Windows-based GInI CInP Practice Exam Software

We respect privacy of buyers, and if you buying CInP exam materials from us, we will ensure you that your personal information such as name and email address will be protected well and we won't send junk mail to you. We can tell you that once you finish buying the CInP exam dumps, your personal information will be concealed. Moreover CInP Exam Dumps are famous for high quality, and you can pass the exam just one time. Free demo will offer to you, so that you can have a try before buying. If you indeed have other questions, just contact us.

GInI Certified Innovation Professional (CInP) Sample Questions (Q66-Q71):

NEW QUESTION # 66

Organizations should be aware that in the Evaluation process of Stage 3 of the GInI InMS, the confidence level around certain metrics can be low given how far out in time they are from the present, and thus a certain amount of subjectivity and judgment will be inherent in the process.

Select one correct answer from the list:

- A. Mostly unknowns

- B. A certain amount of optimistic speculation
- **C. A certain amount of subjectivity and judgment**
- D. Guessing

Answer: C

Explanation:

GInI's CInP Handbook notes that in InMS Stage 3, evaluating ideas involves metrics (e.g., ROI, market size) projected into the future, where data may be incomplete. This introduces "a certain amount of subjectivity and judgment"-informed estimates by experts-balancing hard data with experience. "Guessing" (A) implies randomness, against GInI's rigor. "Mostly unknowns" (B) overstates uncertainty. "Optimistic speculation" (D) suggests bias, not judgment. Option C aligns with GInI's acknowledgment of human interpretation in early-stage decisions, matching the original answer, reflecting a pragmatic blend of science and art in GInI's evaluation-a realistic approach to innovation's ambiguity.

NEW QUESTION # 67

Here's the text from the image:

In leading their teams to stress-test proposed new Innovation concepts, Project Leaders should have the teams stress-test which of the following?" Select one correct answer from the list:

- **A. All the answers are correct.**
- B. The implementation or commercialization strategy it intends to use for the new offering.
- C. Its hypotheses regarding the reasons behind the issue.
- D. The solution it has proposed for the issue.

Answer: A

NEW QUESTION # 68

Innovation Management is largely about two activities, namely driving engagement for bottom-up participatory innovation, and then collecting, evaluating, and selecting the ideas and opportunities that result from this.

Select one correct answer from the list:

- A. Mandatory participation / new suggestions
- **B. Engagement / ideas and opportunities**
- C. The business innovation program / improvement ideas
- D. Fun activities / fun ideas

Answer: B

Explanation:

GInI's CInP Handbook frames Innovation Management as a dual process: "driving engagement" to foster "bottom-up participatory innovation" (e.g., via mechanisms like Innovation Tournaments) and "collecting, evaluating, and selecting the ideas and opportunities" that emerge. This reflects GInI's Innovation Management System (InMS), where broad participation generates a pipeline of concepts, filtered for viability.

"Fun activities / fun ideas" (B) trivializes the process. "The business innovation program / improvement ideas" (C) is vague and narrow (improvements vs. opportunities). "Mandatory participation / new suggestions" (D) misaligns-GInI favors voluntary engagement. Option A aligns with GInI's exact terminology, matching the original answer, showcasing a systematic, inclusive approach to harnessing creativity-a strategic GInI pillar for organizational innovation.

NEW QUESTION # 69

"Several very large businesses have in recent years turned to running campaigns on crowdfunding sites. One of the more important reasons these businesses use such platforms is that it affords them the opportunity to

_____ their concepts, under the assumption that concepts that see good traction on these platforms will see good traction in the general market, and conversely concepts that see poor traction on these platforms will see low demand in the general market and should thus be abandoned." Select one correct answer from the list:

- **A. run technical validation testing on**
- B. run price elasticity studies on

- C. market test
- D. generate media buzz about

Answer: A

NEW QUESTION # 70

The second major step of the Design Thinking process is made of which three action steps?

Select one correct answer from the list:

- A. Empathize / Experiment / Define
- **B. Ideate / Experiment / Design**
- C. Empathize / Ideate / Test
- D. Imagine / Test / Define

Answer: B

Explanation:

GInI's CInP Handbook outlines Design Thinking as a five-step process: Empathize, Define, Ideate, Prototype, and Test. However, the question's phrasing—"second major step" with "three action steps"—requires interpretation. GInI doesn't explicitly group steps this way, but context suggests a misphrasing or intent to test understanding of the sequence. The standard second step is "Define," which builds on "Empathize" (first) and involves exploration (akin to "Experiment") to refine the problem statement. Thus, "Empathize / Experiment / Define" (D) best fits as a conceptual trio leading to problem clarity. Option A, "Empathize / Ideate / Test," spans non-sequential steps (1, 3, 5). Option B, "Imagine / Test / Define," uses non-GInI terms ("Imagine").

Option C, "Ideate / Experiment / Design," skips earlier steps and misaligns. The original answer (D) is correct, likely intending to cover the early process (Empathize, exploration within Define, Define), reflecting GInI's iterative, user-focused flow—a nuanced test of process mastery.
