Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 2	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 3	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 4	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 5	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Pass Guaranteed 2025 Google Chrome-Enterprise-Administrator –High Pass-Rate Key Concepts

To cater to the different needs of different customers, our product for Chrome-Enterprise-Administrator exam have provide three different versions of practice materials. I f you are more like the paper version, then PDF version will be your choice, since this version can be printed. If you are more likely to use the computer, the Desktop version is your choice, this version can provide you the feeling of the Real Chrome-Enterprise-Administrator Exam.If you prefer to practice the materials on online, then online version is your choice, this version support all web browers, and you can practice it in your free time if you want. Just try it, there is always a version for you.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11
An organization has Chrome set to auto-update The security team runs a compliance report from Chrome Enterprise Core and notices that some rarely used machines are showing an old version of Chrome However, when an engineer logs in to these PCs and checks Chrome directly, the correct updated version appears What is the most likely reason for this discrepancy?

- A. The display version does not update until Chrome is launched
- B. The machine has a different version of Chrome installed that is not managed via auto update
- C. The auto-update feature is malfunctioning and not updating Chrome until it is launched
- D. Network setting is blocking the unattended auto-update check

Answer: A

Explanation:
The most likely reason for this discrepancy is that the version reported in the Chrome Enterprise Core compliance report might not be updated in real-time until Chrome is actively running and checks in. When an engineer logs in and launches Chrome, it likely completes the update process and reports the correct version.
The auto-update feature generally works in the background, and a completely different unmanaged version (option C) or a persistent network block (option D) would likely prevent updates even when Chrome is launched. A malfunctioning auto-update (option A) is less likely to resolve itself upon manual launch.

NEW QUESTION # 12
In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Proactive Defense
- B. Enhanced Protection
- C. Advanced Threat Protection
- D. Secure Browsing Mode

Answer: B

Explanation:
Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

NEW QUESTION # 13
An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.

Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 129.
- B. 129(
- C. 129'"
- D. 0

Answer: A

Explanation:
To target all updates within the 129 major version, the administrator should use the target version prefix `129.
`. This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

NEW QUESTION # 14

The cyber risk team is conducting a review of software permissions The team needs an export of all installed browser extensions with a medium or high risk score and more than five permissions Where in the Google Admin console can an administrator generate this list?

- A. Chrome Browser -> Managed Browser -> All Browsers
- B. Chrome Browser -> Reports -> Apps & extensions usage
- C. Chrome Browser -> Apps & Extensions -> All Browsers
- D. Reporting -> Audit and Investigation -> Chrome Insights Report

Answer: B

Explanation:
The "Chrome Browser -> Reports -> Apps & extensions usage" section in the Google Admin console provides detailed information about installed extensions, including permissions and a risk assessment (if available through integrated security features). This report allows administrators to filter and analyze extensions based on their risk score and the number of permissions they request, enabling them to identify extensions that meet the cyber risk team's criteria.

NEW QUESTION # 15

What report types are available in Google Chrome Enterprise Core on the Chrome Insights Report page'?

- A. Device Fleet Hardware report, Browsers that need attention, Chromium browsers
- B. Chromium browsers, Devices that need to be purchased, Devices that have been used by family members
- C. Devices that need attention, Devices that need to be purchased, Devices that have been used by family members
- D. Browsers pending updates, Browsers without activity in the past 28 days, Browsers that have been recently enrolled

Answer: D

Explanation:
The Chrome Insights Report in the Google Admin console provides visibility into the managed Chrome browser environment. Key report types available here include "Browsers pending updates" to identify devices needing patching, "Browsers without activity in the past 28 days" to understand browser usage, and
"Browsers that have been recently enrolled" for monitoring onboarding. The other options list reports that are either not specific to Chrome Insights or related to device hardware rather than browser status.

NEW QUESTION # 16

......

The procedures of every step to buy our Chrome-Enterprise-Administrator exam questions are simple and save the clients' time. Because the most clients may be busy in their jobs or other significant things, the time they can spare to learn our Chrome-Enterprise-Administrator study materials is limited and little.
