- B. 4738 for account modification
- C. 4726 for account deletion
- D. 4662 for access to an object
- E. 4720 for account creation

Answer: B,C,E

NEW QUESTION # 133

Your organization recently experienced an attack that went undetected for several weeks. Upon reviewing the logs, you discover that multiple failed login attempts were ignored, and a brute-force attack eventually succeeded. The attacker escalated privileges and made unauthorized changes to several accounts.

Which of the following actions should you take to improve log monitoring and prevent future incidents?

(Choose Three)

Response:

- A. Implement multi-factor authentication (MFA) to reduce the risk of account compromise
- B. Rely only on manual log reviews conducted quarterly
- C. Disable all logging to improve system performance
- D. Set up alerts for failed login attempts and privilege escalation events
- E. Regularly review and analyze event logs using a SIEM tool

Answer: A,D,E

NEW QUESTION # 134

When testing analytics models, which of the following methods is crucial for assessing their performance?

(Choose Two)

Response:

- A. Evaluation on unseen data
- B. Cross-validation
- C. Consistent use of a single metric for all model types
- D. Testing only on the training dataset

Answer: A,B

NEW QUESTION # 135

What is an effective strategy for Blue Teams to enhance their operational efficiency through training?

Response:

- A. Providing the same generic training to all team members
- B. Conducting regular, role-specific training exercises
- C. Limiting training to senior team members to conserve resources
- D. Focusing training exclusively on new hires

Answer: B

NEW QUESTION # 136

Your organization has deployed endpoint security tools across all user devices. Recently, one of the senior executives noticed a significant slowdown in their device's performance. Upon investigation, you discover that a resource-intensive application was installed without proper authorization. This behavior seems unusual, and you suspect a potential security incident.

What steps should your team take to mitigate this issue and prevent future incidents?

(Choose Three)

Response:

- A. Re-image the device to restore it to its original state
- B. Ignore the incident since it only affected one device
- **C. Conduct a full forensic analysis to determine the source and impact of the unauthorized application**
- **D. Review and strengthen endpoint application control policies to prevent unauthorized software installation**
- **E. Isolate the device from the network to prevent further spread of potential malware**

Answer: C,D,E

NEW QUESTION # 137

.....
