

GH-900 Practice Mock, GH-900 Exam Questions Pdf

The objective of Microsoft GH-900 is to assist candidates in preparing for the Microsoft GH-900 certification test by equipping them with the actual GH-900 questions PDF and GH-900 practice exams to attempt the GH-900 Exam successfully. The Microsoft GH-900 practice material comes in three formats, desktop GH-900 practice test software, web-based GH-900 practice exam, and GH-900 Dumps PDF that cover all exam topics.

As the captioned description said, our GH-900 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our GH-900 learning quiz, but the newest in to them. And our professionals always keep a close eye on the new changes of the subject and keep updating the GH-900 study questions to the most accurate.

GH-900 Exam Questions Pdf & GH-900 Reliable Exam Sims

We all know that GH-900 study materials can help us solve learning problems. But if it is too complex, not only can't we get good results, but also the burden of students' learning process will increase largely. Unlike those complex and esoteric materials, our GH-900 Study Materials are not only of high quality, but also easy to learn. Our study materials do not have the trouble that users can't read or learn because we try our best to present those complex and difficult test sites in a simple way.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CICD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 2	<ul style="list-style-type: none">Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 3	<ul style="list-style-type: none">Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Topic 4	<ul style="list-style-type: none"> • Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 5	<ul style="list-style-type: none"> • Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.

Microsoft GitHub Foundations Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following is an Innersource development practice?

- A. Removing open source code from the organization
- B. Adopting open source code into the organization
- **C. Sharing code between teams within the organization**
- D. Making all repositories publicly accessible

Answer: C

Explanation:

Innersource is a development practice where an organization adopts open-source development methodologies within its own internal environment. The primary goal of innersource is to break down silos and encourage collaboration across different teams within the organization.

Sharing Code Between Teams:

Option B is correct because innersource involves sharing code between teams within the organization, similar to how open-source communities share code across the public domain. This practice fosters collaboration, improves code quality, and allows for reuse of code, reducing duplication of efforts.

Incorrect Options:

Option A is incorrect because adopting open-source code into the organization is related to using open-source software, not specifically to innersource practices.

Option C is incorrect because removing open-source code from the organization is contrary to the principles of both open source and innersource.

Option D is incorrect because making all repositories publicly accessible refers to open source, not innersource. Innersource typically involves keeping code internal to the organization.

NEW QUESTION # 25

What is the purpose of GitHub Sponsors?

- A. It offers a way for companies to purchase software on GitHub.
- B. It funds the most popular open source projects based on stars.
- **C. It allows the developer community to financially support open source projects.**
- D. It provides a channel for GitHub to support open source projects.

Answer: C

Explanation:

GitHub Sponsors is a program designed to provide a platform for developers and companies to financially support open-source projects and their maintainers.

Financial Support for Open Source Projects:

Option D is correct because the main purpose of GitHub Sponsors is to allow members of the developer community, including individuals and organizations, to financially support open-source projects and maintainers. This helps sustain open-source development by providing developers with the resources they need to continue their work.

Incorrect Options:

Option A is incorrect because GitHub Sponsors is not based on project popularity (e.g., stars); it is based on voluntary contributions.

Option B is incorrect because while GitHub provides the platform, the purpose of GitHub Sponsors is not for GitHub itself to fund projects, but to enable the broader community to do so.

Option C is incorrect because GitHub Sponsors is not a marketplace for purchasing software but a platform for supporting developers.

GitHub Docs: GitHub Sponsors

NEW QUESTION # 26

What is a gist?

- **A. Git repository**
- B. GitHub app
- C. GitHub Pages site
- D. Markdown document

Answer: A

Explanation:

A gist on GitHub is essentially a Git repository, albeit a simplified one, designed for sharing snippets of code, notes, or other text content. Gists support version control and can be public or secret.

Gist as a Git Repository:

Option B is correct because each gist is a Git repository, meaning you can clone it, commit changes, and even fork it, just like any other Git repository.

Incorrect Options:

Option A is incorrect because a gist is not an app; it's a feature of GitHub that provides a simplified repository.

Option C is incorrect because while a gist may contain Markdown documents, it is fundamentally a repository that can hold various file types.

Option D is incorrect because GitHub Pages is a separate service for hosting websites, not related to gists.

GitHub Docs: About Gists

NEW QUESTION # 27

An employee needs to find all issues within organization "Avocado" containing text "404 error" and a "guacamole" label. Which of the following steps would be best to search for these results?

- A. Enter query org:Avocado label:guacamole "404 error" in the search bar. Select "Issues" in the Filter by section.
- **B. Enter query org:Avocado is:issue label:guacamole "404 error" in the search bar.**
- C. Go to the Avocado organization settings. Select Repository defaults under Repository. Scroll to Repository labels and select the 'guacamole' label.
- D. Go to "Avocado" organization. Select Issues under a repository. Filter issues with a "guacamole" label.

Answer: B

Explanation:

GitHub provides a powerful search syntax to filter and find specific issues across repositories in an organization.

Search Query Syntax:

Option A is correct because the query org:Avocado is:issue label:guacamole "404 error" is the best way to search for all issues within the "Avocado" organization that contain the text "404 error" and are labeled with "guacamole". This query is precise and leverages GitHub's advanced search capabilities.

Incorrect Options:

Option B is incorrect because it requires manual filtering in a specific repository rather than searching across the entire organization.

Option C is incorrect because selecting "Issues" in the filter by section is redundant when using the query is:issue.

Option D is incorrect because accessing organization settings to look for repository labels is not relevant to searching for issues.

NEW QUESTION # 28

Answer: D

GitHub Enterprise Cloud with Enterprise Managed Users (EMU) integrates closely with an organization's identity provider (IdP), such as Azure Active Directory, to manage user accounts. The primary benefit of this setup is centralized control and streamlined management. It allows organizations to enforce policies, manage user permissions, and provision or deprovision accounts directly through their IdP, ensuring consistency and security across the organization. This approach is ideal for large enterprises that require tight control over their users and resources.

Microsoft GH-900 practice braindumps will be worthy of purchase, and you will get manifest improvement. So you have a comfortable experience with our GH-900 study guide this time. By using our GH-900 Preparation materials, we are sure you will pass your exam smoothly and get your dreamed certification.
