Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q74-Q79):

NEW QUESTION # 74

You have enrolled a new Google Meet hardware device for an existing conference room in your building. Your users report that the new hardware in the conference does not show the expected calendar events. You need to investigate and fix the problem. What should you do?

- A. Create a brand new resource calendar and associate the Meet Hardware with that new resource.
- B. Use the Meet Quality Tool in the control panel to search for the newly installed Meet Hardware.
- C. Make sure the Access permissions for the resource calendar is set to "See all event details".
- **D. Make sure that the conference room resource calendar has been created and that the Meet Hardware is associated with that resource.**

Answer: D

Explanation:

Make sure that the conference room resource calendar has been created and that the Meet Hardware is associated with that resource.

NEW QUESTION # 75

The nature of your organization's business makes your users susceptible to malicious email attachments. How should you implement a scan of all incoming email attachments?

- A. Configure a safety rule to protect against attachments with scripts from untrusted senders.
- **B. In the security sandbox section, enable virtual execution of attachments for the entire organization.**
- C. In the security sandbox section, enable virtual execution of attachments for (he targeted OU
- D. Configure a safety rule to protect against encrypted attachments from untrusted senders

Answer: B

Explanation:

To implement a scan of all incoming email attachments effectively, you should enable virtual execution of attachments in the security sandbox for the entire organization. This feature allows Google Workspace to execute attachments in a sandbox environment to detect malicious behavior before the email reaches the user's inbox. By applying this to the entire organization, you ensure that all users are protected regardless of their organizational unit.

NEW QUESTION # 76

Your organization has a data loss prevention (DLP) rule to detect and warn users about external sharing of sensitive files in Google Drive. You also want to prevent external users from downloading files with viewer permissions to their local machines. What should you do?

- A. Create a new DLP rule and set the scope to the organizational unit or group that you want to restrict
- B. Do nothing. View-only Drive files automatically prevent the user from downloading the files
- **C. Create a new DLP rule by using the existing content detector conditions but change the action for the new rule to Disable download, print, and copy for commenters and viewers**
- D. Modify the existing DLP rule to Disable download, print, and copy for commenters and viewers

Answer: C

Explanation:

* Access Admin Console: Log in to the Google Admin console using your administrator account.

* Navigate to DLP Rules: Go to Apps > Google Workspace > Drive and Docs > Data loss prevention.

- * Create a New Rule: Click on Create a rule and choose to start with a template or create a custom rule.
 - * Set Content Detector Conditions: Use the existing content detector conditions that identify sensitive files.
 - * Configure Actions: Set the action to Disable download, print, and copy for commenters and viewers. This ensures that external users with viewer permissions cannot download the files.
 - * Apply Rule to Relevant OUs/Groups: Set the scope of the rule to the specific organizational units or groups where you want this restriction to apply.
 - * Save and Implement: Save the rule and ensure it is activated. This will enforce the new restrictions for sensitive files shared externally.

NEW QUESTION # 77

The security team for your organization is concerned about phishing attacks against your end user base. What two actions should you take to configure the strongest possible preventative measure against phishing attacks?
Choose 2 answers

- A. Train end users to mark messages as spam when they see something suspicious.
- **B. Configure spoofing and authentication controls to quarantine messages that are perceived as threats**
- C. Enforce confidential mode for all messages sent and received from your Workspace domain
- **D. Configure spoofing and authentication controls to warn end users about messages that are perceived as threats.**
- E. Force encryption on all inbound and outbound emails from your Workspace domain.

Answer: B,D

Explanation:

- * Access Admin Console: Go to admin.google.com and sign in with your admin account.
 - * Navigate to Gmail Settings: In the Admin console, go to Apps > Google Workspace > Gmail > Safety.
 - * Configure Spoofing and Authentication Controls:
 - * Set up email authentication policies such as SPF, DKIM, and DMARC to verify incoming emails.
 - * Enable options to quarantine messages that fail authentication checks and are perceived as threats.
 - * Configure warnings for users to alert them about potentially harmful messages.
 - * Create Compliance Rules: Under the Gmail settings, create rules that quarantine suspicious emails and notify users when they receive messages that might be phishing attempts.
 - * Train Users: Educate users on how to recognize phishing attempts and the importance of marking suspicious emails as spam.
- By configuring these settings, you enhance the security against phishing attacks by both automatically handling suspected threats and making users aware of potential dangers.

References

- * Protect against spam and phishing with Gmail
- * Set up email authentication (SPF, DKIM, DMARC)

NEW QUESTION # 78

Your organization has upgraded to a Google Workspace edition with Vault and has hired a new audit team. You are configuring access for this audit team with these privileges:

Chief legal executive - reporting privileges

Legal audit manager - full Vault privileges

Data reviewer - searching privileges.

You must enable access for these three roles. What should you do?

- **A. Set up three different Admin roles with specific privileges that match the audit team's responsibilities. Assign these Admin roles to the respective users.**
- B. Assign Google Vault licenses to these users that allow all privileges required for access.
- C. Set up an Admin role with minimal Vault privileges and assign the role to all Vault users. Approve additional privileges that are requested through a formal approval process.
- D. Set up Google Vault service as On for these specific users.

Answer: A
