And most of the information of other websites comes mainly from Pass4cram.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q87-Q92):

NEW QUESTION # 87

A large enterprise that had a security breach is working with an external legal team to determine best practices for an investigation. Using Google Vault, the security team is tasked with exporting data for review by the legal team. What steps should you take to securely share the data in question?

- A. Suspend the user's account, search all associated users data in Google Vault, and export the data.

- B. Immediately suspend the user's account, search for all the email messages in question, and forward to the legal team.
- **C. Determine the scope of the investigation, create a Matter and Holds in Google Vault, and share with the legal team.**
- D. Immediately suspend the user's account, assign an archived user license, and export data.

Answer: C

NEW QUESTION # 88

An employee at your organization is experiencing video call issues in Google Meet and they were unable to resolve the issues by themselves. You need to troubleshoot the issue. What should you do first?

- **A. View the Meet quality report of the employee**
- B. Check the Meet settings of the employee
- C. Ask your network administrator to add the dedicated Meet IP address range for your users
- D. Restart the device of the employee

Answer: A

Explanation:

- * Access Admin Console: Log in to the Google Admin console using your administrator account.
- * Navigate to Meet Quality Tool: Go to Apps > Google Workspace > Google Meet > Meet quality tool.
- * Search for the Employee: Use the search function to locate the employee's recent meeting reports.
- * Analyze the Report: Review the quality report, which includes metrics such as network connectivity, audio and video quality, and any issues encountered during the call.
- * Identify and Troubleshoot Issues: Based on the report findings, identify the specific issues affecting the video calls and take appropriate actions to resolve them, such as checking network connections or adjusting Meet settings.

NEW QUESTION # 89

In the years prior to your organization moving to Google Workspace, it was relatively common practice for users to create consumer Google accounts with their corporate email address (for example, to monitor Analytics, manage AdSense, and collaborate in Docs with other partners who were on Google Workspace.) You were able to address active employees' use of consumer accounts during the rollout, and you are now concerned about blocking former employees who could potentially still have access to those services even though they don't have access to their corporate email account.

What should you do?

- A. Provide a list of all active employees to the managers of your company's Analytics, AdSense, etc. accounts, so they can clean up the respective access control lists.
- B. Provision former user accounts with Cloud Identity licenses, generate a new Google password, and place them in an OU with all Google Workspace and Other Google Services disabled.
- **C. Use the Transfer Tool for Unmanaged Accounts to send requests to the former users to transfer their account to your domain as a managed account.**
- D. Contact Google Enterprise Support to provide a list of all accounts on your domain(s) that access non-Google Workspace Google services and have them blocked.

Answer: C

NEW QUESTION # 90

Your company's security team has requested two requirements to secure employees' mobile devices- enforcement of a passcode and remote account wipe functionality. The security team does not want an agent to be installed on the mobile devices or to purchase additional licenses. Employees have a mix of iOS and Android devices. You need to ensure that these requirements are met. What should you do?

- **A. Set up advanced management for both iOS and Android devices.**

- B. Set up advanced mobile management for iOS devices and basic mobile management for Android devices.
- C. Implement a third-party enterprise mobility management (EMM) provider.
- D. Set up basic management for both iOS and Android devices.

Answer: A

Explanation:

Advanced mobile management in Google Workspace provides the necessary features for securing mobile devices without the need for third-party apps or additional licenses. This includes enforcing passcodes and enabling remote account wipe functionality for both iOS and Android devices. Advanced management ensures that both security requirements are met while keeping the setup efficient and within the organization's existing licenses.

NEW QUESTION # 91

Your company is transitioning to Google Workspace from legacy communication and collaboration applications. User accounts are managed in Active Directory and synced to Google Workspace by using Google Cloud Directory Sync (GCDS). Your company is implementing a new security policy for all accounts that requires complex passwords. Passwords must be at least 20 characters long, contain 3 symbols, 4 numbers, and 2 capital letters.

You need to enforce the new password policy in Google Workspace. What should you do?

- A. Create a password policy in Active Directory. Install Password Sync on the global catalog servers for Active Directory and require a password change for your users.
- B. Share the instructions for changing a Google account password with your users. Monitor password strength in the Google Admin console as users change their passwords.
- C. Enable strong password enforcement and require a minimum length of 20 characters at the top-level organizational unit.
- **D. Create a password policy in Active Directory. Enable password synchronization in GCDS.**

Answer: D

Explanation:

Since user accounts are managed in Active Directory (AD) and synced to Google Workspace via Google Cloud Directory Sync (GCDS), the best approach to enforce the new password policy is to create the password policy within Active Directory and then enable password synchronization in GCDS. This ensures that the complex password requirements are enforced within AD, and when passwords are updated, they will be synchronized with Google Workspace, maintaining consistency across both systems.

NEW QUESTION # 92

.....

To cope with the fast growing market, we will always keep advancing and offer our clients the most refined technical expertise and excellent services about our Google-Workspace-Administrator exam questions. In the meantime, all your legal rights will be guaranteed after buying our Google-Workspace-Administrator Study Materials. For many years, we have always put our customers in top priority.
