Huawei HCIP-Collaboration V4.0 Sample Questions (Q22-Q27):**NEW QUESTION # 22**

In the collaboration solution architecture, which of the following network elements are deployed at the media processing layer?
(Choose all that apply.)

- A. CloudRSE
- B. Box 310
- C. VP9860
- D. SMC

Answer: A,C

Explanation:

The media processing layer handles core media functions such as audio/video encoding, decoding, mixing, recording, and streaming. The VP9860 is Huawei's MCU media server - deployed precisely in this media processing (media switching) layer to provide high-density encoding/decoding and mixing capabilities. CloudRSE (Cloud Recording & Streaming Engine) delivers recording and streaming services, which are also key media processing functions within this layer.

NEW QUESTION # 24

An endpoint is disconnected from a conference due to a power failure. After the endpoint is powered on again, it is not called to the conference again, and the SMC does not detect that the endpoint is disconnected. The SMC O&M engineer finds that this fault is caused by the "Timeout for hang-up upon no code streams" parameter on the CloudMCU. Which of the following parameter values may cause this fault? (Choose all that apply.)

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B,D

Explanation:

Setting the timeout to 0 or -1 disables the automatic hang-up when no media streams are received, so the MCU never tears down the call and SMC doesn't detect the endpoint has dropped.

NEW QUESTION # 25

- A. Delete user configuration.
- B. Change the default password.
