

Google Valid Generative-AI-Leader Exam Question Exam 100% Pass | Latest Generative-AI-Leader Test Simulator

P.S. Free & New Generative-AI-Leader dumps are available on Google Drive shared by Test4Cram:
<https://drive.google.com/open?id=1Zlhfire8PnxnoFu8giSBybU4aKgW4Pcw>

If you are interested in Test4Cram's training program about Google certification Generative-AI-Leader exam, you can first on WWW.Test4Cram.COM to free download part of the exercises and answers about Google Certification Generative-AI-Leader Exam as a free try. We will provide one year free update service for those customers who choose Test4Cram's products.

Our Generative-AI-Leader learning materials provide multiple functions and considerate services to help the learners have no inconveniences to use our product. We guarantee to the clients if only they buy our Generative-AI-Leader study materials and learn patiently for some time they will be sure to pass the Generative-AI-Leader test with few failure odds. The price of our product is among the range which you can afford and after you use our study materials you will certainly feel that the value of the product far exceed the amount of the money you pay. Choosing our Generative-AI-Leader Study Guide equals choosing the success and the perfect service.

Latest Generative-AI-Leader Test Simulator & Generative-AI-Leader Certification Dumps

We can provide you with efficient online services during the whole day, no matter what kind of problems or consultants about our Generative-AI-Leader quiz torrent; we will spare no effort to help you overcome them sooner or later. First of all, we have professional staff with dedication to check and update our Generative-AI-Leader Exam Torrent materials on a daily basis, so that you can get the latest information from our Generative-AI-Leader exam torrent at any time. Besides our after-sales service engineers will be always online to give remote guidance and assistance for you on Generative-AI-Leader study questions if necessary.

Google Cloud Certified - Generative AI Leader Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39

A company wants to choose a generative AI (gen AI) use case that will be successful and have the most impact. What key factor should they determine first according to Google Cloud-recommended practices?

- A. The frequency of updates to the underlying foundation models used by different gen AI platforms.
- B. The availability of pre-trained models that are offered on various cloud computing platforms.
- C. The specific business problems the company aims to solve and the desired outcomes.
- D. The number of employees who will be trained to use the new gen AI tools.

Answer: C

Explanation:

According to Google's principles for successful AI adoption, organizations should adopt a "problem-first" approach to ensure their investments deliver measurable value. The strategic choice of a use case should always be motivated by a clear business imperative. Determining the specific business problems and desired outcomes (B) is the foundational step in any successful Gen AI strategy. Without a well-defined problem (e.g., "reduce customer response time by 30%") and a measurable desired outcome (e.g., "increase customer satisfaction scores"), any AI solution runs the risk of being a technology in search of a purpose, leading to limited adoption or failure to deliver meaningful ROI.

Options A, C, and D are considerations secondary to the initial strategic alignment:

Availability of models (C) only dictates the technical feasibility, not the business value.

Training employees (A) is a resource requirement, not the goal itself.

Model updates (D) is a technical concern related to model longevity, not the primary strategic driver for use case selection.

The priority is always to align the AI solution with high-value business objectives.

(Reference: Google Cloud Generative AI strategy guidelines state: "A fundamental principle for successful AI adoption, including generative AI, is to start with clear business problems and desired outcomes. Without a well-defined problem, the AI solution might not deliver meaningful value, regardless of the technology used. This 'problem-first' approach is crucial for impactful AI strategy.")

NEW QUESTION # 40

A global news agency is developing a generative AI tool to quickly summarize breaking news articles as they emerge online. The goal is to provide their audience with rapid updates on fast-developing stories from various global sources. What Google Cloud solution should they use?

- **A. Grounding with Google Search**
- B. BigQuery
- C. Vertex AI Natural Language API
- D. Document AI

Answer: A

Explanation:

For summarizing breaking news articles as they emerge online from various global sources, the generative AI model needs access to current, broad, and rapidly updating information. Grounding with Google Search allows the LLM to pull in the latest information from the web, ensuring the summaries are current and comprehensive. While Vertex AI Natural Language API can summarize text, it wouldn't inherently have access to the latest breaking news unless explicitly fed.

NEW QUESTION # 41

A company wants to choose a generative AI (gen AI) use case that will be successful and have the most impact. What key factor should they determine first according to Google Cloud-recommended practices?

- A. The frequency of updates to the underlying foundation models used by different gen AI platforms.
- B. The availability of pre-trained models that are offered on various cloud computing platforms.
- **C. The specific business problems the company aims to solve and the desired outcomes.**
- D. The number of employees who will be trained to use the new gen AI tools.

Answer: C

Explanation:

A fundamental principle for successful AI adoption, including generative AI, is to start with clear business problems and desired outcomes. Without a well-defined problem, the AI solution might not deliver meaningful value, regardless of the technology used. This "problem-first" approach is crucial for impactful AI strategy.

NEW QUESTION # 42

A company wants to adopt generative AI and is concerned about vendor lock-in. They want to maintain flexibility in their technology stack. What Google Cloud strength would ease their concerns?

- A. Google Cloud's AI solutions are pre-packaged for easy deployment, eliminating the need for customization and integration efforts.
- B. Google Cloud's strict adherence to proprietary technologies ensures the highest level of security and performance.
- **C. Google Cloud's AI solutions have an open approach that supports customer choice across offerings.**
- D. Google Cloud's focus on automation aims to replace human jobs with AI systems, potentially leading to significant workforce reductions.

Answer: C

Explanation:

Google Cloud promotes an open and flexible approach to its AI offerings, supporting open standards, open-source initiatives (like TensorFlow, Kubernetes, and Gemma), and providing various integration options. This helps alleviate vendor lock-in concerns by giving customers choice and control over their technology stack.

NEW QUESTION # 43

A company wants to use an AI agent to automate some tasks. They want everyone to understand the different functions of an AI agent. What is the function of an AI agent in the context of gen AI?

- **A. To analyze situations, use multiple tools, and make informed decisions without requiring constant human input.**
- B. To provide a user-friendly interface for interacting with gen AI models.
- C. To provide the computational resources needed to train and run gen AI models.
- D. To store and manage large datasets used for training and running gen AI models.

Answer: A

Explanation:

An AI agent, especially in the context of generative AI, is designed to be more autonomous and capable than a simple model. Its function is to understand a goal, analyze a situation, leverage various tools (including other generative AI models or external APIs), and make decisions or take actions to achieve that goal, often with minimal human intervention.

NEW QUESTION # 44

.....

There are some prominent features that are making the Google Generative-AI-Leader exam dumps the first choice of Google Generative-AI-Leader certification exam candidates. The prominent features are real and verified Google Cloud Certified - Generative AI Leader Exam (Generative-AI-Leader) exam questions, availability of Google Cloud Certified - Generative AI Leader Exam (Generative-AI-Leader) exam dumps in three different formats, affordable price, 1 year free updated Google Generative-AI-Leader exam questions download facility, and 100 percent Google Generative-AI-Leader exam passing money back guarantee.

Latest Generative-AI-Leader Test Simulator: https://www.test4cram.com/Generative-AI-Leader_real-exam-dumps.html

Google Valid Generative-AI-Leader Exam Question They have been devoting themselves to providing candidates with the best study materials to make sure what they get are valuable, Because Generative-AI-Leader latest pdf torrent can solve nearly all difficult problems you encounter in the process of preparing for the exam, Google Valid Generative-AI-Leader Exam Question In addition, we are pass guarantee and money back guarantee, Google Valid Generative-AI-Leader Exam Question If you master them with patience and regular practice, then when sitting in the seat of the exam you will feel like confident and at ease.

How do routers determine the best path, This Latest Generative-AI-Leader Test Simulator interactive command language was developed at AT&T Bell Laboratories by David Kom, They have been devoting themselves to providing Generative-AI-Leader candidates with the best study materials to make sure what they get are valuable.

Pass Guaranteed Quiz Google - High-quality Valid Generative-AI-Leader Exam Question

Because Generative-AI-Leader latest pdf torrent can solve nearly all difficult problems you encounter in the process of preparing for the exam, In addition, we are pass guarantee and money back guarantee.

If you master them with patience and regular Valid Generative-AI-Leader Exam Question practice, then when sitting in the seat of the exam you will feel like confident and at ease, As we have so many customers passed the Generative-AI-Leader study questions, the pass rate is high as 98% to 100%.
