We are stable and Reliable ChromeOS-Administrator Exam Questions providers for persons who need them for their exam. We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate. As for the safe environment and effective product, there are thousands of candidates are willing to choose our Professional ChromeOS Administrator Exam study question, why don't you have a try for our study materials, never let you down!

### Google Professional ChromeOS Administrator Exam Sample Questions (Q109-Q114):

#### NEW QUESTION # 109

You are migrating an organization from Windows devices. Part of the migration process involves setting up the existing suite of business applications for use with ChromeOS, leveraging cloud technologies whenever possible. Which of these would be the preferred option when choosing the type of solution to deploy?

- A. Go to the Google Play Store and deploy the Android client of the app in question.
- B. Write a tutorial on how to install each of the applications using the Linux terminal and ask users to follow those instructions when first using their new device.
- C. Check to see if there's a web application equivalent that provides all the necessary features and, if so, deploy the URL through the Admin console.
- D. Deploy the legacy client in a virtualization solution and use that to stream the application to the ChromeOS devices.

**Answer: C**

Explanation:

The best practice when migrating from Windows to ChromeOS is to utilize web applications whenever possible. Web apps offer seamless integration with ChromeOS, are easy to manage, and do not require local installation or compatibility adjustments.

Verified Answer from Official Source:

The correct answer is verified from the Google ChromeOS Migration Guide, which advises using web-based solutions for cross-platform compatibility and centralized management.

"When migrating from traditional desktop environments, prioritize using web applications that mirror the existing functionality, as they are compatible with ChromeOS and easy to manage." Web applications reduce the need for complex installations and provide access from any ChromeOS device, ensuring a smooth transition during migration.

Objectives:

- \* Migrate business applications efficiently to ChromeOS.
- \* Leverage cloud technologies for better compatibility.

#### NEW QUESTION # 110

A customer has a mission-critical workload running on ChromeOS and needs devices configured to reduce ChromeOS changes. How can an admin reduce the risk of an unexpected change in an OS update affecting the customer's entire ChromeOS device domain while maintaining security and minimizing admin workload?

- A. Enable variations
- B. Add an update rollout plan
- C. Force auto reboot after update
- D. Move to a Long-term Support channel

**Answer: B**

Explanation:

Update rollout plans in the Google Admin console allow administrators to gradually roll out ChromeOS updates to a subset of devices first. This allows for testing in a controlled environment before deploying to the entire fleet, reducing the risk of unexpected issues impacting all devices.

Steps to add an update rollout plan:

- \* Access Google Admin Console: Sign in with your administrator credentials.
- \* Navigate to Device Management: Go to Devices > Chrome > Settings > Updates.
- \* Create Rollout Plan: Click on "Add an update rollout plan."
- \* Select Devices: Choose the specific devices or organizational units (OUs) to include in the initial rollout.

- \* Set Timeline: Define the start and end dates for the rollout.
- \* Save and Apply: Save the plan and apply it to the selected devices.

### NEW QUESTION # 111

Your security team asks you to deploy on ChromeOS only a specific Android app for your security department. As a ChromeOS Administrator, you need to find a way to block all other Android apps except the one that you need. How are you going to proceed?

- A. On the "Users & Browser Settings" tab, for the Play Store, use the "Block all apps, admin manages allowlist" policy and allow only the
- B. From the "Apps & extensions" page add the Android app on the security team user OU
- C. From the "Apps & extensions" page add the Android app on the security team user OU and select "Force Install" pin to ChromeOS taskbar
- D. Android app that you want from "Apps & extensions" On the "Users & Browser Settings" tab, for the Chrome Web Store use the "Block all apps, admin manages allowlist" policy and allow only the Android app that you want on "Apps & extensions"

**Answer: A**

Explanation:

- \* Access Google Admin Console: Sign in to your Google Admin console.
- \* Navigate to Device Management: Go to Devices > Chrome > Settings > Users & browsers.
- \* Locate Play Store Settings: Find the section related to the Play Store.
- \* Enable Allowlist Policy: Activate the policy "Block all apps, admin manages allowlist."
- \* Add the Security App: Go to the "Apps & extensions" section and add the specific Android app that you want to allow for the security team's organizational unit (OU).

This configuration ensures that all other Android apps are blocked from installation on ChromeOS devices, except the specified security app. This provides granular control over app deployment and enhances security by preventing unauthorized app usage.

### NEW QUESTION # 112

As a ChromeOS Administrator, you are tasked with blocking incognito mode in the ChromeOS Browser. How would you prevent users from using incognito mode?

- A. Go to "User & Browser Settings" to restrict sign-in to pattern and "Disallow incognito mode"
- B. In "Enrollment Settings" disable vendor access and incognito mode (or content protection)
- C. From "Device Settings" change Kiosk settings to "Disallow incognito mode"
- D. Navigate to "Users & Browser Security Settings" and set the "Disallow incognito mode" policy

**Answer: D**

Explanation:

- \* Access the Google Admin Console: Sign in to the Admin console using your ChromeOS administrator credentials.
- \* Locate User Settings: Navigate to "Device Management" > "Chrome Management" > "User & browser settings".
- \* Find Incognito Mode Policy: Within the settings, search for "Incognito mode".
- \* Disable Incognito Mode: Select the option to "Disallow incognito mode".
- \* Save Changes: Click "Save" to apply the policy to the designated users or organizational units.

### NEW QUESTION # 113

Which management policy is missing within ChromeOS Flex vs ChromeOS?

- A. Remote Desktop
- B. SCEP
- C. Do Not Allow Powerwash
- D. Forced Re-enrollment

**Answer: C**

Explanation:

Verified Answer from Official Source:

Without the ability to block Powerwash, devices may be reset, resulting in the loss of enterprise settings and requiring re-enrollment.

Objectives:

\* Maintain device security through management policies.
