Google Professional-Cloud-Database-Engineer Exam Questions - Pass Your Exam In One Go

Getting the related Professional-Cloud-Database-Engineer certification in your field will be the most powerful way for you to show your professional knowledge and skills. However, it is not easy for the majority of candidates to prepare for the Professional-Cloud-Database-Engineer exam in order to pass it, if you are one of the candidates who are worrying about the exam now, congratulations, you can have our Professional-Cloud-Database-Engineer Study Tool. We can assure you that you can pass the exam as well as getting the related certification in a breeze with the guidance of our Professional-Cloud-Database-Engineer test torrent.

Our Professional-Cloud-Database-Engineer exam questions generally raised the standard of practice materials in the market with the spreading of higher standard of knowledge in this area. So your personal effort is brilliant but insufficient to pass the Google Cloud Certified - Professional Cloud Database Engineer exam and our Professional-Cloud-Database-Engineer test guide can facilitate the process smoothly & successfully. Our Google Cloud Certified - Professional Cloud Database Engineer practice materials are successful by ensuring that what we delivered is valuable and in line with the syllabus of this exam. And our Professional-Cloud-Database-Engineer Test Guide benefit exam candidates by improving their ability of coping the exam in two ways, first one is their basic knowledge of it.

Practice Professional-Cloud-Database-Engineer Test Online & Professional-Cloud-Database-Engineer Latest Braindumps Pdf

The training tools of Dumpleader contains exam experience and materials which are come up with by our IT team of experts. Also we provide exam practice questions and answers about the Google Professional-Cloud-Database-Engineer exam certification. Our Dumpleader's high degree of credibility in the IT industry can provide 100% protection to you. In order to let you choose to buy our products more peace of mind, you can try to free download part of the exam practice questions and answers about Google Certification Professional-Cloud-Database-Engineer Exam online.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q17-Q22):

NEW QUESTION # 17
You manage a production MySQL database running on Cloud SQL at a retail company. You perform routine maintenance on Sunday at midnight when traffic is slow, but you want to skip routine maintenance during the year-end holiday shopping season. You need to ensure that your production system is available 24/7 during the holidays. What should you do?

- A. Define a maintenance window on Sundays between 12 AM and 1 AM, and deny maintenance periods between November 1 and January 15.
- B. Create a Cloud Scheduler job to start maintenance at 12 AM on Sundays. Pause the Cloud Scheduler job between November 1 and January 15.

- C. Define a maintenance window on Sundays between 12 AM and 5 AM, and deny maintenance periods between November 1 and February 15.
- D. Build a Cloud Composer job to start a maintenance window on Sundays between 12 AM and 1AM, and deny maintenance periods between November 1 and January 15.

Answer: C

NEW QUESTION # 18
You are designing an augmented reality game for iOS and Android devices. You plan to use Cloud Spanner as the primary backend database for game state storage and player authentication. You want to track in-game rewards that players unlock at every stage of the game. During the testing phase, you discovered that costs are much higher than anticipated, but the query response times are within the SLA. You want to follow Google- recommended practices. You need the database to be performant and highly available while you keep costs low. What should you do?

- A. Use the Cloud Spanner query optimizer to determine the most efficient way to execute the SQL query.
- B. Manually scale down the number of nodes after the peak period has passed.
- C. Use granular instance sizing in Cloud Spanner and Autoscaler.
- D. Use interleaving to co-locate parent and child rows.

Answer: C

Explanation:
Granular instance is available in Public Preview. With this feature, you can run workloads on Spanner at as low as 1/10th the cost of regular instances,https://cloud.google.com/blog/products/databases/get-more-out-of- spanner-with-granular-instance-sizing

NEW QUESTION # 19
During an internal audit, you realized that one of your Cloud SQL for MySQL instances does not have high availability (HA) enabled. You want to follow Google-recommended practices to enable HA on your existing instance. What should you do?

- A. Use the gcloud instances patch command to update your existing Cloud SQL for MySQL instance.
- B. Create a new Cloud SQL for MySQL instance, enable HA, and use the export and import option to migrate your data.
- C. Shut down your existing Cloud SQL for MySQL instance, and enable HA.
- D. Create a new Cloud SQL for MySQL instance, enable HA, and use Cloud Data Fusion to migrate your data.

Answer: A

Explanation:
Creating a new instance and migrating data can be time-consuming and disruptive to your application's availability. Shutting down the existing instance is not a recommended approach, as it will cause downtime for your application.
The recommended approach is to use the gcloud instances patch command to enable high availability on your existing Cloud SQL for MySQL instance. This command updates the instance's configuration to enable the failover replica, configure it, and enable automatic failover.
By following this approach, you can ensure minimal downtime, and your application can continue to operate during the process.

NEW QUESTION # 20
Your company is migrating the existing infrastructure for a highly transactional application to Google Cloud.
You have several databases in a MySQL database instance and need to decide how to transfer the data to Cloud SQL. You need to minimize the downtime for the migration of your 500 GB instance. What should you do?

- A. Create a Cloud SQL for MySQL instance for your databases, and configure Datastream to stream your database changes to Cloud SQL.
  Select the Backfill historical data check box on your stream configuration to initiate Datastream to backfill any data that is out of sync between the source and destination.
  Delete your stream when all changes are moved to Cloud SQL for MySQL, and update your application to use the new instance.
- B. Create migration job using Database Migration Service.
  Set the migration job type to Continuous, and allow the databases to complete the full dump phase and start sending data in

- C. Use the mysqldump utility to manually initiate a backup of MySQL during the application maintenance window.
  Move the files to Cloud Storage, and import each database into your Cloud SQL instance.
  Continue to dump each database until all the databases are migrated.
  Update your application connections to the new instance.
- D. Create migration job using Database Migration Service.
  Set the migration job type to One-time, and perform this migration during a maintenance window.
  Stop all write workloads to the source database and initiate the dump. Wait for the dump to be loaded into the Cloud SQL destination database and the destination database to be promoted to the primary database.
  Update your application connections to the new instance.

Answer: B

Explanation:

NEW QUESTION # 21
You are managing a set of Cloud SQL databases in Google Cloud. Regulations require that database backups reside in the region where the database is created. You want to minimize operational costs and administrative effort. What should you do?

- A. Configure the automated backups to use a regional Cloud Storage bucket as a custom location.
- B. Disable automated backups, and create an on-demand backup routine to a regional Cloud Storage bucket.
- C. Use the default configuration for the automated backups location.
- D. Disable automated backups, and configure serverless exports to a regional Cloud Storage bucket.

Answer: B

NEW QUESTION # 22
......

You will notice the above features in the Google Professional-Cloud-Database-Engineer Web-based format too. But the difference is that it is suitable for all operating systems: Macs, Linux, iOS, Androids, and Windows. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Google Professional-Cloud-Database-Engineer Certification test. Above all, it operates on all browsers: Mozilla, Safari, Opera, Google Chrome, and Internet Explorer.
