

GH-300 Valid Exam Duration & GH-300 Actual Exams

The PDF version of our GH-300 guide quiz is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our GH-300 study material, you will get an E-mail form us in 5 to 10 minutes after payment. Once any new question is found, we will send you a link to download a new version of the GH-300 training engine. So don't worry if you are left behind the trend.

Microsoft GH-300 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Responsible :This section of the exam measures skills of AI Ethics Officers and Risk Managers and covers the responsible and ethical usage of AI technologies. It explains the risks and limitations associated with generative AI tools, including biases in training data and the need to validate AI outputs. Candidates learn how to operate AI responsibly by identifying potential harms such as bias, fairness, privacy concerns, and mitigating these harms by applying ethical AI principles. |
| Topic 2 | <ul style="list-style-type: none">GitHub Copilot Plans and Feature: This domain targets Product Managers and DevOps Engineers and focuses on understanding the various GitHub Copilot subscription plans like Individual, Business, and Enterprise, including distinctions and management features. It covers how Copilot is integrated into IDEs, different triggering methods for code suggestions, organizational policy management, subscription administration via API, and effective use of Copilot Chat and Knowledge Bases. Candidates also learn about CLI usage and configuration. |
| Topic 3 | <ul style="list-style-type: none">Domain 4: Prompt Crafting and Prompt Engineering This section measures skills of Software Developers and AI Interaction Designers in effectively crafting prompts to optimize Copilot's output. It reviews foundational concepts such as prompt components, the role of language in prompting, zero-shot vs. few-shot prompting, and how chat history influences responses. Best practices and engineering principles for prompt design and training methods are also covered. |
| Topic 4 | <ul style="list-style-type: none">Privacy Fundamentals and Context Exclusions: This domain focuses on Security Engineers and Compliance Officers and addresses improving code quality with Copilot's test suggestions and security optimizations. It covers identification of security vulnerabilities, performance enhancements, and privacy features like content exclusions at repository and organization levels with explanation of their limitations. Candidates learn about safeguarding mechanisms such as duplication detection, contractual protections, security checks, and troubleshooting guide for common Copilot issues including context exclusions and suggestion gaps. |

| | |
|---------|---|
| Topic 5 | <ul style="list-style-type: none"> Domain 6: Testing with GitHub Copilot: This section measures abilities of QA Engineers and Test Automation Specialists to use Copilot for test generation, including unit and integration tests. It explains how Copilot can identify edge cases and assist in writing assertions. The domain also covers different Copilot subscription SKUs, privacy considerations, organizational code suggestion settings, and configuration files related to Copilot. |

Free Demo Version and Free Updates of Real Microsoft GH-300 Questions

Under the tremendous stress of fast pace in modern life, sticking to learn for a GH-300 certificate becomes a necessity to prove yourself as a competitive man. Our GH-300 practice questions have been commonly known as the most helpful examination support materials and are available from global internet storefront. After years of unremitting efforts, our GH-300 Exam Materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our GH-300 study materials as their exam plan utility.

Microsoft GitHub Copilot Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which GitHub Copilot pricing plans include features that exclude your GitHub Copilot data like usage, prompts, and suggestions from default training GitHub Copilot? (Choose two correct answers.)

- A. GitHub Copilot Codespace
- B. GitHub Copilot Business
- C. GitHub Copilot Individual
- D. GitHub Copilot Enterprise

Answer: B,D

Explanation:

"For Copilot Business and Copilot Enterprise, user data such as code suggestions, prompts, and completions are excluded from training GitHub Copilot's models." This confirms that only Business and Enterprise plans provide this exclusion feature.

References: GitHub Copilot data usage and privacy documentation.

NEW QUESTION # 42

Which of the following is a risk associated with using AI?

- A. AI algorithms are incapable of perpetuating existing biases.
- B. AI eliminates the need for data privacy regulations.
- C. AI replaces the need for developer opportunities in most fields.
- D. AI systems can sometimes make decisions that are difficult to interpret.

Answer: D

Explanation:

A risk associated with AI is that its decisions can be difficult to interpret, leading to a lack of transparency and potential misunderstandings.

NEW QUESTION # 43

How can users provide feedback about GitHub Copilot Chat using their IDE?

- A. Through the "Share Feedback" button in the Copilot Chat panel
- B. By posting on the GitHub forums
- C. By filling out a feedback form on the GitHub website
- D. By emailing the support team directly

Answer: A

Explanation:

"In supported IDEs, you can provide feedback directly from the Copilot Chat panel by selecting the 'Share Feedback' option." This establishes that the in-IDE "Share Feedback" button is the official channel for submitting user feedback.

References: GitHub Copilot Chat feedback documentation.

NEW QUESTION # 44

How do you generate code suggestions with GitHub Copilot in the CLI?

- A. Use copilot suggest -> Write the command you want -> Select the best suggestion from the list.
- B. Describe the project's architecture -> Use the copilot generate command -> Accept the generated suggestion.
- C. Type out the code snippet -> Use the copilot refine command to enhance it -> Review the suggested command.
- **D. Write code comments -> Press the suggestion shortcut -> Select the best suggestion from the list.**

Answer: D

Explanation:

In the CLI, GitHub Copilot generates code suggestions by analyzing code comments. You write comments describing what you want, and Copilot provides relevant code suggestions. You then select the best suggestion from the list.

Reference: GitHub Copilot CLI documentation.

NEW QUESTION # 45

What method can a developer use to generate sample data with GitHub Copilot? (Each correct answer presents part of the solution. Choose two.)

- **A. Leveraging GitHub Copilot's suggestions to create data based on API documentation in the repository.**
- B. Leveraging GitHub Copilot's ability to independently initiate and manage data storage services.
- **C. Utilizing GitHub Copilot's ability to create fictitious information from patterns in training data.**
- D. Utilize GitHub Copilot's capability to directly access and use databases to create sample data.

Answer: A,C

Explanation:

GitHub Copilot can generate sample data by creating fictitious information based on patterns in its training data and by using suggestions based on API documentation within the repository.

NEW QUESTION # 46

.....

Nowadays the requirements for jobs are higher than any time in the past. The job-hunters face huge pressure because most jobs require both working abilities and profound major knowledge. Passing GH-300 exam can help you find the ideal job. If you buy our GH-300 test prep you will pass the GH-300 Exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income. Our GH-300 training braindump is of high quality and the passing rate and the hit rate are both high as more than 98%.
