SAML authentication, and enterprise rulesets.**

Answer: D

Explanation:

GitHub Enterprise gives you a suite of configurable controls - like a comprehensive audit log, enforced SAML single sign-on, and enterprise-level rulesets - that you can tailor and enforce to meet your organization's compliance mandates.

NEW QUESTION # 48

Why would someone choose to configure a security policy?

- A. To define which open source packages are permitted for use as part of that repository.
- B. To communicate corporate security and compliance policies for end users on a private repository.
- C. To prevent anyone from pushing to the repository without approval.
- **D. To provide information on an open source repository for open source collaborators and researchers that may need to report and disclose sensitive security findings to maintainers securely.**

Answer: D

Explanation:

A security policy (the SECURITY.md file) lets maintainers of an open source repository provide clear, private instructions for collaborators and external researchers on how to report and disclose security vulnerabilities responsibly.

NEW QUESTION # 49

Which of the following actions can a user with Write permissions perform in a GitHub repository?

- A. Manage repository settings, such as labels and GitHub Pages.
- B. Delete the repository.
- C. Configure branch protection rules.
- **D. Push code to non-protected branches.**

Answer: D

Explanation:

Users granted Write permission can push commits to non-protected branches, allowing them to update code without needing administrative rights.

NEW QUESTION # 50

.....

We are glad to introduce the GH-100 study materials from our company to you. We believe our study materials will be very useful and helpful for all people who are going to prepare for the GH-100 exam. There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the GH-100 Study Materials for all customers.
