

H12-893_V1.0 Reliable Exam Camp & H12-893_V1.0 Vce Files

What's more, part of that GuideTorrent H12-893_V1.0 dumps now are free: https://drive.google.com/open?id=1CafEEIx7Z2f7qZcw5B_hB9Y9xX6BbmeX

Our H12-893_V1.0 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our H12-893_V1.0 guide torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. So we hope you can have a good understanding of the H12-893_V1.0 Exam Torrent we provide, then you can pass your exam in your first attempt.

The GuideTorrent H12-893_V1.0 exam software is loaded with tons of useful features that help in preparing for the exam efficiently. The H12-893_V1.0 questions desktop H12-893_V1.0 exam software has an easy-to-use interface. GuideTorrent provides Huawei certification exam questions for desktop computers. Before purchasing, you may try a free demo to see how it gives multiple Huawei H12-893_V1.0 Questions for Huawei certification preparation. You may schedule the Huawei H12-893_V1.0 questions in the H12-893_V1.0 exam software at your leisure and keep track of your progress each time you try the Huawei H12-893_V1.0 questions, which preserves your score. However, it is only compatible with Windows.

2025 H12-893_V1.0 Reliable Exam Camp | Newest 100% Free H12-893_V1.0

Vce Files

To keep with the fast-paced social life, we make commitment to all of our customers that we provide the fastest delivery services on our H12-893_V1.0 study guide for your time consideration. As most of the people tend to use express delivery to save time, our H12-893_V1.0 Preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant H12-893_V1.0 exam materials to your mailbox within the given time.

Huawei HCIP-Data Center Network V1.0 Sample Questions (Q31-Q36):

NEW QUESTION # 31

In EVPN, Type 5 routes are used only by hosts on a VXLAN network to access external networks.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

EVPN (Ethernet VPN) is a control plane technology used with VXLAN to provide Layer 2 and Layer 3 services in data center networks, including Huawei's implementations. EVPN routes are categorized into types, with Type 5 routes (IP Prefix routes) serving a specific purpose:

Type 5 Routes: These routes advertise IP prefixes and are used for inter-subnet routing, allowing communication between different VXLAN Virtual Network Identifiers (VNIs) or between VXLAN networks and external networks. They carry a Layer 3 VNI and IP prefix information, enabling routers or gateways to perform Layer 3 forwarding.

Usage Scope: Type 5 routes are not limited to hosts on a VXLAN network accessing external networks. They are also used by network devices (e.g., gateways, routers) within the EVPN domain to facilitate routing between subnets, including intra-VXLAN communication. For example, a centralized gateway or distributed gateway can use Type 5 routes to route traffic within the data center or to external networks, not just host-initiated access.

The statement is FALSE (B) because Type 5 routes are not exclusively for hosts on a VXLAN network to access external networks; they support broader Layer 3 routing functions across the EVPN domain.

NEW QUESTION # 32

Which of the following nodes connects computing resources such as virtual and physical servers to a VXLAN fabric?

- A. Border leaf
- B. DCI leaf
- C. Server leaf
- D. Service leaf

Answer: C

Explanation:

In Huawei's spine-leaf VXLAN fabric (e.g., CloudFabric), nodes have specific roles:

A . DCI leaf: Data Center Interconnect (DCI) leaf nodes connect different data centers, not internal computing resources. Incorrect.

B . Server leaf: Server leaf nodes connect computing resources (virtual servers via hypervisors, physical servers) to the VXLAN fabric, handling access traffic. This is the correct role for connecting servers. Correct.

C . Border leaf: Border leaf nodes connect the DCN to external networks, not internal computing resources. Incorrect.

D . Service leaf: Service leaf nodes connect to value-added services (e.g., firewalls), not directly to computing resources like servers. Incorrect.

Thus, the answer is B (Server leaf).

NEW QUESTION # 33

A hypervisor virtualizes the following physical resources: memory, and input/output (I/O) resources. (Enter the acronym in uppercase letters.)

Answer:

Explanation:

CPU

Explanation:

A hypervisor is a software layer that creates and manages virtual machines (VMs) by abstracting physical resources from the underlying hardware. The question specifies that the hypervisor virtualizes "memory" and "input/output (I/O) resources," and the task is to provide the missing resource acronym in uppercase letters. In virtualization contexts, including Huawei's FusionCompute or OpenStack with KVM, the primary physical resources virtualized by a hypervisor are:

CPU: The central processing unit (CPU) is virtualized to allocate processing power to VMs, enabling multi-tenancy and workload isolation.

Memory: Virtualized to provide RAM allocation to VMs, abstracted via memory management units (MMUs).

I/O Resources: Input/output resources (e.g., NICs, disks) are virtualized to allow VMs to communicate and store data, often through virtual NICs (vNICs) or virtual disks.

The question lists "memory" and "I/O resources" explicitly, implying the missing resource is CPU, as it completes the standard triad of virtualized resources in hypervisor design. Thus, the answer is CPU.

NEW QUESTION # 34

An enterprise builds a DC and deploys iMaster NCE-Fabric to automatically deliver network configurations. After the engineer manually deploys the underlay network and delivers overlay network configurations through iMaster NCE-Fabric, it is found that tenant hosts cannot access external networks. Which of the following is not a possible cause of this fault?

- A. No firewall security policy is configured when host traffic passes through the firewall.
- B. No return route is configured on the PE.
- **C. The MAC address of the NVE interface on the VXLAN network is not manually specified.**
- D. The engineer did not check whether the service loopback interface needs to be configured on the VXLAN network based on the switch model.

Answer: C

Explanation:

In Huawei's CloudFabric Solution, iMaster NCE-Fabric automates overlay network (e.g., VXLAN) configuration, while the underlay network is manually deployed. Tenant hosts failing to access external networks indicate a connectivity issue, likely at the overlay-underlay boundary or security layer. Let's evaluate each option as a possible cause:

A . No return route is configured on the PE: This is a possible cause. The Provider Edge (PE) device (e.g., border leaf or router) must have a return route to the tenant's VXLAN network for external access. Without it, traffic from external networks cannot reach the DC. POSSIBLE CAUSE.

B . The engineer did not check whether the service loopback interface needs to be configured on the VXLAN network based on the switch model: This is a possible cause. Some Huawei switch models (e.g., CE series) require a service loopback interface as the VTEP source IP. If omitted or misconfigured based on the model, external connectivity fails. POSSIBLE CAUSE.

C . No firewall security policy is configured when host traffic passes through the firewall: This is a possible cause. If a firewall is in the path (e.g., between tenant VPC and external network), a missing security policy (e.g., allowing outbound traffic) blocks access. POSSIBLE CAUSE.

D . The MAC address of the NVE interface on the VXLAN network is not manually specified: This is not a possible cause. The Network Virtualization Edge (NVE) interface in VXLAN does not require a manually specified MAC address; it uses the switch's system MAC or auto-generates one. iMaster NCE-Fabric typically handles this automatically, and manual specification is neither required nor a common fault point for external access issues. NOT A POSSIBLE CAUSE.

Thus, D is not a possible cause of the fault.

NEW QUESTION # 35

In network overlay, both endpoints of a VXLAN tunnel are physical switches.

- **A. FALSE**
- B. TRUE

Answer: A

Explanation:

In a network overlay, VXLAN (Virtual Extensible LAN) tunnels extend Layer 2 networks over a Layer 3 underlay, commonly implemented in Huawei's data center solutions. The endpoints of a VXLAN tunnel are VXLAN Tunnel Endpoints (VTEPs), which encapsulate and decapsulate traffic.

VTEP Roles: VTEPs can be physical switches (e.g., Huawei CloudEngine series), virtual switches (e.g., Open vSwitch on a hypervisor), or routers with VXLAN support. The endpoints are defined by their IP addresses, not their physical nature.

Deployment Flexibility: In modern data centers, VXLAN tunnels often connect physical switches to virtualized environments where VTEPs reside on hypervisors or servers hosting VMs. For example, a VM's vNIC might connect to a virtual switch (VTEP) that tunnels to a physical switch VTEP. Thus, both endpoints are not always physical switches; one or both can be virtual. The statement is FALSE (B) because both endpoints of a VXLAN tunnel are not necessarily physical switches; they can include virtual VTEPs in hypervisors or other devices.

NEW QUESTION # 36

.....

Why we are ahead of the other sites in the IT training industry? Because the information we provide have a wider coverage, higher quality, and the accuracy is also higher. So GuideTorrent is not only the best choice for you to participate in the Huawei Certification H12-893_V1.0 Exam, but also the best protection for your success.

H12-893_V1.0 Vce Files: https://www.guidetorrent.com/H12-893_V1.0-pdf-free-download.html

Therefore, you can open this Huawei H12-893_V1.0 real dumps document and study for the Huawei H12-893_V1.0 test at any time from your comfort zone, They also make new supplementary H12-893_V1.0 learning materials and add prediction of market trend happened in this exam, Start Learning Actual Huawei H12-893_V1.0 Exam Questions for Best Results, Huawei H12-893_V1.0 Reliable Exam Camp we can promise that our products have a higher quality when compared with other study materials.

Working with Advertisements, You can rest assured that the financial H12-893_V1.0 reports that the user community is accustomed to will appear when needed and in the form to which they are accustomed.

Therefore, you can open this Huawei H12-893_V1.0 Real Dumps document and study for the Huawei H12-893_V1.0 test at any time from your comfort zone, They also make new supplementary H12-893_V1.0 learning materials and add prediction of market trend happened in this exam.

H12-893_V1.0 Questions of the Highest Quality - Unlock Your Success

Start Learning Actual Huawei H12-893_V1.0 Exam Questions for Best Results, we can promise that our products have a higher quality when compared with other study materials.

You can encounter the same questions in the real exam.
