

H12-893_V1.0 Exam Outline - Exam H12-893_V1.0 Questions Fee

With H12-893_V1.0 guide torrent, you may only need to spend half of your time that you will need if you didn't use our products successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare for another exam. The benefits of H12-893_V1.0 Study Guide for you are far from being measured by money. H12-893_V1.0 guide torrent has a first-rate team of experts, advanced learning concepts and a complete learning model. You give us a trust and we reward you for a better future.

The dynamic society prods us to make better. Our services on our H12-893_V1.0 exam questions are also dependable in after-sales part with employees full of favor and genial attitude towards job. So our services around the H12-893_V1.0 training materials are perfect considering the needs of exam candidates all-out. They bravely undertake the duties. Our staff knows our H12-893_V1.0 study quiz play the role of panacea in the exam market which aim to bring desirable outcomes to you.

Exam Huawei H12-893_V1.0 Questions Fee & Exam Dumps H12-893_V1.0 Zip

Please don't worry about the purchase process because it's really simple for you. The first step is to select the H12-893_V1.0 test guide, choose your favorite version, the contents of different version of our H12-893_V1.0 exam questions are the same, but different in their ways of using. We have three different versions for you to choose: PDF, Soft and APP versions. The second step: fill in with your email and make sure it is correct, because we send our H12-893_V1.0 learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest H12-893_V1.0 version.

Huawei HCIP-Data Center Network V1.0 Sample Questions (Q60-Q65):

NEW QUESTION # 60

"1-3-5" troubleshooting of the CloudFabric intelligent O&M solution can detect, locate, and rectify faults from multiple dimensions. Which of the following are not dimensions supported by this function? (Select All that Apply)

- A. Service
- B. Configuration
- C. Device
- D. Protocol
- E. Application

Answer: E

Explanation:

Huawei's CloudFabric intelligent O&M solution, leveraging iMaster NCE-Fabric and FabricInsight, uses the "1-3-5" principle

(detect within 1 minute, locate within 3 minutes, rectify within 5 minutes) to handle faults. This approach analyzes faults across multiple dimensions. Let's evaluate each option:

A . Device: This is supported. The solution monitors device-level metrics (e.g., CPU, memory) to detect and locate faults. SUPPORTED.

B . Protocol: This is supported. Protocol issues (e.g., OSPF conflicts, BGP errors) are analyzed for fault detection and resolution. SUPPORTED.

C . Service: This is supported. Service-level faults (e.g., tenant connectivity, VPC issues) are tracked and addressed. SUPPORTED.

D . Application: This is not supported. The "1-3-5" troubleshooting focuses on network infrastructure (devices, protocols, services, configurations), not application-layer issues, which are outside its scope. NOT SUPPORTED.

E . Configuration: This is supported. Configuration errors (e.g., mismatched VNIs) are detected and rectified as part of the process. SUPPORTED.

Thus, D (Application) is not a dimension supported by the "1-3-5" troubleshooting function.

NEW QUESTION # 61

Which of the following are advantages of iMaster NCE-FabricInsight's telemetry-based performance metric collection? (Select All that Apply)

- A. Intelligent data analysis and automated troubleshooting
- B. Efficient transmission
- C. Quasi-real-time data collection
- D. One-off subscription and continuous data push

Answer: B,C,D

Explanation:

iMaster NCE-FabricInsight uses telemetry for performance metric collection, offering advanced monitoring in Huawei's CloudFabric Solution. Let's evaluate each option:

A . Efficient transmission: This is true. Telemetry uses streaming data (e.g., gRPC) to reduce overhead compared to traditional polling, enabling efficient transmission of metrics. TRUE.

B . Quasi-real-time data collection: This is true. Telemetry provides near-real-time data (e.g., sub-second updates), improving responsiveness over periodic SNMP polling. TRUE.

C . Intelligent data analysis and automated troubleshooting: This is false. While FabricInsight performs intelligent analysis, automated troubleshooting is a feature of the broader iMaster NCE platform, not specifically a telemetry advantage. Telemetry enables data collection, not the automation itself. FALSE.

D . One-off subscription and continuous data push: This is true. Telemetry operates on a subscription model where a one-time setup leads to continuous data push from devices, reducing manual intervention. TRUE.

Thus, A, B, and D are advantages of telemetry-based performance metric collection.

NEW QUESTION # 62

Which of the following components is not required to provide necessary computing, storage, and network resources for VMs during VM creation?

- A. Ceilometer
- B. Neutron
- C. Nova
- D. Cinder

Answer: A

Explanation:

This question pertains to OpenStack, a common virtualization platform in Huawei's HCIP-Data Center Network curriculum, where components collaborate to create and manage virtual machines (VMs). Let's analyze each component's role in providing computing, storage, and network resources during VM creation:

A . Nova: Nova is the compute service in OpenStack, responsible for managing VM lifecycles, including provisioning CPU and memory resources. It's essential for providing computing resources during VM creation. Required.

B . Neutron: Neutron is the networking service, handling virtual network creation, IP allocation, and connectivity (e.g., VXLAN or VLAN) for VMs. It's critical for providing network resources during VM creation. Required.

C . Ceilometer: Ceilometer is the telemetry service, used for monitoring, metering, and collecting usage data (e.g., CPU utilization,

disk I/O) of VMs. While useful for billing or optimization, it does not directly provide computing, storage, or network resources during VM creation. Not Required.

D . Cinder: Cinder is the block storage service, providing persistent storage volumes for VMs (e.g., for OS disks or data). It's essential for providing storage resources during VM creation if a volume is attached. Required.

Thus, C (Ceilometer) is not required to provision the core resources (computing, storage, network) for VM creation, as its role is monitoring, not resource allocation.

NEW QUESTION # 63

Which of the following statements are false about heartbeat link faults in an M-LAG? (Select All that Apply)

- A. The fault protection mechanism is triggered.
- B. The fault that two master devices exist cannot be detected in the case of a peer-link fault.
- C. An alarm is triggered.
- D. Services are affected.

Answer: B,D

Explanation:

In Huawei's M-LAG (Multi-Chassis Link Aggregation), the heartbeat link (or peer-link) ensures communication between member devices. A fault in this link can impact M-LAG operation. Let's evaluate each statement:

A . The fault that two master devices exist cannot be detected in the case of a peer-link fault: This is false. A peer-link fault can be detected, and mechanisms like dual-master detection (e.g., via Inter-Chassis Communication Link or ICC) can identify if both devices assume master roles, triggering corrective actions. FALSE.

B . An alarm is triggered: This is true. A peer-link fault generates an alarm to notify administrators, as it's a critical failure in M-LAG operation, per Huawei's fault management system. TRUE.

C . The fault protection mechanism is triggered: This is true. Huawei M-LAG includes protection mechanisms (e.g., failover to backup links or shutdown of conflicting interfaces) to mitigate peer-link faults and maintain service continuity. TRUE.

D . Services are affected: This is false. With proper configuration (e.g., redundant links or fast failover), services should not be affected by a peer-link fault, as M-LAG is designed for high availability. Impact depends on redundancy, but the design goal is uninterrupted service. FALSE.

Thus, A and D are false statements because dual-master faults can be detected, and services are not necessarily affected with adequate redundancy.

NEW QUESTION # 64

Which of the following operations need to be performed before deployment in Easy mode? (Select All that Apply)

- A. Configure an SSH fingerprint verification policy.
- B. Load the license.
- C. Pre-configure the access ports.
- D. Disable data synchronization upon going online for the first time.

Answer: B,C

Explanation:

The Easy mode in Huawei's iMaster NCE-Fabric simplifies VXLAN fabric deployment with automated configuration. Certain pre-deployment steps are required. Let's evaluate each option:

A . Disable data synchronization upon going online for the first time: This is false. Data synchronization is typically enabled by default to ensure consistency; disabling it is not a standard pre-deployment step and is optional based on specific needs. FALSE.

B . Load the license: This is true. A valid license must be loaded into iMaster NCE-Fabric before deployment to unlock features, including Easy mode functionality. TRUE.

C . Pre-configure the access ports: This is true. Access ports on devices (e.g., server leaf nodes) need to be pre-configured (e.g., with VLANs or basic settings) to ensure connectivity before Easy mode automation begins. TRUE.

D . Configure an SSH fingerprint verification policy: This is false. SSH fingerprint verification is part of security configuration but is not a mandatory pre-deployment step for Easy mode; it can be set post-deployment or is automated. FALSE.

Thus, B (Load the license) and C (Pre-configure the access ports) are required operations before deployment in Easy mode.

NEW QUESTION # 65

.....

It is exceedingly helpful in attaining a suitable job when qualified with H12-893_V1.0 certification. It is not easy to get the H12-893_V1.0 certification, while certified with which can greatly impact the future of the candidates. Now, please take H12-893_V1.0 practice dumps as your study material, you will pass your exam with H12-893_V1.0 practice materials successfully. H12-893_V1.0 free demo is available for everyone. Our H12-893_V1.0 practice dumps are extremely detailed and complete in all key points which will be in the real test. Believe us and you can easily pass by our H12-893_V1.0 practice dumps.

Exam H12-893_V1.0 Questions Fee: https://www.dumpsking.com/H12-893_V1.0-testking-dumps.html

Our H12-893_V1.0 guide materials are constantly updated, Whether you are purchasing or using our Huawei Exam H12-893_V1.0 Questions Fee Exam H12-893_V1.0 Questions Fee - HCIP-Data Center Network V1.0 exam practice simulator, your personal privacy will be protected with our methods, A lot of professional experts concentrate to making our H12-893_V1.0 practice materials by compiling the content so they have gained reputation in the market for their proficiency and dedication, With the model of SOFT, the H12-893_V1.0 study guide can promptly attract candidates' interest of study.

Other advanced settings are addressed in later chapters, where H12-893_V1.0 they'll make more sense to you, These faces much like the pirate's code should be seen more as guideline than actual rules.

Our H12-893_V1.0 Guide materials are constantly updated, Whether you are purchasing or using our Huawei HCIP-Data Center Network V1.0 exam practice simulator, your personal privacy will be protected with our methods.

H12-893_V1.0 Exam Outline Exam 100% Pass | Exam H12-893_V1.0 Questions Fee

A lot of professional experts concentrate to making our H12-893_V1.0 practice materials by compiling the content so they have gained reputation in the market for their proficiency and dedication.

With the model of SOFT, the H12-893_V1.0 study guide can promptly attract candidates' interest of study, After you purchase our product you can download our H12-893_V1.0 study materials immediately.
