Pass Guaranteed Quiz 2025 GH-200: Updated Latest GitHub Actions Exam Questions Vce

Do not hesitate to seek our extraordinary Microsoft GH-200 practice material to make a name in the field of Technology. PrepAwayETE has designed the Microsoft GH-200 product in three formats. You will find their specifications below to comprehend them better.

Microsoft GitHub Actions Sample Questions (Q34-Q39):

NEW QUESTION # 34

As a developer, you need to integrate a GitHub Actions workflow with a third-party code quality provider that uses the Checks API. How should you trigger a follow-up workflow?

- A. Add the `check_run` webhook event as a trigger for the workflow when the code quality integration is completed
- B. Add the `workflow_run` webhook event as a trigger for the workflow for the code quality integration name
- C. Add the `pull_request` webhook event as a trigger for the workflow when the code quality integration is synchronized
- D. Add the `deployment` webhook event as a trigger for the workflow when the code quality integration is completed

Answer: A

Explanation:

The `check_run` event is triggered when a check (such as a code quality check) completes, including when the status of a check changes. By adding this event as a trigger, you can initiate a follow-up workflow when the code quality integration finishes its checks.

<https://docs.github.com/en/actions/reference/workflows-and-actions/events-that-trigger-workflows>

NEW QUESTION # 35

While writing a custom action, some behavior within the runner must be changed. Which workflow commands would set an error message in the runner's output? (Each correct answer presents a complete solution. Choose two.)

- A. `echo "::error::There was an error"`
- B. `echo "::error file=main.py,line=10,col=15::There was an error"`
- C. `echo "::error=There was an error::"`
- D. `echo "::error message=There was an error::"`

Answer: A,B

Explanation:

To set an error message in a GitHub Actions runner's output, you should use the command `echo`

`::error::Your error message` in your workflow's run step. This workflow command creates an error annotation that will appear in the logs, and you can optionally include file and line number information, such as `echo "::error file=app.js,line=5::Error message"`.

NEW QUESTION # 36

As a developer, you are using a Docker container action in your workflow. What is required for the action to run successfully?

- A. The job runs-on must specify a Linux machine with Docker installed.
- B. The action must be published to the GitHub Marketplace.
- C. The job `env` must be set to a Linux environment.
- D. The referenced action must be hosted on Docker Hub.

Answer: A

Explanation:

For a Docker container action to run in a GitHub Actions workflow, the runner must have Docker installed. The runs-on attribute of the job should specify an environment that supports Docker, typically a Linux environment (e.g., ubuntu-latest), since Docker is widely supported and commonly used in Linux-based environments.

NEW QUESTION # 37

As a developer, which workflow steps should you perform to publish an image to the GitHub Container Registry? (Choose three.)

- A. Authenticate to the GitHub Container Registry.
- B. Use the actions/setup-docker action
- C. Pull the image from the GitHub Container Registry.
- D. Build the container image.
- E. Push the image to the GitHub Container Registry

Answer: A,B,E

Explanation:

- A . Use the actions/setup-docker action
- B . Authenticate to the GitHub Container Registry.
- C . Build the container image.
- D . Push the image to the GitHub Container Registry
- E . Pull the image from the GitHub Container Registry.

NEW QUESTION # 38

What menu options in a repository do you need to select in order to use a starter workflow that is provided by your organization?

- A. Actions > Load workflow
- B. Workflow > New workflow
- C. Actions > New workflow
- D. Workflow > Load workflow

Answer: C

Explanation:

To use a starter workflow provided by your organization, you need to go to the Actions tab in the repository and select New workflow. This option allows you to either create a new workflow or select from a list of available workflow templates, including starter workflows provided by your organization.

NEW QUESTION # 39

.....

After cracking the GitHub Actions (GH-200) exam you will receive the credential badge. It will pave your way toward well-paying jobs or promotions in any reputed tech company.
