Latest Google Chrome-Enterprise-Administrator Study Guide & Chrome-Enterprise-Administrator Valid Test Questions

With our Chrome-Enterprise-Administrator learning materials, what you receive will never be only the content of the material, but also our full-time companionship and meticulous help. After you have successfully paid, we will send all the Chrome-Enterprise-Administrator information to your email within 10 minutes. During your installation, our Chrome-Enterprise-Administrator study guide is equipped with a dedicated staff to provide you with free remote online guidance.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 2	<ul style="list-style-type: none">• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Topic 3	<ul style="list-style-type: none"> • Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	<ul style="list-style-type: none"> • Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 5	<ul style="list-style-type: none"> • Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

An administrator decides to shorten the default time that a browser may be inactive before automatic deletion from the Google Admin console. What policy must be selected for the Device Token Management policy to allow devices to re-enroll in the Google Admin console?

- A. Revoke Token
- B. Invalidate Token
- **C. Renew Token**
- D. Delete Token

Answer: C

Explanation:

When managing inactive device tokens, the "Renew Token" option is crucial for allowing devices to re-enroll after a period of inactivity. If the token is revoked, invalidated, or deleted, the device will likely require a manual re-enrollment process. Renewing the token provides a mechanism for the device to check back in and remain managed.

NEW QUESTION # 21

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates'?

- A. Relaunch notification
- B. Rollback to target version
- C. Component updates
- **D. Auto-update check period**

Answer: D

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 22

Which percentage of Chrome is recommended during Beta before general availability'?

- A. 10%
- B. 2%
- C. 1%
- D. 5%

Answer: D

Explanation:

While the exact percentage isn't explicitly stated in the provided material, industry best practices for software deployment, including browser updates, recommend testing in a Beta environment with a representative but limited subset of users before a full rollout. A common recommendation for Beta testing is around 5% of the user base. This provides sufficient feedback and issue detection without impacting the majority of users.

NEW QUESTION # 23

An organization uses Chrome Enterprise Core and needs to enforce specific security policies (e.g., disabling extensions, restricting website access) only for employee work-related browsing. Personal browsing should remain unrestricted. Which approach is most appropriate?

- A. Use a managed browser and set exceptions for personal use in the enterprise policies
- B. Require a managed browser for work-related browsing, applying the policies to all browser windows
- C. Require a managed profile for work-related browsing, applying the policies to only that profile
- D. Use a single managed profile for all users, configuring separate work and personal bookmarks to manage access

Answer: C

Explanation:

The most granular and appropriate approach to apply work-related policies without affecting personal browsing is to use ****managed profiles****. By requiring users to use a specific managed profile for work purposes, administrators can enforce policies only within that profile. Personal browsing in a separate, unmanaged profile will remain unaffected. Option A would apply policies to all browsing, which is not the requirement. Option C relies on bookmarks, which is not a security enforcement mechanism. Option D is generally not feasible as enterprise policies are designed to be enforced, and setting reliable exceptions for personal use within a managed browser is complex and less secure than using separate profiles.

NEW QUESTION # 24

An administrator wants users to have the ability to install extensions of their choosing. However, due to company security policies, the administrator cannot allow any extension to be installed that has the ability to read documents on the local drive. Which policy combination best meets the administrator's need?

- A. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: C:*
- B. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: file:///*
- C. Chrome Webstore: Allow all apps, admin manages blocklist; Block extensions by permission: File System
- D. Chrome Webstore: Block all apps, admin manages allowlist; Block extensions by permission: Sync File System

Answer: C

Explanation:

To allow users to install extensions while blocking those with specific risky permissions, the administrator should "Allow all apps" from the Chrome Web Store and then use the "Block extensions by permission" policy to block extensions that request the "File System" permission. This prevents extensions from accessing local files. Option A is too restrictive by blocking all apps by default. Options B and D use "Runtime Blocked Hosts," which is for controlling access to specific websites, not for blocking extension permissions.

NEW QUESTION # 25

.....

Now you can think of obtaining any Google certification to enhance your professional career. RealExamFree's study guides are your best ally to get a definite success in Chrome-Enterprise-Administrator exam. The guides contain excellent information, exam-oriented questions and answers format on all topics of the certification syllabus. With 100% Guaranteed of Success: RealExamFree's
