

Guaranteed GitHub-Copilot Success & GitHub-Copilot Guaranteed Questions Answers

BONUS!!! Download part of Getcertkey GitHub-Copilot dumps for free: <https://drive.google.com/open?id=1fSyD2API8cG7GN9T0QnNDaLLKpePJJoCz>

As you may see the data on the website, our sales volumes of our GitHub-Copilot exam questions are the highest in the market. You can browse our official websites to check our sales volumes. At the same time, many people pass the exam for the first time under the guidance of our GitHub-Copilot Practice Exam. And there is no exaggeration that our pass rate for our GitHub-Copilot study guide is 98% to 100% which is proved and tested by our loyal customers.

GitHub GitHub-Copilot Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Developer Use Cases for AI: This section of the exam measures skills of Full-Stack Developers and Cloud Engineers and covers how AI enhances developer productivity across various tasks such as learning new programming languages, debugging, writing documentation, and refactoring code. It discusses how GitHub Copilot integrates with the Software Development Lifecycle (SDLC) and its role in modernizing legacy applications. It also highlights the use of AI for personalized responses, sample data generation, and improving overall efficiency in software development.
Topic 2	<ul style="list-style-type: none">Testing with GitHub Copilot: This section of the exam measures skills of QA Engineers and Test Automation Specialists and covers AI-assisted testing methodologies, including the generation of unit tests, integration tests, and edge case detection. It explains how GitHub Copilot improves test effectiveness by suggesting relevant assertions and boilerplate test cases. The section also discusses privacy considerations, organizational code suggestion settings, and best practices for configuring GitHub Copilot's testing features.
Topic 3	<ul style="list-style-type: none">Prompt Engineering: This section of the exam measures skills of AI Engineers and Software Developers and covers the fundamentals of prompt engineering, including key principles, techniques, and best practices for generating high-quality outputs. It explains different prompting strategies such as zero-shot and few-shot prompting, how context influences AI-generated responses, and the role of structured prompts in guiding Copilot's behavior. It also discusses the prompt lifecycle and ways to enhance model performance through refined input instructions.
Topic 4	<ul style="list-style-type: none">Responsible AI: This section of the exam measures the skills of AI Ethics Analysts and AI Developers and covers the principles of responsible AI usage, the risks associated with AI, and the limitations of generative AI tools. It includes the importance of validating AI-generated outputs and operating AI systems responsibly. It also explores potential harms such as bias, privacy concerns, and fairness issues, along with methods to mitigate these risks. The ethical considerations of AI development and deployment are also discussed.

For quick and complete GitHub Copilot Certification Exam (GitHub-Copilot) exam preparation you can trust Getcertkey GitHub Copilot Exam Questions. With the GitHub Copilot practice test questions you can ace your GitHub Copilot Certification Exam (GitHub-Copilot) exam preparation and be ready to perform well in the final GitHub Copilot certification exam.

GitHub Copilot Certification Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

How does GitHub Copilot suggest code optimizations for improved performance?

- A. By enforcing strict coding standards that ensure optimal performance.
- B. By automatically rewriting the codebase to use more efficient code.
- C. By providing detailed reports on the performance of the codebase.
- **D. By analyzing the codebase and suggesting more efficient algorithms or data structures.**

Answer: D

Explanation:

GitHub Copilot suggests code optimizations by analyzing the codebase and recommending more efficient algorithms or data structures.

NEW QUESTION # 64

Which of the following GitHub Copilot Business related activities can be tracked using the organization audit logs?

- A. Accepted chat suggestions
- **B. Changes to content exclusion settings**
- C. Suggestions blocked by duplication detection filtering
- D. Code suggestions made by GitHub Copilot

Answer: B

NEW QUESTION # 65

How long does GitHub retain Copilot data for Business and Enterprise? (Each correct answer presents part of the solution. Choose two.)

- **A. User Engagement Data: Kept for Two Years**
- B. Prompts and Suggestions: Not retained
- **C. Prompts and Suggestions: Retained for 28 days**
- D. User Engagement Data: Kept for One Year

Answer: A,C

Explanation:

For GitHub Copilot Business and Enterprise, prompts and suggestions are retained for 28 days to provide context and improve the service. User engagement data, which includes usage patterns and interactions, is kept for two years. This data retention policy is designed to balance service improvement with user privacy.

NEW QUESTION # 66

What are the effects of content exclusions? (Each correct answer presents part of the solution. Choose two.)

- A. The excluded content is no longer used while debugging the code.
- B. The IDE will not count coding suggestions in the excluded content.

- C. The excluded content is not directly available to GitHub Copilot to use as context.
- D. GitHub Copilot suggestions are no longer available in the excluded files.

Answer: C,D

Explanation:

Content exclusions prevent GitHub Copilot from using the excluded content as context and stop suggestions from being generated in those files.

NEW QUESTION # 67

How can you use GitHub Copilot to get inline suggestions for refactoring your code? (Select two.)

- A. By adding comments to your code and triggering a suggestion.
- B. By highlighting the code you want to fix, right-clicking, and selecting "Fix using GitHub Copilot."
- C. By highlighting the code you want to fix, right-clicking, and selecting "Refactor using GitHub Copilot."
- D. By running the gh copilot fix command.
- E. By using the "/fix" command in GitHub Copilot in-line chat.

Answer: A,C

Explanation:

You can use GitHub Copilot for inline refactoring suggestions by adding comments to your code to trigger suggestions and by highlighting the code and selecting "Refactor using GitHub Copilot" from the context menu.

NEW QUESTION # 68

.....

The GitHub Copilot Certification Exam (GitHub-Copilot) practice questions give you a feeling of a real exam which boost confidence. Practice under real GitHub Copilot Certification Exam (GitHub-Copilot) exam situations is an excellent way to learn more about the complexity of the GitHub Copilot Exam Dumps. You can learn from your GitHub Copilot Certification Exam (GitHub-Copilot) practice test mistakes and overcome them before the actual GitHub-Copilot exam.
