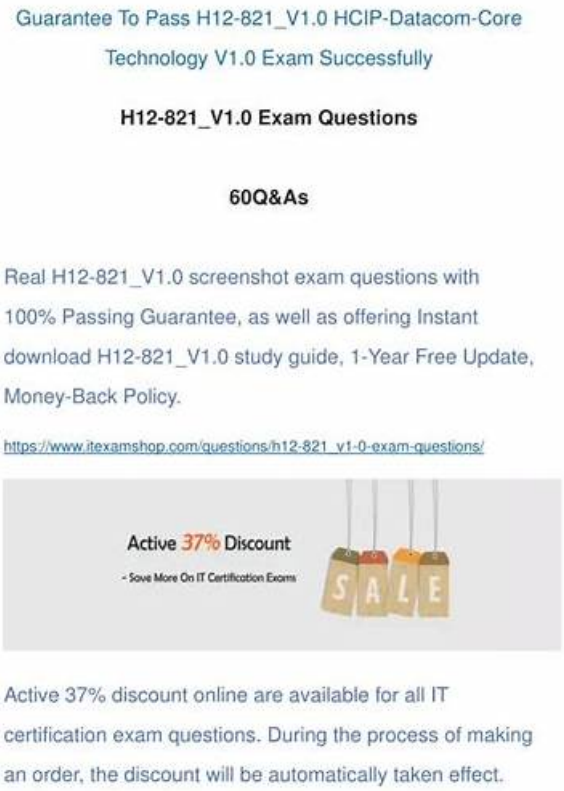
# H12-821_V1.0 Certified, Latest H12-821_V1.0 Exam Tips



BONUS!!! Download part of PrepAwayETE H12-821_V1.0 dumps for free: https://drive.google.com/open?id=1wYkber3QYFaniJmDIpzsHb91r4KJQp7Y

As we all know, office workers have very little time to prepare for examinations. It would be too painful to waste precious rest time on the subject. But if they have H12-821_V1.0 practice materials, things will become different. Our H12-821_V1.0 study materials not only include key core knowledge, but also allow you to use scattered time to learn, so that you can learn more easily and achieve a multiplier effect. And after you study with our H12-821_V1.0 Exam Questions for 20 to 30 hours, you will be able to pass the H12-821_V1.0 exam for sure.

Huawei H12-821_V1.0 Exam is an advanced-level exam that is designed for IT professionals with a strong background in data communication. It is ideal for individuals who are looking to improve their skills and knowledge in this field or for those who are seeking to advance their careers in the IT industry. H12-821_V1.0 exam is challenging and requires a high level of preparation and dedication to successfully pass.

Passing the Huawei H12-821_V1.0 Certification Exam is a significant achievement for professionals in the field of data communication and core network technology. It demonstrates that the candidate has a strong understanding of the latest technologies and industry best practices. Additionally, certified professionals are highly sought after by organizations that require advanced knowledge in data communication and core network technology.

The HCIP-Datacom-Core Technology V1.0 exam covers a wide range of topics related to data communication, including the basics of network technologies, advanced network design, and network troubleshooting. Candidates who Pass H12-821_V1.0 Exam are expected to have a deep understanding of the core technologies that are used in modern data communication systems.

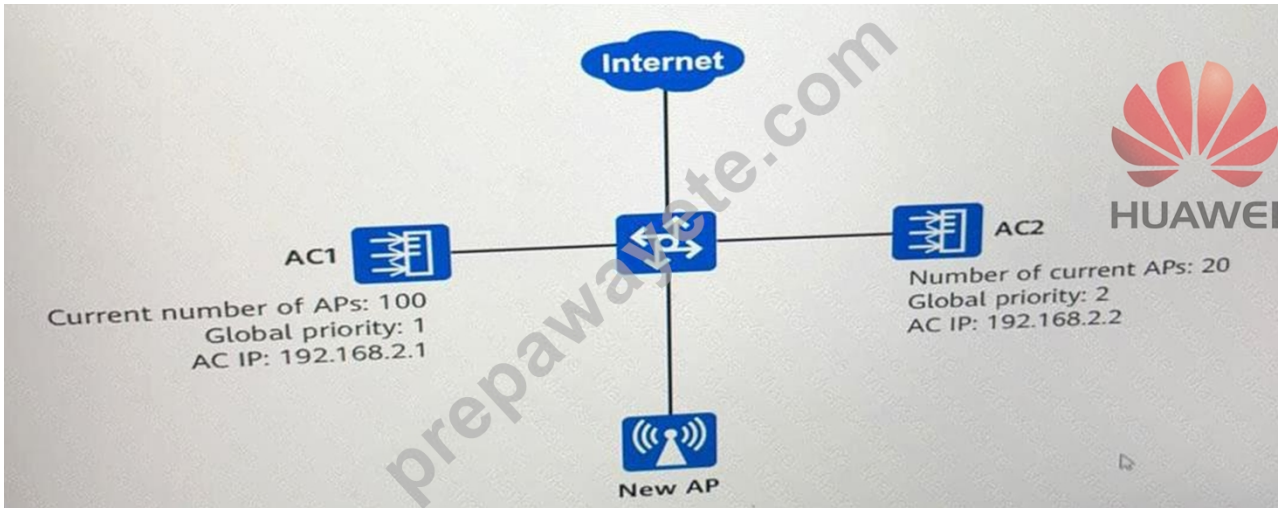
# Huawei H12-821_V1.0 Certified Exam Pass Certify | Latest H12-821_V1.0 Exam Tips

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the H12-821_V1.0 study materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the H12-821_V1.0 Study Materials and whose articles are highly authorized. They provide strong backing to the compiling of the H12-821_V1.0 study materials and reliable exam materials resources. They compile each answer and question carefully.

# Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q544-Q549):

**NEW QUESTION # 544**
As shown in the following figure, a new AP is deployed In dual link MSB networking (load balancing mode).
Which AC will the connect to?



- A. Random access
- B. AC2
- C. AC1
- D. None

**Answer: B**

Explanation:
In dual-link MSB networking with load balancing, the new AP will connect to the AC with the lower number of connected APs. In this case, AC2 has only 20 connected APs, while AC1 has 100. Therefore, the new AP will connect to AC2 .

**NEW QUESTION # 545**
Which of the following description of the Hello message in PIM-SM is wrong?

- A. The routers periodically use Hello messages to keep in touch
- B. Elect DR in multi-router network segment through Hello message
- C. In the PIM-SM network, the newly started multicast router needs to use Hello messages to discover neighbors and maintain neighbor relationships
- D. Hello packets are sent to the multicast address 224.0.0.5

**Answer: D**

**NEW QUESTION # 546**
Administrators can use the import-route command to introduce OSPF under different process IDs to each other.

- A. FALSE
- B. TRUE

**Answer: B**

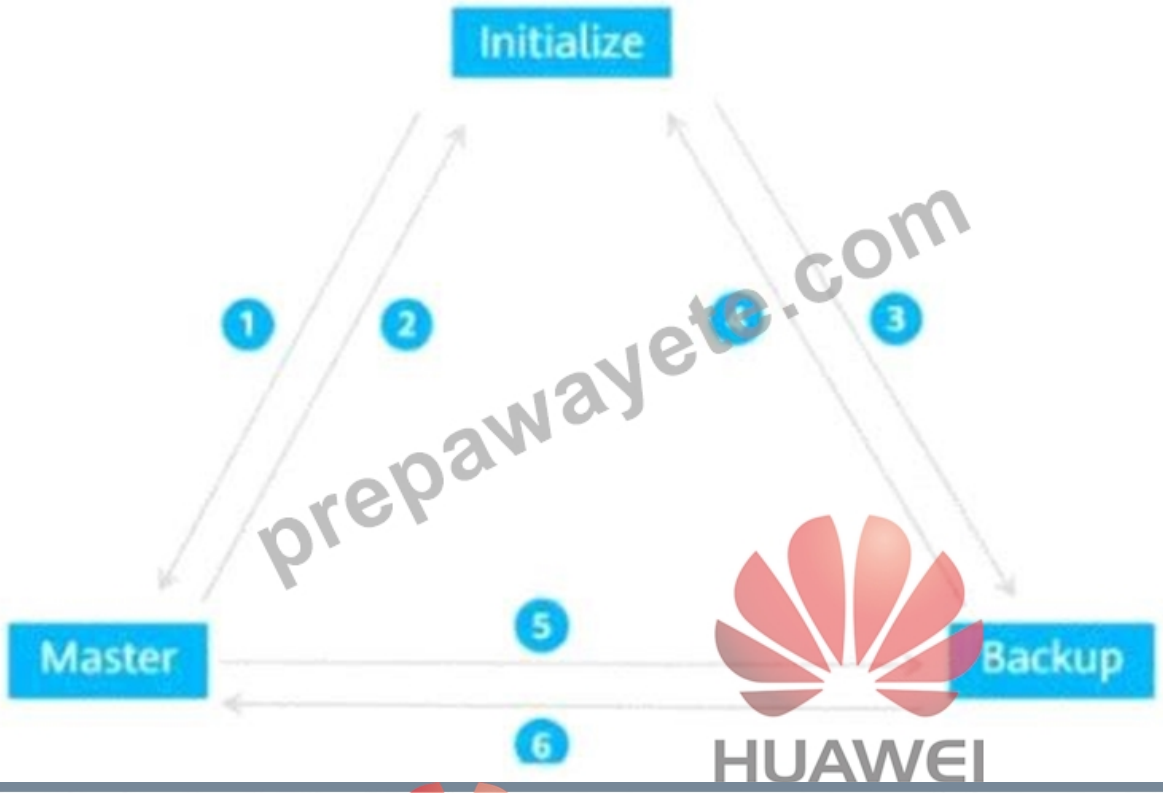
**NEW QUESTION # 547**
GRE is a VPN technology that can implement packet transmission over heterogeneous networks. Which of the following statements are true about GRE?

- A. GRE tunnels can work with IPsec to ensure the security of multicast services such as voice and video.
- B. GRE enables encapsulated data packets to be transmitted over another network layer protocol, butcannot encapsulate multicast data.
- C. GRE tunnels can extend the working range of network protocols with hop limits.
- D. GRE is a Layer 2 VPN encapsulation technology.

**Answer: A,C**

Explanation:
Comprehensive and Detailed Step-by-Step Explanation:
1. What is GRE (Generic Routing Encapsulation)?
GRE is a tunneling protocol that allows the encapsulation of various types of packets (e.g., IPv4, IPv6, multicast, etc.) to be transmitted over another protocol (e.g., IP).
GRE is used to create point-to-point connections over heterogeneous networks.
2. Analysis of Each Option:
Option A: GRE is a Layer 2 VPN encapsulation technology.
Incorrect.
GRE operates at Layer 3 (Network Layer) and encapsulates Layer 3 packets. It is not a Layer 2 VPN encapsulation technology like MPLS or Ethernet-over-IP.
Option B: GRE enables encapsulated data packets to be transmitted over another network layer protocol, but cannot encapsulate multicast data.
Incorrect.
GRE supports the encapsulation and transmission of multicast data packets. This is one of its key features, making it suitable for protocols like OSPF and multicast applications.
Option C: GRE tunnels can work with IPsec to ensure the security of multicast services such as voice and video.
Correct.
GRE by itself does not provide encryption or security. However, GRE can work with IPsec to secure the encapsulated traffic, including multicast data, for services like voice and video.
Option D: GRE tunnels can extend the working range of network protocols with hop limits.
Correct.
GRE encapsulates packets, effectively resetting their hop limits and allowing protocols with limited hop counts (e.g., RIP) to work over larger networks.
3. Summary:
The correct options areCandD.
Reference:
Huawei HCIA-Datacom Study Guide, Chapter "GRE Tunnel Technology."
RFC 2784: Generic Routing Encapsulation (GRE).

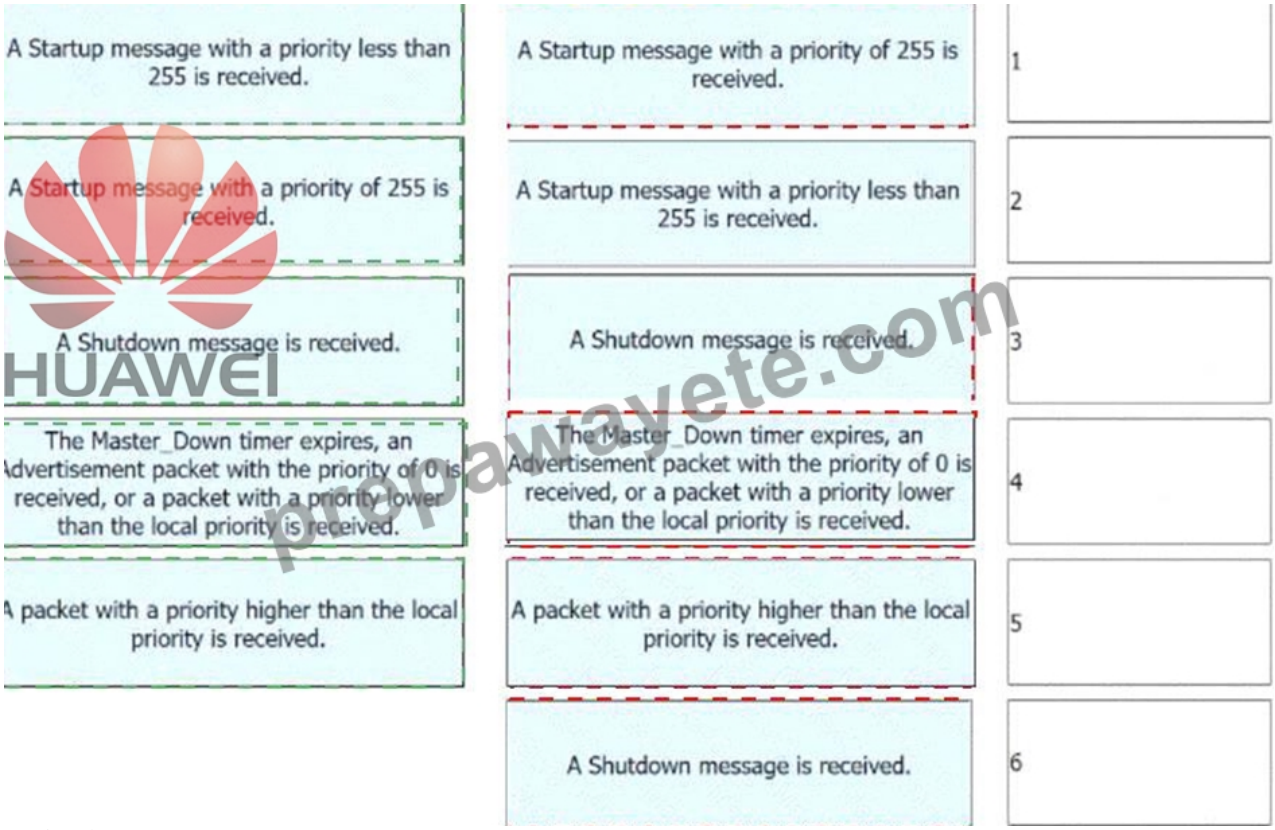
**NEW QUESTION # 548**
The figure shows the VRRP status switchover events. Match these events with their sequence numbers.



| | | |
|---|---|---|
| A Startup message with a priority less than 255 is received. | | 1 |
| A Startup message with a priority of 255 is received. | | 2 |
| A Shutdown message is received. | | 3 |
| The Master_Down timer expires, an Advertisement packet with the priority of 0 is received, or a packet with a priority lower than the local priority is received. | | 4 |
| A packet with a priority higher than the local priority is received. | | 5 |
| | | 6 |

**Answer:**

Explanation:



Explanation:
1 # A Startup message with a priority of 255 is received.2 # A Startup message with a priority less than 255 is received.3 # A Shutdown message is received.4 # The Master_Down timer expires, an Advertisement packet with the priority of 0 is received, or a packet with a priority lower than the local priority is received.5 # A packet with a priority higher than the local priority is received.6 # A Shutdown message is received.
