Our Google Chrome-Enterprise-Administrator Exam Simulations will assist you clear exams and apply for international companies or better jobs with better benefits in the near future.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Topic 2	<ul style="list-style-type: none"> • Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 3	<ul style="list-style-type: none"> • Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 4	<ul style="list-style-type: none"> • Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 5	<ul style="list-style-type: none"> • Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

So you can study actual Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) questions in PDF easily anywhere. TopExamCollection updates Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) PDF dumps timely as per adjustments in the content of the actual Google Chrome-Enterprise-Administrator exam.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

A Chrome administrator is using both Cloud policies and Local policies to apply settings to Chrome browsers. The administrator wants to ensure that on Windows computers, the Cloud policies will have precedence if Cloud and Local policies conflict. What Registry value can be created under HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome to achieve this?

- A. "Value: CloudPolicyOverridesPlatformPolicy Type REG_DWORD Data 1"
- B. "Value: LocalPolicyOverride Type: REG_DWORD Data 0"
- C. "Value PolicySupercedence Type REG_SZ Data Cloud"
- D. "Value: PolicyOverridePreference Type REG_SZ Data Cloud"

Answer: A

Explanation:

To ensure cloud policies override local policies on Windows, the administrator needs to create a specific Registry value. The correct value is "CloudPolicyOverridesPlatformPolicy" of type 'REG_DWORD' with data '1'. This setting explicitly tells the Chrome browser to prioritize cloud-managed policies over local policies.

NEW QUESTION # 44

A company has multiple departments, including Engineering, Marketing, Sales, and HR. Each department has different needs and schedules for Chrome updates. For instance, the Engineering team requires the latest updates as soon as they are available to ensure

they have the latest features and security patches. However, the HR department prefers a more stable environment and only wants updates after they have been thoroughly tested.

Which feature in the Google Admin console can an administrator use to meet the company's requirements?

- A. Create organizational units for each department
- B. Set device policies for each department
- C. Create different user groups for each department
- D. Create active directory forest for each department

Answer: A

Explanation:

Organizational Units (OUs) in the Google Admin console allow administrators to apply different Chrome policies to different groups of devices or users based on their organizational structure. By creating separate OUs for Engineering and HR (and potentially other departments), the administrator can configure different Chrome update policies for each OU, ensuring Engineering gets rapid updates while HR stays on a more stable release. User groups primarily manage access to services, and device policies are generally applied at the device level, not necessarily tied to departmental needs for update cadences. Active Directory forests are a Microsoft concept and not directly used for managing Chrome update policies in the Google Admin console.

NEW QUESTION # 45

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates'?

- A. Relaunch notification
- B. Rollback to target version
- C. Component updates
- D. Auto-update check period

Answer: D

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 46

An administrator decides to shorten the default time that a browser may be inactive before automatic deletion from the Google Admin console. What policy must be selected for the Device Token Management policy to allow devices to re-enroll in the Google Admin console?

- A. Invalidate Token
- B. Delete Token
- C. Revoke Token
- D. Renew Token

Answer: D

Explanation:

When managing inactive device tokens, the "Renew Token" option is crucial for allowing devices to re-enroll after a period of inactivity. If the token is revoked, invalidated, or deleted, the device will likely require a manual re-enrollment process. Renewing the token provides a mechanism for the device to check back in and remain managed.

NEW QUESTION # 47

Where can information about all of the profiles associated with a browser be found*?

- A. Managed browsers detail
- B. Chrome log events
- C. Managed devices
- D. Chrome Insights report

Answer: A

Explanation:

The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 48

.....

We are stable and reliable Chrome-Enterprise-Administrator exam questions providers for persons who need them for their Chrome-Enterprise-Administrator exam. We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate of Chrome-Enterprise-Administrator exam questions can meet your requirement.
