## Pass Guaranteed Quiz Chrome-Enterprise-Administrator - Updated Professional Chrome Enterprise Administrator Certification Exam Braindumps Torrent

The essential method to solve these problems is to have the faster growing speed than society developing. In a field, you can try to get the Google certification to improve yourself, for better you and the better future. With it, you are acknowledged in your profession. The Chrome-Enterprise-Administrator exam torrent can prove your ability to let more big company to attention you. Then you have more choice to get a better job and going to suitable workplace. And our Chrome-Enterprise-Administrator Exam Questions are famous for its good quality and high pass rate of more than 98%. You should have a try on our Chrome-Enterprise-Administrator study guide.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q50-Q55):

**NEW QUESTION # 50**
An organization experiences a recent surge in account takeovers and suspicious activity Upon investigation a security team discovers that employees are falling victim to infostealer malware specifically designed to target Chrome browser cookies This malware is spreading through phishing emails and compromised websites, and it is capable of stealing session cookies, login credentials, and other sensitive information stored in the browser Which measure can an administrator implement using Chrome Enterprise Core to

mitigate the risks posed by cookie theft?

- A. Block the use of third-party cookies
- B. Disallow Chrome Sync and Require Incognito mode
- C. Invalidate user's session cookies and tokens by resetting the sign-in cookies from the Google Admin console
- D. Require Enhanced Safe Browsing and enable Application Bound Encryption

**Answer: D**

Explanation:
To combat cookie theft from infostealer malware, requiring "Enhanced Safe Browsing" provides proactive protection against malicious websites and downloads that might distribute such malware. Enabling
"Application Bound Encryption" adds an extra layer of security to cookies and other sensitive data stored by Chrome, making them harder for malware to use even if stolen. Blocking third-party cookies (option A) can improve privacy but doesn't directly prevent malware from stealing first-party session cookies. Invalidating existing cookies (option C) is a reactive measure and doesn't prevent future theft. Disallowing Chrome Sync and requiring Incognito mode (option D) changes user behavior but doesn't inherently protect against malware on the local machine.

## NEW QUESTION # 51
An administrator decides to shorten the default time that a browser may be inactive before automatic deletion from the Google Admin console What policy must be selected for the Device Token Management policy to allow devices to re-enroll in the Google Admin console?

- A. Delete Token
- B. Revoke Token
- C. Renew Token
- D. Invalidate Token

**Answer: C**

Explanation:
When managing inactive device tokens, the "Renew Token" option is crucial for allowing devices to re-enroll after a period of inactivity. If the token is revoked, invalidated, or deleted, the device will likely require a manual re-enrollment process. Renewing the token provides a mechanism for the device to check back in and remain managed.

## NEW QUESTION # 52
An organization has a critical extension that is force-installed on managed Chrome browsers to meet specific security needs Additionally, the organization has specified that when extensions are unpublished from the Chrome Web Store, they are also disabled The extension has been taken over by a malicious actor and has been unpublished from the Chrome Web Store What impact will this have to the force-installed extension?

- A. The force-installed extension will observe no change
- B. The admin will receive an alert in the Google Admin console to remediate the conflict
- C. The force-installed extension will be disabled for existing users only
- D. The force-installed extension will automatically be disabled

**Answer: D**

Explanation:
If an extension that is force-installed via policy is unpublished from the Chrome Web Store, the Chrome browser will detect this status and automatically disable the extension on managed devices. This is a security mechanism to prevent the continued use of potentially compromised or no longer maintained extensions.

## NEW QUESTION # 53
What policy and value provides the most protection against malicious websites?

- A. Set the Safe Browsing policy to Enhanced mode
- B. Allow the user ability to bypass Safe Browsing warnings

- C. Set the site isolation policy to be required for all websites
- D. Enable site isolation for all websites

**Answer: A**

Explanation:
Setting the **Safe Browsing policy to Enhanced mode** provides the most direct and comprehensive protection against malicious websites by leveraging Google's real-time threat intelligence. Allowing users to bypass warnings (option A) defeats the purpose of Safe Browsing. While site isolation (options C and D) protects against cross-site data leakage, it doesn't directly prevent users from accessing malicious sites in the first place. Enhanced Safe Browsing actively warns and blocks access to dangerous websites.

## NEW QUESTION # 54

An administrator is using Organizational Units (OU) to apply different Chrome browser settings to different types of devices The administrator needs to ensure that the browsers are placed in the correct OU Which token must the administrator generate and apply?

- A. Browser Policy Token
- B. Enrollment Token
- C. Cloud Management Token
- D. Device Management Token

**Answer: B**

Explanation:
The **Enrollment Token** is the key to associating a Chrome browser instance with a specific organizational unit (OU) in the Google Admin console during the enrollment process. By applying the correct enrollment token during setup, the browser will be placed in the designated OU and inherit the policies configured for that OU. Device Management Tokens are more relevant for ChromeOS devices. Browser Policy Tokens are not a standard term for OU assignment during enrollment. Cloud Management Token is a general term encompassing the enrollment process.

## NEW QUESTION # 55

......

You can use this Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) practice exam software to test and enhance your Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam preparation. Your practice will be made easier by having the option to customize the Google in Chrome-Enterprise-Administrator exam dumps. Only Windows-based computers can run this Google Chrome-Enterprise-Administrator Exam simulation software.
