

Guide Huawei H12-725_V4.0 Torrent, Latest H12-725_V4.0 Exam Tips

DOWNLOAD the newest DumpsReview H12-725_V4.0 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=19Uof0MMFu8mJD_fTrfuFtWsUGRdAcis

What we attach importance to in the transaction of latest H12-725_V4.0 quiz prep is for your consideration about high quality and efficient products and time-saving service. We treasure time as all customers do. Therefore, fast delivery is another highlight of our latest H12-725_V4.0 quiz prep. We are making efforts to save your time and help you obtain our product as quickly as possible. We will send our H12-725_V4.0 Exam Guide within 10 minutes after your payment. You can check your mailbox ten minutes after payment to see if our H12-725_V4.0 exam guide are in.

You won't find verified H12-725_V4.0 exam dumps questions to prepare for HCIP-Security V4.0 anywhere. We have H12-725_V4.0 PDF questions dumps that include all the question answers you need for passing the H12-725_V4.0. Moreover, we have H12-725_V4.0 practice test software for a H12-725_V4.0 prep that allows you to go through real feel of an exam. It also allows you to assess yourself and test your HCIP-Security V4.0 skills. On all of our practice test and preparation material for the H12-725_V4.0, we provide 100% money back guarantee. If our products fail to deliver, you can get your money back.

Latest H12-725_V4.0 Exam Tips - H12-725_V4.0 Hottest Certification

Learning our H12-725_V4.0 study materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues. Just come to our website and pick the H12-725_V4.0 training engine. And you will become the best with our H12-725_V4.0 learning questions.

Huawei HCIP-Security V4.0 Sample Questions (Q47-Q52):

NEW QUESTION # 47

If a Portal authentication user goes offline but neither the access device nor the RADIUS server detects this event, many problems may occur. To prevent this from occurring, the access device needs to detect a user logout immediately, delete the user entry, and instruct the RADIUS server to stop accounting.

Which of the following can trigger a Portal user logout?(Select All that Apply)

- A. The user initiates a logout request.
- B. The authentication server logs out the user.
- C. The access device logs out the user.
- D. The Portal server logs out the user.

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed Explanation:

- * Portal authentication requires active session monitoring.
- * User logout can be triggered by multiple methods:
 - * A. Portal server logout# The Portal system forcefully logs out a user.
 - * B. Authentication server logout# The authentication system revokes access.
 - * C. User-initiated logout# The user manually logs out via a Portal page.
 - * D. Access device logout# If the firewall detects inactivity, it can remove the session.
- * Why are all options correct?
- * Each method can trigger a user logout in Portal authentication.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Portal Authentication Logout Mechanisms

NEW QUESTION # 48

If data filtering is configured on the firewall but is not correctly referenced in the security policy, the data that should be blocked can still be transmitted normally.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

- * Firewalls enforce security policies based on rules defined by the administrator.
- * Data filtering rules must be explicitly referenced in security policies to take effect.
- * Why is this statement true?
- * If a filtering rule exists but is not linked to a security policy, it will not apply to network traffic.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Data Filtering Policy Configuration

NEW QUESTION # 49

Which of the following statements is false about hot standby networking?(Select All that Apply)

- A. In active/standby mode, configuration commands and status information are backed up from the active device to the standby device.
- B. In load-sharing mode, both devices process traffic. Therefore, this mode supports more peak traffic than the active/standby or mirroring mode.
- C. In load-sharing mode, configuration commands can be backed up only from the configuration standby device to the configuration active device.
- D. In load-sharing mode, both firewalls are active. Therefore, if both firewalls synchronize commands to each other, commands may be overwritten or conflict with each other.

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation:

- * Hot standby networking ensures high availability by keeping a backup firewall ready in case of failure.
- * Two main modes exist:
 - * Active/Standby Mode# One firewall is active, and the other remains standby. Configuration is synchronized from active # standby.
 - * Load-Sharing Mode# Both firewalls process traffic simultaneously, improving performance.
- * Why is A false?
- * In Load-Sharing Mode, both firewalls are active, but configuration synchronization does not cause conflicts. Instead, the firewalls synchronize states properly.
- * Why is D false?
- * In Load-Sharing Mode, configuration is always synchronized from the active firewall to the standby firewall, not the other way around.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Hot Standby Configuration
- * Huawei USG Firewalls High Availability Guide

NEW QUESTION # 50

Which of the following statements is true about the outgoing traffic in the firewall virtual system?

- A. Traffic from the public network interface to the private network interface is limited by the outbound bandwidth.
- **B. Traffic from the private network interface to the public network interface is limited by the outbound bandwidth.**
- C. Traffic from the public network interface to the private network interface is limited by the inbound bandwidth.
- D. Traffic from the private network interface to the public network interface is limited by the inbound bandwidth.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

* Inbound bandwidth= Traffic entering the firewall.

* Outbound bandwidth= Traffic leaving the firewall.

* Correct answer:

* A. Private # Public traffic is controlled by outbound bandwidth.

* Why are the other options incorrect?

* B is incorrect because public # private traffic is controlled by inbound bandwidth, not outbound.

* C is incorrect because inbound bandwidth does not apply to private # public traffic.

* D is incorrect because public # private traffic is controlled by inbound bandwidth.

HCIP-Security References:

* Huawei HCIP-Security Guide # Firewall Virtual System Bandwidth Control

NEW QUESTION # 51

In the figure, if 802.1X authentication is used for wired users on the network, the network admission device and terminals must be connected through a Layer 2 network.

Options:

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Understanding 802.1X Authentication in Wired Networks:

* 802.1X is a port-based network access control (PNAC) protocol that requires a Layer 2 connection between the supplicant (PC), the authenticator (switch), and the authentication server (e.g., RADIUS server).

* In wired networks, 802.1X authentication occurs at the Ethernet switch (Layer 2 device), which enforces authentication before allowing network access.

Why Must the Network Be Layer 2?

* 802.1X authentication operates at Layer 2 (Data Link Layer) before any IP-based communication (Layer 3) occurs.

* If the authentication device and user terminal were on different Layer 3 networks, the authentication packets (EAPOL - Extensible Authentication Protocol Over LAN) would not be forwarded.

* In the figure, the authentication control point is at the aggregation switch, which means the PC and switch must be in the same Layer 2 domain.

Components of 802.1X Authentication in the Figure:

* Supplicant (PC) # The device requesting network access.

* Authenticator (Aggregation Switch) # The switch controlling access to the network based on authentication results.

* Authentication Server (iMaster NCE-Campus & AD Server) # Verifies user credentials and grants or denies access.

* Layer 2 Connectivity Requirement # The PC must be in the same Layer 2 network as the Authenticator to communicate via EAPOL.

Why "TRUE" is the Correct answer:

* 802.1X authentication is performed before IP addresses are assigned, meaning it can only operate in a Layer 2 network.

* EAPOL (Extensible Authentication Protocol Over LAN) messages are not routable and must stay within a single Layer 2 broadcast domain.

* In enterprise networks, VLAN-based 802.1X authentication is often used, where authenticated users are assigned to a specific VLAN.

HCIP-Security References:

* Huawei HCIP-Security Guide # 802.1X Authentication in Enterprise Networks

* Huawei iMaster NCE-Campus Documentation # Authentication Control and NAC Deployment

* IEEE 802.1X Standard Documentation # Layer 2 Network Authentication

NEW QUESTION # 52

.....

It doesn't matter if it's your first time to attend H12-725_V4.0 practice test or if you are freshman in the IT certification test, our latest H12-725_V4.0 dumps guide will boost your confidence to face the challenge. Our dumps collection will save you much time and ensure you get high mark in H12-725_V4.0 Actual Test with less effort. Come and check the free demo in our website you won't regret it.

Latest H12-725_V4.0 Exam Tips: https://www.dumpsreview.com/H12-725_V4.0-exam-dumps-review.html

Interactive and easy H12-725_V4.0 exam dumps, Huawei Guide H12-725_V4.0 Torrent Yes, We offer some discounts to our customers, Huawei Guide H12-725_V4.0 Torrent Qualifying customers can find your offer under the "Special Offers" tab in your account, Huawei Guide H12-725_V4.0 Torrent Fast, easy and secure payments, (H12-725_V4.0 actual exam) If your answer is yes, we hold the view that we can help you out of the bad situation.

In this chapter, you'll learn why Google+ is the H12-725_V4.0 most important online tool next to your website and how to convince your boss or board, In implicit sampling, a sample measurement is triggered Latest H12-725_V4.0 Exam Tips by the signal attaining some specified value or crossing some specified threshold.

Quiz Huawei - Latest H12-725_V4.0 - Guide HCIP-Security V4.0 Torrent

Interactive and easy H12-725_V4.0 Exam Dumps, Yes, We offer some discounts to our customers, Qualifying customers can find your offer under the "Special Offers" tab in your account.

Fast, easy and secure payments, (H12-725_V4.0 actual exam) If your answer is yes, we hold the view that we can help you out of

the bad situation.
