

H12-323_V2.0 Prüfungsaufgaben - H12-323_V2.0 Exam Fragen

Download Huawei H12-323_V2.0-ENU Exam Dumps for best preparation

1. The CloudCampus APP mainly includes two functional modules: network and tools.

Which of the following descriptions of the functions under the tool module is wrong?

- A. Check terminal: obtain information about illegally accessed terminals
- B. Wi-Fi status: You can view the current Wi-Fi status information, such as signal strength, channel, negotiation rate, etc.
- C. Game test: Test network jitter and packet loss rate
- D. Test network speed: only supports Internet speed test

Answer: D

2. A user views the domain management template information on WAC as follows. Which of the following descriptions is wrong?

- A. The current 4.9G frequency band is not enabled
- B. The current country code is China's country code. If you want to change it, you can use the command country-code to configure it.
- C. The current 5G RF tuning bandwidth is 20 MHz
- D. The current channel loading mode is outdoor mode

Answer: A

3. When there are many users in the WLAN network, such as in high-density scenarios, as the number of online users increases, the fierce competition for channels between users leads to poor Internet access quality for each user. In order to ensure the Internet access experience of online users, the user connection admission control (CAC) function can be deployed.

Which of the following descriptions about the user CAC function is wrong?

- A. CAC uses two thresholds to control the access of new users and roaming users respectively.
- B. When a roaming user accesses the radio, the roaming user can access the radio as long as the roaming user threshold is not reached.
- C. When most users use the same service type and the service traffic is average, it is recommended to use the user CAC function based on terminal SNR
- D. When a new user accesses, the AP checks whether the current number of users or the terminal signal-to-noise ratio reaches the threshold for new users. If so, the new user's access is denied and the SSID can be hidden.

Answer: C

4. CampusInsight supports application analysis, monitors network-wide applications, and visualizes overview data such as application numbers and traffic. This function relies on the device reporting traffic statistics to CampusInsight, which supports two types of traffic statistics reporting: NetStream-based reporting and application-based reporting.

When selecting application-based reporting, which of the following functions needs to be enabled on the wireless controller?

- A. DFI
- B. RF Tuning
- C. SAC
- D. DA channel scan

Answer: C

https://drive.google.com/open?id=1lfXJ_MakIz6jmuPH58Aeyon0DQt2vW4U

Die IT-Eliten aus unserem EchteFrage haben große Mühe gegeben, um den breiten Kandidaten die neuesten Fragenkataloge zur Huawei H12-323_V2.0 Zertifizierungsprüfung zu bieten und um die Genauigkeit der Testaufgaben zu erhöhen. Wenn Sie EchteFrage wählen, können Sie die Huawei H12-323_V2.0 Zertifizierungsprüfung leichter bestehen. Außerdem werden Sie einjährige Aktualisierung genießen, nachdem Sie die Fragenkataloge zur Huawei H12-323_V2.0 Zertifizierungsprüfung gekauft haben.

Ein zertifizierter HCIP-WLAN-Profi zu werden, kann eine Reihe von Karrieremöglichkeiten für Fachkräfte eröffnen. Mit dem raschen Wachstum von drahtlosen Technologien sind WLAN -Fachkräfte in verschiedenen Branchen, einschließlich Gesundheitsversorgung, Bildung, Gastgewerbe und Einzelhandel, sehr gefragt. Durch die Bestimmung der Huawei H12-323_V2.0 (HCIP-WLAN V2.0) können Fachleute ihr Wissen und ihre Fähigkeiten in WLAN-Technologien demonstrieren und ihre Karriereöglichkeiten erhöhen.

H12-323_V2.0 Exam Fragen - H12-323_V2.0 Exam

Wenn Sie in kurzer Zeit mit weniger Mühe sich ganz effizient auf die Huawei H12-323_V2.0 Zertifizierungsprüfung vorbereiten, benutzen Sie doch schnell die Schulungsunterlagen zur Huawei H12-323_V2.0 Zertifizierungsprüfung. Sie werden von der Praxis bewährt. Viele Kandidaten haben bewiesen, dass man mit der Hilfe von EchteFrage die Prüfung 100% bestehen können. Mit EchteFrage können Sie Ihr Ziel erreichen und die beste Effekte erzielen.

Die Huawei H12-323_V2.0-Prüfung deckt eine Reihe von Themen ab, darunter WLAN-Planung und -Design, WLAN-Bereitstellung und -Optimierung, WLAN-Fehlerbehebung und Wartung sowie WLAN-Sicherheit. Die Prüfung deckt auch erweiterte WLAN-Technologien wie Cloud-Management, standortbasierte Dienste und IoT-Integration (Internet of Things) ab.

Huawei HCIP-WLAN V2.0 H12-323_V2.0 Prüfungsfragen mit Lösungen (Q379-Q384):

379. Frage

In the "Manufacturer Customization" page of the ClouCaspus APP, WLAN project delivery engineers can use the "Hardware Quality Inspection" function to check whether the installed hardware devices meet the hardware installation standards.

- A. False
- **B. True**

Antwort: B

380. Frage

In the medical infusion hall scenario, the indoor floor height is 35 meters, the user distribution is 2 square meters per person, and the business types include web browsing, games, videos, and instant messaging.

Which of the following network deployment suggestions for this scenario is wrong?

- **A. It is recommended to use indoor directional AP and wall mount it.**
- B. Install the AP away from interference sources
- C. It is recommended to deploy APs at equal intervals of 15 to 18 meters
- D. It is recommended to install the AP at least 3 meters away from the load-bearing column.

Antwort: A

381. Frage

In network capacity design, which of the following is not a consideration for capacity setting?

- A. Number of access users
- **B. AP point**
- C. Access concurrency rate
- D. User bandwidth requirements

Antwort: B

382. Frage

When planning WLAN in medium and large networks, in order to prevent the WLAN broadcast domain from being too large and causing broadcast storms, the single service VLAN broadcast domain should be kept as small as possible.

- A. False
- **B. True**

Antwort: B

383. Frage

When an engineer is optimizing the network, in order to prevent non-critical services from occupying too much network resources, he configures the QoS function based on the application protocol. The specific configuration is as follows.

Which of the following descriptions of configuration is wrong?

- A. You can view protocol statistics based on VAP
- B. SkypeForBusiness's DSCP priority is 40
- C. All apps in the specified app list discard FaceTime messages
- D. You can view user-based protocol statistics

Antwort: A

384. Frage
