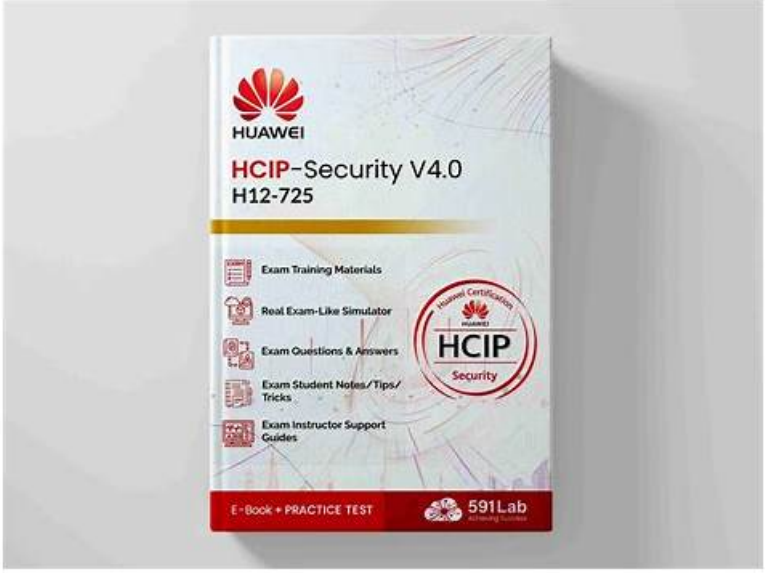
H12-725_V4.0 Cert & H12-725_V4.0 Exam Questions Fee



Dear every IT candidates, here, I will recommend ActualTorrent H12-725_V4.0 exam training material to all of you. If you use Huawei H12-725_V4.0 test bootcamp, you will not need to purchase anything else or attend other training. We promise that you can pass your H12-725_V4.0 Certification at first attempt. The high pass rate has helped lots of IT candidates get their IT certification. In case of failure, we promise to give you full refund. No help, full refund!

Huawei H12-725_V4.0 (HCIP-Security V4.0) Certification Exam is a professional-level certification exam that is designed to validate the skills and knowledge of candidates in the field of cybersecurity. HCIP-Security V4.0 certification is highly sought after by IT professionals who are looking to demonstrate their expertise in securing enterprise-level networks and infrastructure. H12-725_V4.0 exam covers a wide range of topics, including network security, firewall technology, intrusion detection and prevention, and more.

Huawei H12-725_V4.0 (HCIP-Security V4.0) exam is designed to test the security skills and knowledge of IT professionals. H12-725_V4.0 exam is intended for individuals who have experience in network security and want to enhance their skills to a higher level. The Huawei H12-725_V4.0 certification is an important certification for IT professionals who want to advance their careers in the field of network security.

H12-725_V4.0 Exam Questions Fee | Valid Exam H12-725_V4.0 Preparation

We aim to provide the best service on H12-725_V4.0 exam questions for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, though our H12-725_V4.0 study guide and compiling processes have been of the highest quality. We are deeply committed to meeting the needs of our customers, and we constantly focus on customer's satisfaction. We play an active role in making every customer in which we selling our H12-725_V4.0 practice dumps a better place to live and work.

Huawei H12-725_V4.0 (HCIP-Security V4.0) Exam is an important certification for security professionals who want to advance their career in the field of security. HCIP-Security V4.0 certification is recognized globally and is highly valued by employers. H12-725_V4.0 exam is designed to validate the skills and knowledge of the candidates in the field of security and to ensure that they are able to handle complex security issues in real-world scenarios. HCIP-Security V4.0 certification also provides a competitive edge to the candidates in the job market, as it demonstrates their expertise and proficiency in security technologies and solutions.

Huawei HCIP-Security V4.0 Sample Questions (Q57-Q62):

NEW QUESTION # 57
Which of the following statements is false about RADIUS and HWTACACS?

- A. Both of them use shared keys to encrypt user information.

- B. Both of them use the client/server model.
- C. Both of them support authorization of configuration commands.
- D. Both of them feature good flexibility and extensibility.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
* RADIUS and HWTACACS are AAA (Authentication, Authorization, and Accounting) protocols, but they have key differences:
* RADIUS# Encrypts only passwords (not the entire message).
* HWTACACS# Encrypts the entire packet, providing better security.
* Command authorization:
* RADIUS does not support command-level authorization.
* HWTACACS supports per-command authorization(used in network device access control).
* Why is C false?
* RADIUS does not authorize configuration commands; HWTACACS does.
HCIP-Security References:
* Huawei HCIP-Security Guide # RADIUS vs. HWTACACS

NEW QUESTION # 58
If data filtering is configured on the firewall but is not correctly referenced in the security policy, the data that should be blocked can still be transmitted normally.

- A. FALSE
- B. TRUE

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
* Firewalls enforce security policies based on rules defined by the administrator.
* Data filtering rules must be explicitly referenced in security policies to take effect.
* Why is this statement true?
* If a filtering rule exists but is not linked to a security policy, it will not apply to network traffic.
HCIP-Security References:
* Huawei HCIP-Security Guide # Data Filtering Policy Configuration

NEW QUESTION # 59
When a user accesses the virtual gateway, the user can access the SSL VPN only after the user terminal passes the host check policy.

- A. FALSE
- B. TRUE

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
* Host check policyis a security mechanism inSSL VPNto verifyterminal security compliancebefore granting access.
* It checks for:
* Antivirus software
* Operating system patches
* Running processes
* Security settings
* If the terminal fails the host check, access is denied.
* Why is this statement true?
* A successful host check is required before an SSL VPN session is allowed.
HCIP-Security References:
* Huawei HCIP-Security Guide # SSL VPN Host Check Policy

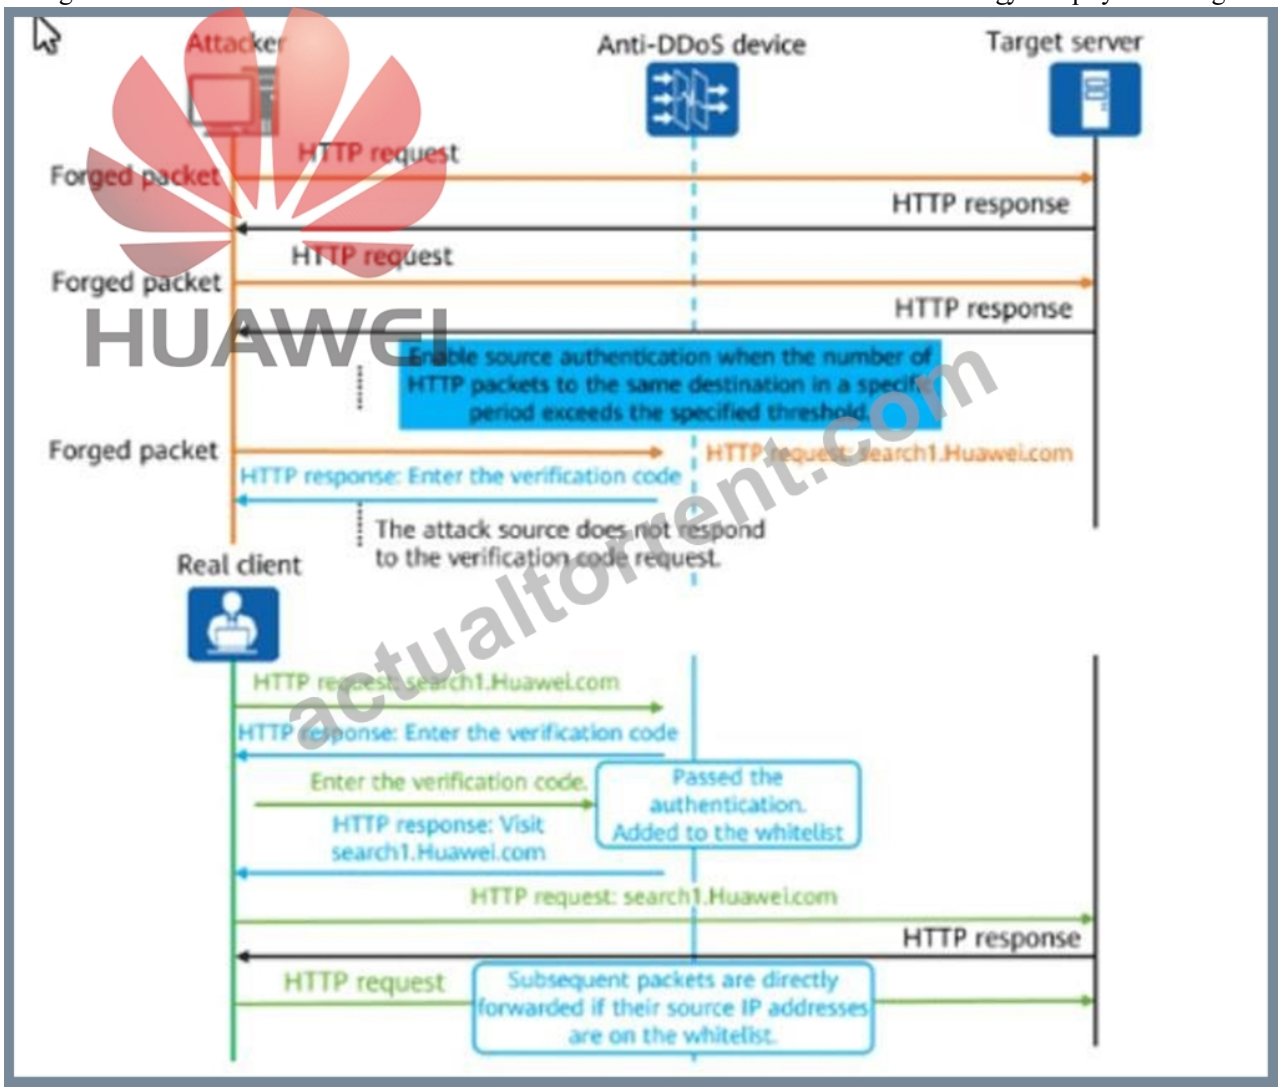
NEW QUESTION # 60
Before configuring DDoS attack defense, you must configure different thresholds for defense against different types of attacks. Each threshold can be considered an upper limit for normal network traffic.
When the rate of traffic exceeds the pre-configured threshold, the firewall considers it to be attack traffic and takes a corresponding action to defend against it.

- A. FALSE
- B. TRUE

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
* DDoS defense mechanisms rely on threshold settingsto distinguish between normal and attack traffic.
* Thresholds define:
* Maximumallowedtraffic volume.
* When exceeded, firewallstrigger mitigation actions(blocking, rate-limiting, etc.).
* Why is this statement true?
* Threshold-based detection is a fundamental part of DDoS mitigation.
HCIP-Security References:
* Huawei HCIP-Security Guide # DDoS Attack Prevention Thresholds

NEW QUESTION # 61
The figure shows the defense mechanism of an HTTP flood attack. Which source IP detection technology is displayed in the figure?



- A. Enhanced mode
- B. 302 redirect mode
- C. URI monitoring
- D. Basic mode

Answer: A

Explanation:
1##Understanding HTTP Flood Attacks:
* An HTTP flood attackis a type of DDoS attack where an attacker sendsa large number of HTTP requeststo a target server, overloading its resources.
* Attackers often use botnets or spoofed IP addressesto send forged HTTP requests, making it difficult to differentiate between legitimate and malicious traffic.
2##What is Happening in the Figure?
* TheAnti-DDoS devicedetects an abnormally high number of HTTP requests from certain IPs.
* Itchallenges suspicious clientsby requiring them to complete an authentication step (such as entering a verification code).
* Legitimate users can pass the authentication and get whitelisted, while bots and attackers fail to respond and are blocked.
3##Why is "Enhanced Mode" the Correct Answer?
* Enhanced Modeis an advancedsource IP detection technologythat uses verificationcodes or JavaScript challenges to distinguish real users from bots.
* Key features of Enhanced Mode:
* Verification challenge(e.g., CAPTCHA, JavaScript check).
* Whitelisting of verified usersto prevent further verification delays.
* Blocks attack sources that fail to respond to verification.
* In the figure, the systemprompts suspicious users to enter a verification codebefore allowing further access.
* Attackers typicallydo not respond, while legitimate userscomplete the challenge and continue browsing normally.
