Answer: A,D

#### **NEW OUESTION #259**

Competitors question the independent monitoring board of frame switches. The separation of forwarding, management, and control planes of switch equipment is a guarantee of reliability. Most switches have adopted a distributed forwarding architecture to meet the demand for separation of forwarding and management control planes, but high-end switches still need to separate management and control planes, and separate the heartbeat monitoring messages between the main control board and all components. Improve system reliability. Cisco, HW, ZTE and other high-end switches all support this hardware architecture.

- A. False
- B. True

Answer: B
